

Committee Date / Reference	North Essex Parking Partnership TRO Sub-Committee	
	18 October 2012	
Report Title	Consideration of Requested Parking / Waiting restrictions and formalisation of Schools Clearways	
Report Subject	<p>Outlining the requests for parking and waiting restrictions received between April and October 2012.</p> <p>Formalising all advisory school zig-zag markings and regulating these locations with No Stopping – Clearway restrictions for the purpose of road and pedestrian safety.</p>	
Reason and Decision being sought	<p>To allow for parking/waiting restrictions to be progressed by the NEPP in order to secure the expeditious, convenient and safe movement of vehicular and other traffic and provision of adequate parking.</p> <p>Decisions on which schemes to progress are sought from the relevant Partner Authorities.</p>	
Type of Report

1. Summary and Scope

- 1.1. The North Essex Parking Partnership Sub Committee for Traffic Regulation Orders (“The TRO Sub Committee”) considers requests for making parking restrictions on the highway in order to secure the expeditious, convenient and safe movement of vehicular and other traffic and provision of adequate parking.
- 1.2. The TRO Sub Committee is asked to consider and approve, defer or reject schemes from the list of requests in order to maintain a manageable and sustainable work programme.
- 1.3. The North Essex Parking Partnership operational service (NEPP) office has now received over 300 informal requests for new parking and waiting restrictions since its inception.
- 1.4. Meetings have taken place between NEPP officers and Client Officers to discuss the merits or otherwise of, and conduct informal consultation about, the requests received, since the last round of traffic orders were agreed by the TRO Sub Committee.

2. TRO Requests

- 2.1. The requests that are to be considered are listed in the Appendices by district/borough council area.
- 2.2. Numbering re-starts at scheme request 54, beginning from number 10,000 in order to retain lists by districts, as shown in Appendix A. The first 53 requests were considered at the meeting on 8 March 2011.
- 2.3. A separate case report has been provided for local consultation and is also available for inspection for each of the requests.

3. School Restrictions

- 3.1. There are over 300 schools in the area covered by the North Essex Parking Partnership. Many of these have restrictions.
- 3.2. The North Essex Parking Partnership frequently receives complaints from residents concerning parking around schools at opening/closing times due to perceived dangers.
- 3.3. Some of the school keep clear markings are advisory only and are not supported by a Traffic Regulation Order (TRO).
- 3.4. Enforcement of the restrictions by Civil Enforcement Officers is therefore not possible in the advisory locations and any perceived problems persist.
- 3.5. It would be advantageous to be able to implement TROs for these areas without having to adhere to the current TRO approval process individually, but rather by way of a delegation to officers.
- 3.6. This would only relate to TROs for any lines that are already in place, not for additional new restrictions which would continue to follow the current decision making by member process.

4. Scoring Matrix

- 4.1. The current scoring matrix has been adjusted, from the original form used, in an attempt to introduce and consider relevant information required for a TRO. It is apparent from meetings held with client officers that the matrix may require further adjustment and an open discussion in relation to this should be promoted.
- 4.2. For the purposes of this meeting however, the scoring is an indication of the relative position of each scheme and should be used as a guide when promoting schemes, alongside any other qualitative measures which may become obvious during debate of the relative merits of particular schemes.

5. Decisions

- | |
|---|
| <ol style="list-style-type: none">5.1. Members are asked if they wish to promote and progress to full consultation or defer any of the requested parking and waiting restrictions from the lists in their possession, including previously deferred schemes, by deciding to implement TROs on the highway.5.2. Members are also asked to reject all restriction requests which do not meet the criteria where the introduction of a scheme is not deemed appropriate; with the option of deferring schemes to remain on the list.5.3. Members are asked to delegate the power to implement TROs at all existing school zig-zags to officers in order to introduce TROs at school sites for the purpose of expediency in order to validate advisory-only restriction markings thereby allowing enforcement to be carried out. |
|---|
- 5.4. The reason for making parking restrictions on the highway is in order to secure the expeditious, convenient and safe movement of vehicular and other traffic and ensuring the provision of adequate parking.
 - 5.5. NEPP officers will arrange to contact all interested parties to inform of any decision made and, in the case of rejections, to remove the request from pending list held.
 - 5.6. This is deemed necessary to manage customer's expectations and to ensure that the current request recording system is sustainable.

Appendix A – all new scheme and deferred requests to date

Previously presented requests, (approved or deferred) – for action on deferred schemes and new schemes for consideration

Request Number	District	Name of Scheme	Type of Restriction and brief summary	Funded	Priority for District	Score	Previously Approved (no action – PA) / Approved (A) / Deferred (D) / Rejected (R) / Previously Deferred (PD)? With date of meeting
