(1) That the lights in all areas of the car park are on all night (as present). (2) That the lights are turned off at midnight until 5 a.m. (similar arrangement as EEC for street lighting) or (3) That the lights are turned off at 11 pm until 5 am.	(4) The lights in the season ticket holders' area are currently turned off at 9 pm. Do you feel this could be moved to 8 pm?	
2*	Yes	* Only some lights are needed - preferably less intrusive. The new lights are too many and inappropriate. However, the orange lights that were there were not so obtrusive and provided necessary lighting for people needing to cross the car park in the early hours.
3	Yes	Season ticket Holder area should be 7 pm
2	Yes	I think the lighting in the car park is necessary for security. What was wrong with the low lit orange lights or maybe carriage lamp posts which would be more in keeping with an ancient flich town.
1	No	We would prefer them kept on as we are closest to the car park and we feel vulnerable. There have already been several incidents where the police have had to be called.
2	No	To be perfectly honest the lighting has not caused a major problem to me but I do know that many neighbours have complained about it.
2	No	Signs need to be erected in the car park stating which activities are not allowed (i.e. football/skating etc) and CCTV cameras installed in order that this can be enforced.
2*	Yes**	*Some lights do have to be left on all night as people use the late night and early morning airport bus and should have at least a few lights left on when they are walking through the main car park (and the small car park on Mill Lane exit). Clive Smith suggests 4 pillars of lights are left on and I agree. ** Season ticket car park is mostly empty at night and lights elsewhere in car park provide enough lighting anyway. I am grateful for the shades which now prevent glare from lights into my property but these floodlights were a ridiculous choice of lighting for use in an old country market town. They are unsightly to look at even when they are not switched on! the lights previously used in the car park were just as adequate, or carriage lamp lighting would have been lovely. Installation of these grey, urban floodlight monstrosities was a complete mistake which will be a blight on the car park, the new development, the town square and the whole area for all the years to come. Shoot the designer!
3?	Yes	Would prefer the lights to be turned off at 10.30 pm until 5 am. Very concerned about the bottle bank as causing great disturbance throughout the day and evening. Users tend to leave their engines running whilst dropping off their rubbish - would be obliged if the bottle banks could be moved to another position. Also problem with fumes from vehicles.
1	No	
2	No	The previous low level lighting was perfectly adequate. This stadium style spotlighting was a huge error.
2	Yes	Our house backs on to the Co-op car park and the lights are extremely bright in our bedroom window throughout the night.

		After much consideration we feel that this falls within the town centre and would strongly prefer the lights to remain on all night. The comparison with the part night lighting scheme is not valid as the town centre area at Saffron Walden and Stansted remain lit all through the night. The white Street Car Park is frequented by young people and as a potential opportunity for thieves every precaution must be taken.
1	No	Lights are switched off on the footpath from car park to Venmore Drive. They should be left on all night.
2*	Yes	*but make it 7 a.m. The lights shine through our bedroom windows at night. The shades now put on some lights are an improvement but we need more lights shaded.
3	Yes	The halogen lights in the car park are so bright as to be intrusive. This level of brightness is unnecessary - especially in this day and age when we are trying to conserve energy.
2	Yes	Notices posted re no skate boarding etc in car park area.
3*	Yes	*Lights off from 10pm to 7.30 am as no one uses the car park between these times and sudden lights annoy the residents. There are unshaded lights in which need to be shaded.
