

Background note to accompany meeting of LDF Task Group 20 October 2008
Agenda Item 6 Feedback Arrangements

The purpose of this agenda item is to discuss the best ways to go through the technical studies and prepare Members for the decisions they need to take at Committee

The Technical Studies include the
Strategic Housing Market Assessment (SHMA)
Strategic Housing Land Availability Assessment (SHLAA)
Comparative Sustainability Assessment of Spatial Options
Water Cycle Study
Transport Assessment

Committees

When considering the following Members should bear in mind the timetable for the stages up to the next consultation period as discussed in Item 1.

Prior to the meeting it would be helpful if you could consider

Level of information to be provided to Members

Eg Summary paper which could be provided to all members
A copy of the whole document to go to Members of the Environment
Committee

Format of information

Eg Paper
Electronic
Copies in members' room

Workshops

Day
Time

A suggestion for workshops would be to have separate workshops for each study as and when information is available, supplemented with workshops prior to committee at which any key decisions of the Core Strategy are to be made.
