PARISH ELECTORATE FORECASTS AND TABLE OF EXISTING AND PROPOSED ELECTORAL ARRANGEMENTS

Wicken Bonhunt	0		2	183	186	190	0
----------------	---	--	---	-----	-----	-----	---

Notes:

- *1 The Birchanger electoral scheme cannot be agreed or amended until the outcome of the community governance boundary review is known.
- *2 At Great Dunmow North, the assumed number of house completions has been reduced from 583 to 212 to take account of the slow rate of house completions taking place at Woodlands Park. This allows for 40 completions per year at Woodlands Park as well as 12 other committed units.
- *3 The Little Canfield electoral scheme cannot be agreed or amended until the outcome of the community governance boundary review is known.
- *4 The Stansted Mountfitchet electoral scheme cannot be agreed or amended until the outcome of the community governance boundary review is known.
- *5 The Takeley electoral scheme cannot be agreed or amended until the outcome of the community governance boundary review is known.

The five year electorate forecasts were prepared using information about estimated completions in the period from 2010 to 2015 supplied by the Planning and Housing Strategy office of Uttlesford District Council. An average of 1.75 electors has been assumed for each estimated completion. This estimate is thought to be realistic given the number and distribution of the electorate throughout Uttlesford.

Peter Snow
Committee and Electoral Services Manager
