

**LOCALITY BOARD held at COMMITTEE ROOM 6, ESSEX COUNTY
COUNCIL, COUNTY HALL, MARKET ROAD, CHELMSFORD, CM1 1QH, on
MONDAY, 5 NOVEMBER 2018 at 4.00 pm**

Attendees Cllr Susan Barker (UDC/ECC), Dawn French (UDC), Fiona Gardiner (UDC), Mike Gogarty (ECC), Cllr Ray Gooding (ECC), Roger Harborough (UDC), David Hill (ECC), Ralph Holloway (ECC), Anna Mawson (UDC), Cllr Gagan Mohindra (ECC), Chris O'Niorns (ECC), Cllr Julie Redfern (UDC), Cllr Howard Rolfe (UDC), Cllr Howard Ryles (UDC), Cllr Andrew Sheldon (ECC), Cllr Simon Walsh (ECC), Adrian Webb (UDC)

Apologies Cllr Simon Howell (UDC), Cllr John Moran (ECC), Cllr Vic Ranger (UDC)

1 INTRODUCTIONS

Councillor Rolfe was initially held up from the start of the meeting due to traffic.

Councillor Barker took the Chair at the request of those present, welcomed all and introductions were made.

2 MINUTES OF THE PREVIOUS MEETING

The minutes of the meeting held on 9 July 2018 were agreed as a correct record.

3 UPDATE ON ACTIONS FROM LAST MEETING

Updates were given on the action points of the meeting of 9 July 2018, as follows:

- Action: UDC to write to parish councils to request contact details for transport representatives.
- Action: To circulate statistics relating to the locations of road accidents in the minutes of the meeting.
 - It was noted that the distribution of accidents in the district was skewed by the presence of the M11 and A120 carrying a large number of accident spots.
- Action: To further investigate potential ways of mitigating Public Health profile issues.
- Action: ECC to distil key information into a media release regarding the work going on to plan school places.
 - Councillor Gooding said that it was important to note that 98.4% of students got first choice at primary admission stage and 93.7% of students got first choice at secondary admission stage.

- Action: ECC/UDC to ensure Government recognises the issue of infrastructure funding, in light of the Planning Inspectorate examining the proposed Garden Communities in the future.
- Action: Councillor Sheldon said he could arrange a Member workshop/presentation from Gigaclear to provide an update on the situation.
 - Councillor Sheldon asked that he be contacted directly for requests for information and he said that he would liaise with Gigaclear directly. He said he would personally chase outstanding queries.
- Action: To clarify the areas in which ECC maintained roadside verges.
- Action: David Hill said he would take this point back to ECC and check on the specifics, as well as look into any contractual issues that may arise.

4 **UPDATE ON DISABLED FUNDING GRANTS**

Dawn French spoke about pursuing other authorities that weren't spending their Disabled Funding Grant allocation and the need for these authorities to be approached to share it. Uttlesford's goal to support disabled people living in the home safely was discussed as a driving force.

Councillor Barker said that Harlow's allocation was underspent. Dawn French said that she would address the underspend with the Chief Executive of Harlow Council, as she understood it had been ringfenced.

5 **UPDATE ON BROADBAND**

Councillor Mohindra said the officer with responsibility for progressing the project had now returned from her absence and would provide an update in due course.

Councillor Rolfe said there was the assumption that 99.4% of the district was 'available for connectivity', Superfast Essex have currently 92.5% connectivity but that there were concerns that 'County Broadband' were holding this target up by holding areas back.

6 **PUBLIC HEALTH PROFILE**

Mike Gogarty delivered a presentation on Public Health Uttlesford (appended to these minutes).

Discussions centred on the unexpected results and the reasons why some results might be skewed. There were a number of indicators which were a concern.

The board noted that although reporting of crime was still below the average the figure was increasing, this could be attributed to the change in the method of recording that the police were using.

The employment rate in Uttlesford had decreased, however it was mentioned that there was very little unemployment in the district.

Fiona Gardiner spoke about Active Essex and Active Uttlesford. The need for local promotion and competition was raised by the members.

The rates of early cancer detection were discussed and the need to work with colleagues in the health service. Possible reasons attributed were the long waits for appointments and the longer waits for referrals to consultants.

The increase in road deaths was discussed, it was noted that Uttlesford has two particularly significant risk factors; the motorway and the rural areas.

The Board discussed the community speed watch initiative, which would be increasing with the addition of PCOS and new equipment. This would enable higher rates of prosecution. Members expressed frustration that compared to other areas it was difficult to get traffic calming measures installed.

Councillor Gooding spoke on the policy issues of average speed verses maximum speed. He said the impact was significant and warranted further examination.

Action: To escalate speeding issues and Essex policy to Cabinet Member.

Excess winter deaths were discussed, and that the marker is linked to affluence so given the demographic of Uttlesford it was surprising. This was a consistent trend and the results seem to indicate respiratory and heart diseases as the causes.

Fiona Gardiner said that this would be one of the health and wellbeing priorities and that the CAB would be looking at fuel poverty with people that had been flagged with building research establishment data.

It was noted that the drug related street crime statistics would be skewed by the presence of Stansted Airport.

Concerns were raised in relation to the diagnosis of diabetes and that the figure was disproportionately low. The group discussed the need for GPs, opticians and podiatrists to be watching for symptoms and making referrals. The board discussed whether there was a need to research what areas with higher rates of detection doing.

7

SPECIAL EDUCATION HEALTH PLANS

Need verses expectation in the community was discussed, there were 8700 children with Special Education Health Plans in Essex and approximately 4% of children had some degree of special educational requirements.

Ralph Holloway spoke about mainstream schools with special education class bases, which negate the need for a designated special school in some areas,

like Magna Carta. However there was discussion about what was available for those Children whom mainstream school was not an option, as there were no special schools in Uttlesford. Ralph Holloway also advised that two new special schools (primary and secondary) were being built in Harlow.

Councillor Ryles asked who was responsible for holding schools to account to ensure that they were delivering the SEND offer. Chris O’Niorns advised that there were to be changes to the system, and schools would be responsible for their own outcomes. However if a school was not delivering what they were asked to then SEND would need to know so that they could intervene.

Councillor Gooding said that there were problems with schools not wanting children with additional education needs, and that all schools needed to ‘step-up’.

Councillor Rolfe said that this was another Garden Communities issue. He said there was a need to get developers on board and consider the special education requirements for these new communities.

Councillor Sheldon said plans are always passed ‘subject to a section 106’ but only a certain amount of money could be sought through a section 106 agreement.

Councillor Redfern said that there is a need to be firmer with what is expected from developers.

Councillor Barker said that there was a requirement to raise contributions for healthcare and special schools.

Councillor Rolfe raised similarly the lack of nursing facilities (nursing homes) in Essex and the provision of which that could be contributed to by new developments and developers.

8 **ECONOMIC DEVELOPMENT**

The responses to the last Locality Board questions from Roger Harborough are appended to these minutes.

Infrastructure was discussed, in relation to financing requirements, and support from MAG.

Councillor Rolfe asked how Essex interplays with other bodies and for clarity around Essex’s position.

Councillor Mohindra spoke about focussing on market failures, loss leaders if appropriate, ensuring that maximum returns were achieved from outlay.

Councillor Barker spoke about the lack of smart roads.

Councillor Mohindra spoke about the current character of the road infrastructure in Essex and that one accident will upset the whole network.

9 **FUTURE MEETING AGENDA ITEMS AND ACTION POINTS**

Action from item 6: Escalate Essex Policy Issue to Cabinet Member

Agenda for next meeting:

- Councillor Barker asked that an item be added to the next agenda, the nature of which she could not disclose at present.
- Broadband would be added as a standing item moving forward.
- Local Plan update/DPD Update
- Section 106/CIL – Negotiating through process. Councillor Mohindra will have an update following his planning meeting in January.
- Business Rates Retention Pilot Outcome

10 **ANY OTHER BUSINESS**

None

11 **DATE AND TIME OF NEXT MEETING**

Date to be arranged late January

Democratic Services to liaise with executive support to arrange.

Meeting close 5:45pm

Minute Item 3

Locality Board Action Update – November 2018

Public transport

An action was allocated to UDC to write to parish councils to request contact details for transport representatives.

A note has been sent to all Parish Clerks emphasising the need for better communication between the Parish Council transport representatives (and/or the Clerk) and ECC Passenger Transport Service (with contact details included) to ensure ECC had the 'local view' on services and the impact of withdrawal of service.

School Places:

An action was raised for ECC to distil key information into a media release regarding the ongoing work taking place to plan school places.

ECC can confirm that the School Organisation & Place Planning team have developed a plan to proactively release some positive information to Essex residents. The anticipated date for the first press release will be September, to coincide with the new term.

Press release below, agreed by Cllr Gooding, ECC Cabinet Member for Children's Services. Publication within Uttlesford area 26th September 18. Education trade publications to follow. Press release shared with UDC members via Members' Bulletin

Road Accidents:

An action was taken to circulate statistics relating to the locations of road accidents in Uttlesford.

Please see attached document summarising KSI's within the District:

Public Health:

An action was taken to further investigate potential ways of mitigating Public Health profile issues.

Action closed, ECC due to present in November on public health prevention.

Broadband Update:

At the meeting concerns were raised over the Gigaclear Broadband project, regarding the standard of work, lack of collaborative working with Highways when laying the cables and the fact that Gigaclear and BT were supplying broadband to the same houses. Councillor Sheldon offered to arrange a Member workshop/presentation from Gigaclear to provide an update.

ECC can confirm that:

- *ECC, Gigaclear and BT are working closely with Essex Highways to coordinate all future works.*
- *Gigaclear deployment does involve a large amount of civil work (digging), but ECC and Essex Highways are working closely with them to ensure that surfaces are properly re-instated in time (however this may be several weeks later as the ground needs to be left to settle in many cases).*
- *In some areas Gigaclear have chosen to 'overbuild' BT and vice versa – these are commercial decisions and the overbuild is not funded by subsidy from the project. It does however create competition and customer choice, which in principle is a good thing for local residents.*
- *ECC can confirm that Superfast Essex has already delivered a couple of briefing sessions, during June 18, where Parishes and impacted Members were invited to attend. However since the board meeting the Senior Programme Manager has contacted Simon Jackson at Uttlesford to see what further briefing sessions can be arranged.*

Roadside Verges:

A query was raised on roadside verges, requesting clarification on which verges are maintained by ECC.

ECC is actively exploring options for devolution of minor highway works and services to Districts/Parishes. As soon as it is clear what could be devolved (likely end September 18) ECC will communicate this with all partners.

In the meantime ECC has been provided with key contacts at Uttlesford to support ongoing dialogue. The Head of Essex Highways Commissioning will liaise direct with Ben Brown, Operations Manager, Street Services and Roger Harborough, Director, Public Services.

Significant capital investment that delivers additional capacity in schools across Uttlesford

Ongoing capital investment in Uttlesford will deliver multiple school expansion projects, not only meeting the growing demand for places across the area, but also greatly enhancing the educational offer that is available to local parents.

Essex County Council set out its long-term strategy for delivering school places within its document *Meeting the demand for school places in Essex 2018 – 2027*. This ten-year planning period will see an additional 1,631 primary and 1,930 secondary places created in Uttlesford schools. To address immediate demand within this growing District, the Council has earmarked over £11.4million for four local schools, with future investment already identified.

Elsenham CE Primary School will grow by 210 primary places (on a phased basis), which doubles its size. Originally dating back to 1863, rated 'Good' by Ofsted and consistently popular with parents, this village school will benefit from a multi-million pound scheme that delivers a modern learning environment and replaces existing temporary accommodation with permanent build, thereby enriching the educational experience of its pupils for many years to come.

Magna Carta Primary Academy in Stansted Mountfitchet has moved from its temporary home within the Peter Kirk Centre into brand new buildings next door, delivered by Essex County Council on the site of the former St Mary's CE Primary School.

Helena Romanes School has undergone a refurbishment project that allowed it to raise its Published Admission Number from 240 to 270 places. This extra capacity accommodates forecast growth in Great Dunmow over the coming years, allowing secondary-aged pupils moving in to either of the town's two major housing developments to attend a local school.

Radwinter CE Primary School has recently received an additional classbase, allowing a larger-than-usual cohort of pupils to travel through the school from the current Academic Year and thereby manage a spike in demand for places within its local area.

Cllr. Ray Gooding, Essex County Council's Cabinet Member for Education, said: "Uttlesford continues to be one of the fastest growing areas in Essex and the demand for school places is expected to continue to rise in the coming years."

"We have already earmarked over £11.4million for school projects in Uttlesford that will mitigate the immediate pressure on primary and secondary places caused by the District's growth, and are committed to ensuring that appropriate investment continues in the years to come."

"I am very pleased that work is already underway to ensure that Uttlesford children continue to be able to access high quality provision near to where they live, and that adding value to the local educational offer is at the heart of our ambition to deliver both current and future projects."

“The new places created will be crucial in helping us ensure that the vast majority of pupils continue to get a place at one of their parents’ preferred schools.”

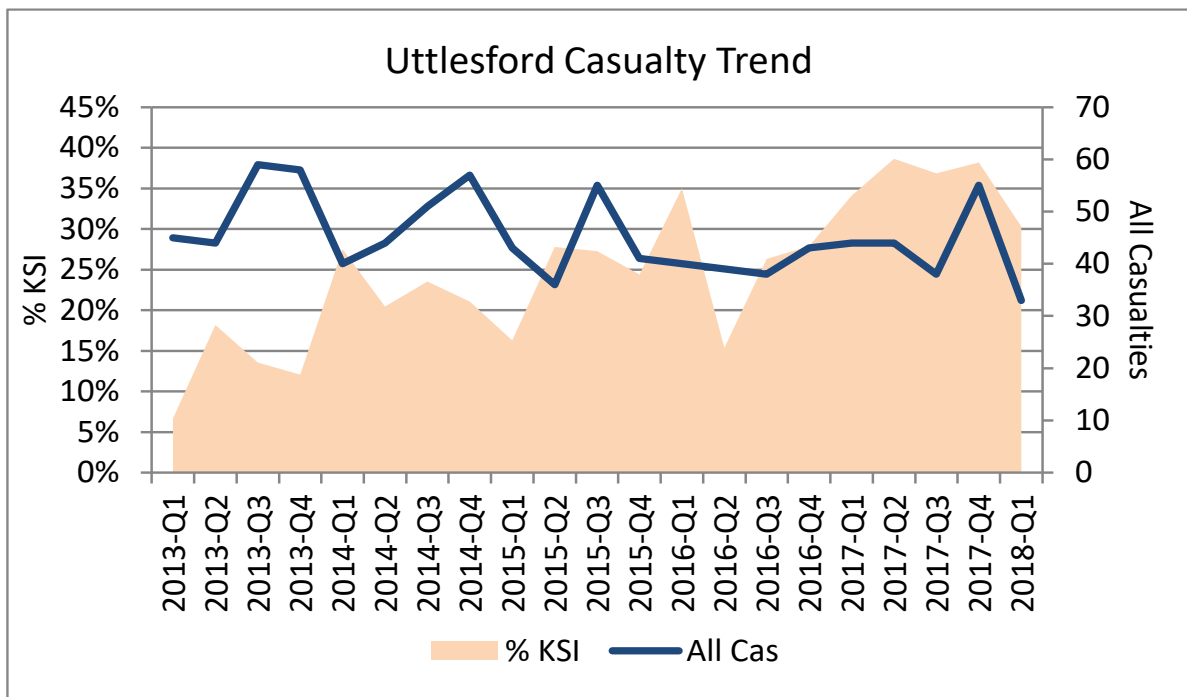

Uttlesford

Aim

This document summarises key road safety activity and casualty data for Uttlesford district within the 5 year period from 01st January 2013 until 31st March 2018.

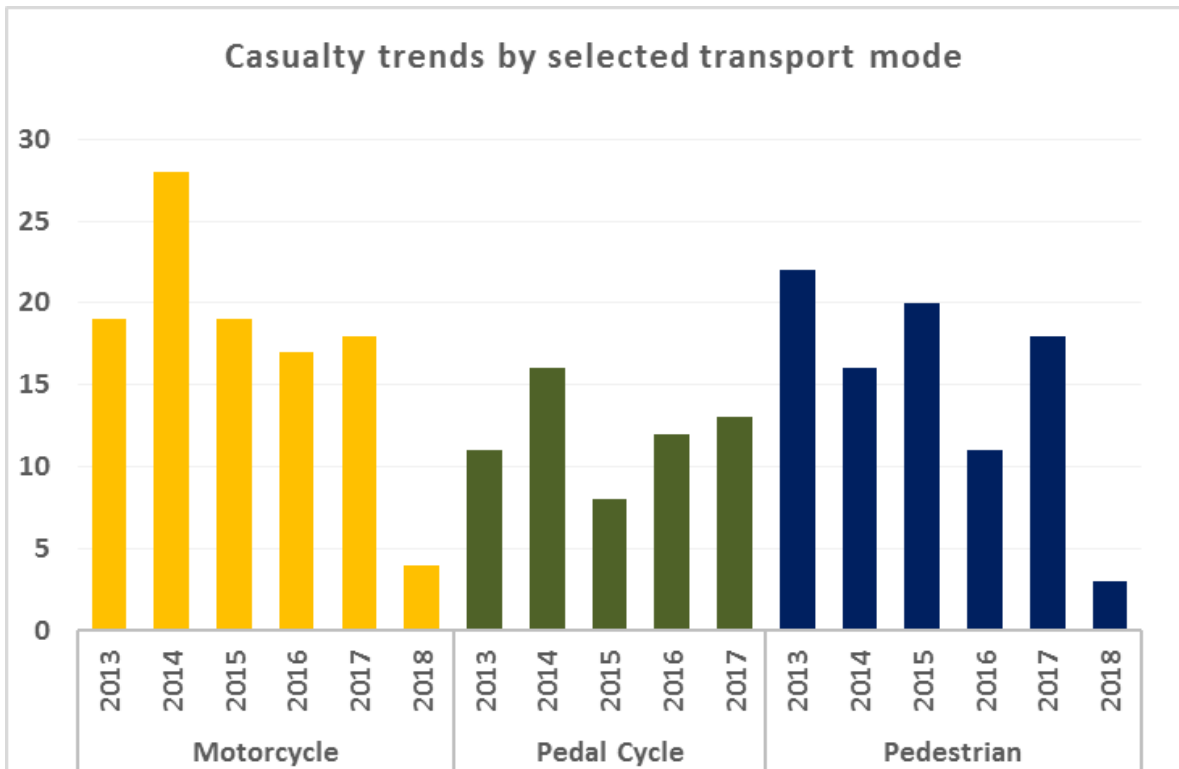

Collision & Casualty Data

All casualty severities

Overall all casualties in Uttlesford are on a downward trend, apart from a spike in the last quarter of 2017. The proportion recorded as killed or seriously injured increased and continued to increase through end of 2016 into 2017. This was due to a new Police recording system which has improved the accuracy of severity classification resulting in in some casualties which would previously have been classed as slight, now being recorded as serious. The fatalities at district level are too small in number for any meaningful trends to be apparent.

The charts below show car occupant casualty numbers in Uttelsford have remained consistent over the years 2014/15/16 with a rise in number in 2017. Other casualty user groups that could be considered vulnerable, have had a rise in 2017 in all modes, particularly pedestrians.

Young adults

In most cases people aged 16-25 are the highest risk road users, both as contributors to collisions and as casualties. The charts below show the difference in casualty-fault relationship between males and females in this group.

This shows a higher proportion of females than males were injured as passengers of the at-fault driver, however nearly half young females were primarily at fault for the collision involvement in this district. Males on the other hand have a lower proportion of at fault collision and half were attributed by strangers.

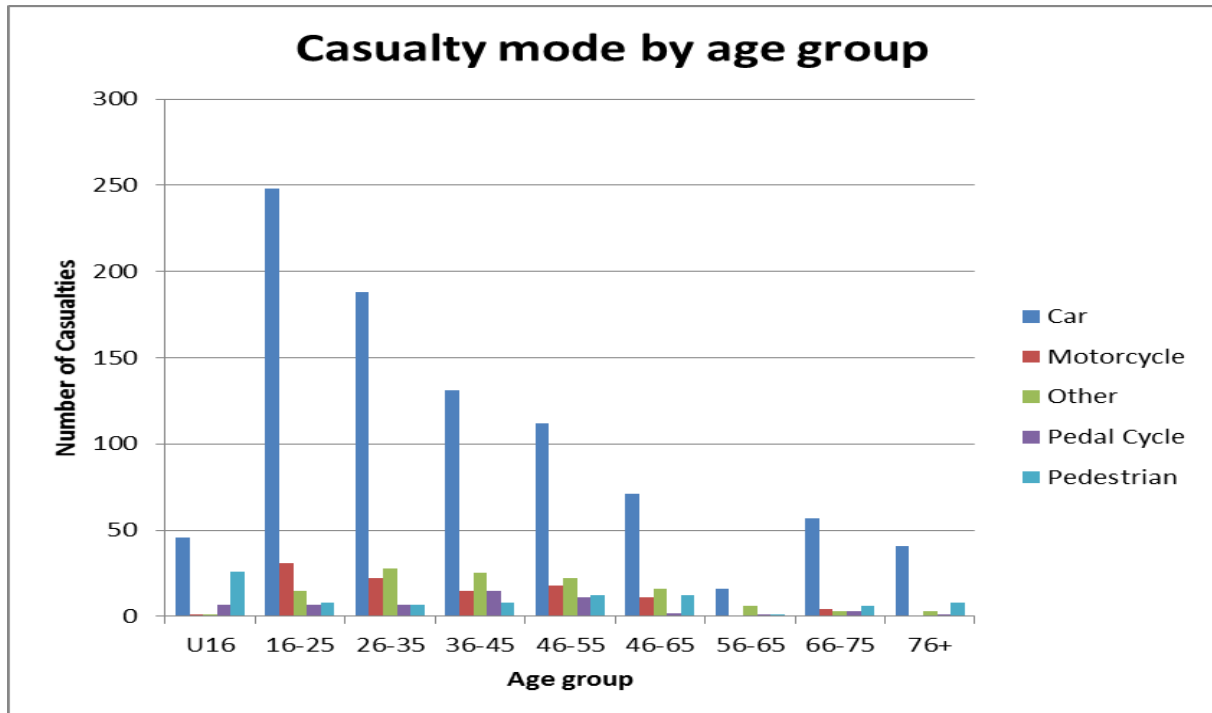

With regard to injured passengers the graph below uses data for all casualties in Essex and indicates that cars driven by 17-25 year olds are more likely to have passengers of the same age, than the 26+ age groups, which indicates that this group is more at risk. However the 26-35 age group drivers are showing similar percentages of casualties as the younger drivers.

Age groups

The below graph with the Uttlesford area data shows that the most vulnerable age group are the 16-25 year olds, particularly in cars, motorcycles within this age group are also more at risk. Within the 26-35, 36-45 and 46-55 year olds the number of casualties with other types of vehicle are also at risk, this could be business or work related, ie. Buses or Commercial vehicles.

Casualty age	Casualty Mode				
	Car	Motorcycle	Other	Pedal Cycle	Pedestrian
U16	44	1	1	7	19
16-25	233	31	15	6	8
26-35	176	20	28	7	7
36-45	126	15	24	15	8
46-55	104	18	21	12	11
56-65	84	11	22	4	13
66-75	51	4	3	3	6
76+	40	3	1	5	2
Unknown	24	2	1	5	2

Road Type

The number of collisions in the Uttlesford area has been sorted into the road class and speed limit, as the table shows the highest number of accidents happen on the motorway with national speed limit. Also showing high figures are the collisions on B roads with both 30 and 60 speed limits.

Speed Limit	Motorway	A-Road	B-Road	Unclassified
20				1
30		13	103	102
40		14	31	19
50	2	16	24	10
60	2	23	180	95
70	201	62	1	

Annual casualty totals

The data in the graph below shows the total of casualties by year and casualty class. The bars show the split with the number of casualties by severity. In 2013 the number of slight injuries were higher than subsequent years, however the number of serious casualties have risen in all modes in later years. The total number of fatal casualties for the 5 year period was 12.

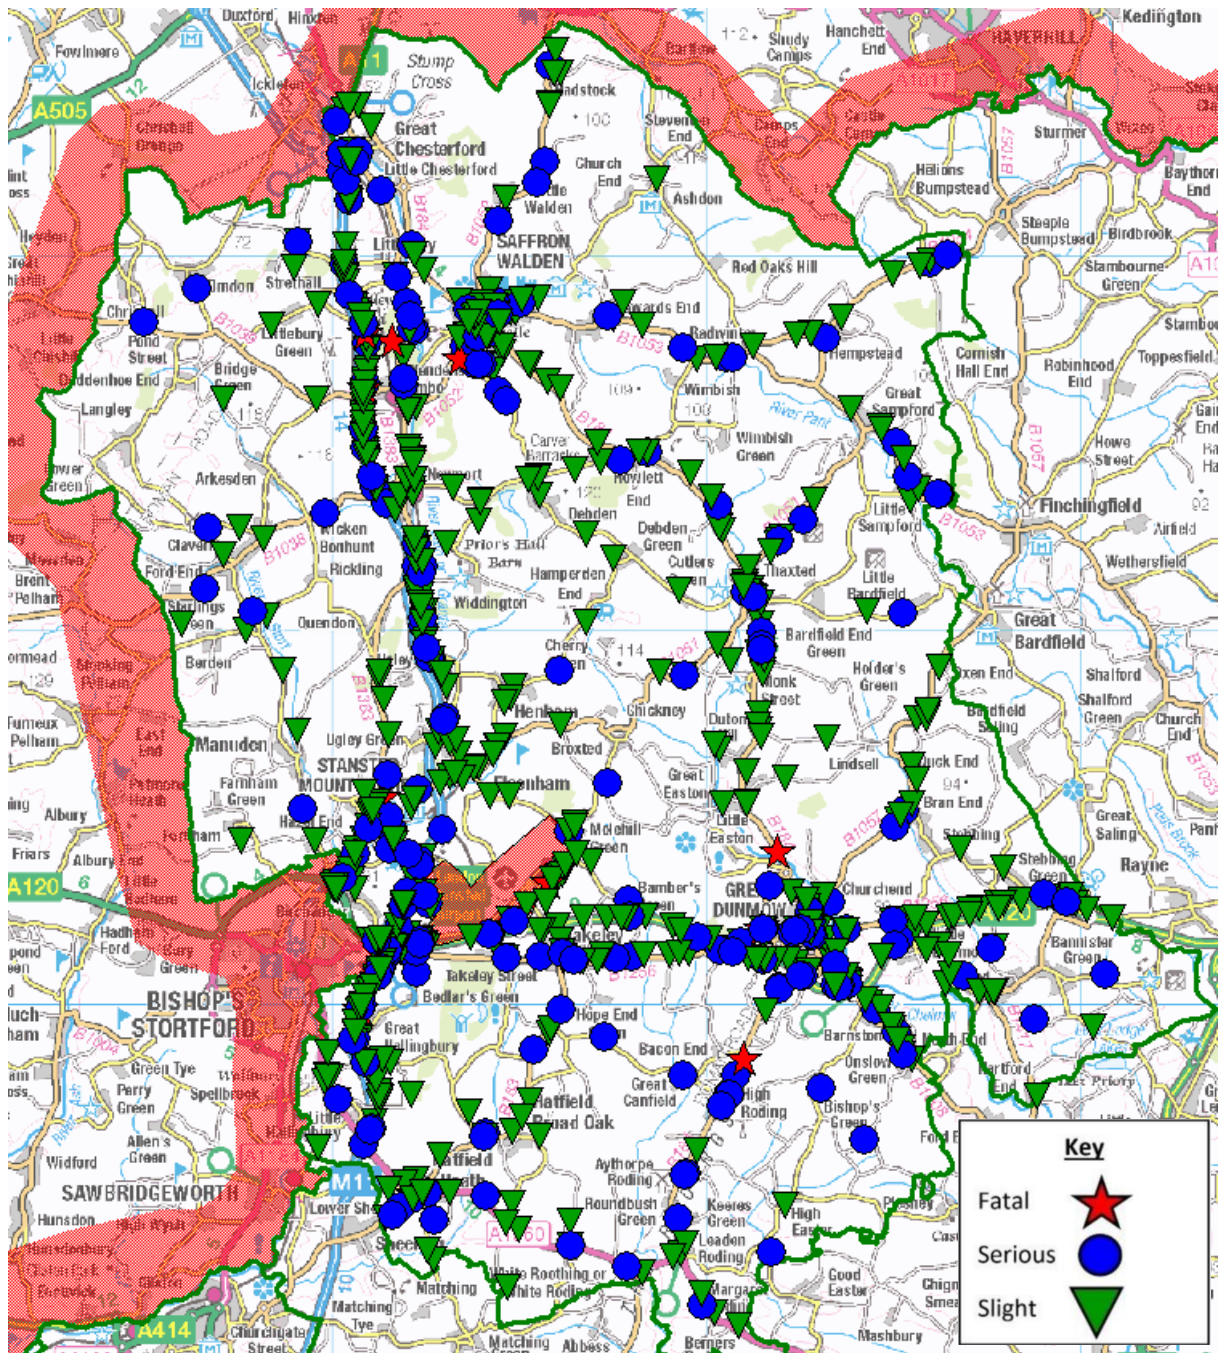

LOCAL PROFILE

12 months to April...		2014	2015	2016	2017	2018

Public Health in **UTTLESFORD**

Mike Gogarty, DPH

Summary of Health and Wellbeing

- Uttlesford is one of the 20% least deprived districts/unitary authorities in England. All the District areas are in upper 3 quintiles nationally.
- However 7% (1,000) of children live in low income families.
- Life expectancy for both men and women is higher than the England average.
- Life expectancy is not significantly different for people in the most deprived areas of Uttlesford than in the least deprived areas. 2.1 years & 0.6 years for males and females respectively.
- Uttlesford performs well in all IMD domains except barriers to services and housing
- Overall IMD score has slightly worsened since 2010
- This is driven by increases in crime and deterioration in Living Environment score
- Health and income scores relatively improved but education declined.

IMD trend 2010 to 2015

	Indicator names	Period	Local count	Local value	Eng value	Eng worst		Eng best
Life expectancy and causes of death	1 Life expectancy at birth (Male)	2014 - 16	n/a	81.7	79.5	74.2		83.7
	2 Life expectancy at birth (Female)	2014 - 16	n/a	84.2	83.1	79.4		86.8
	3 Under 75 mortality rate: all causes	2014 - 16	636	273.9	333.8	545.7		215.2

Diabetes diagnoses (aged 17+) - Uttlesford

Violent crime (violence offences) - Uttlesford

Employment rate (aged 16-64) - Uttlesford

Areas to Explore

- Obesity and overweight in children and adults
- Cancer Deaths Under 75 years of age
- Excess Winter Deaths
- Killed and Seriously Injured on Roads
- Excess Winter Deaths
- Hip Fractures
- Alcohol Admissions in Young People
- Drug issues
- Air Pollution

Obese children (aged 10-11) - Uttlesford

NCMP Childhood obesity

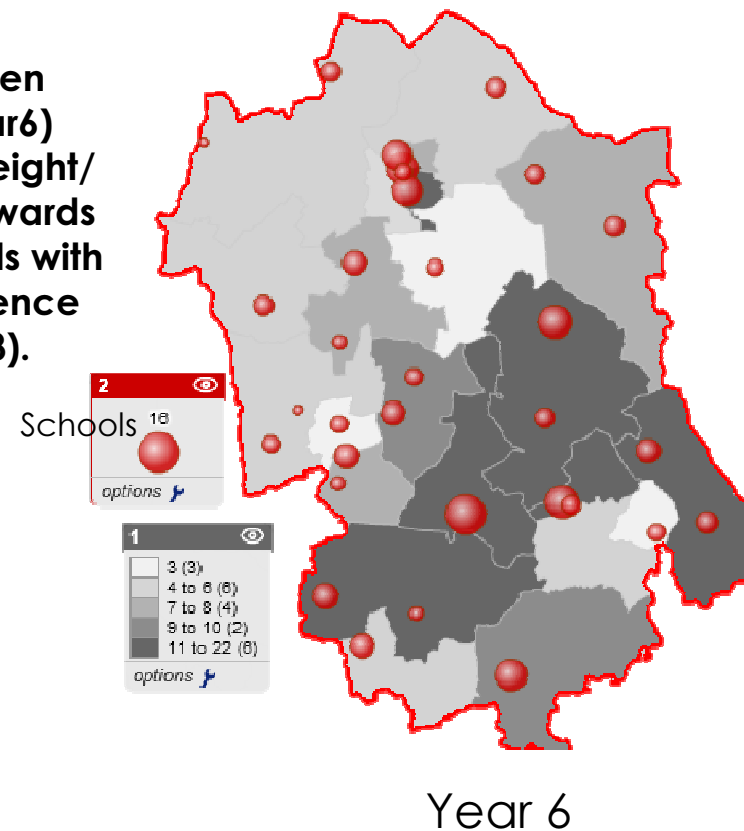

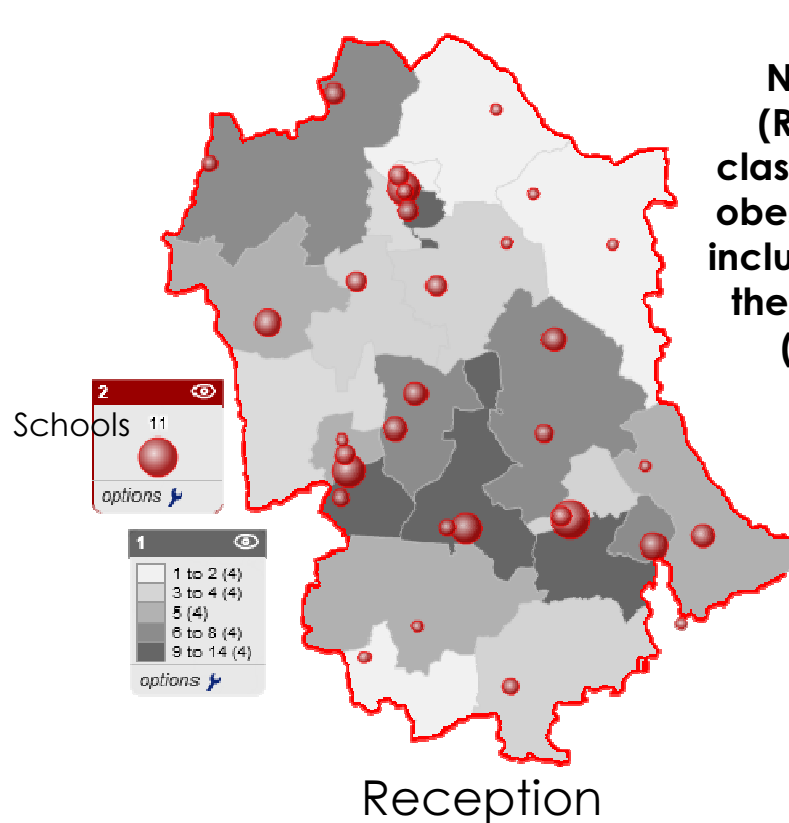

Number of children (Reception & Year6) classified as overweight/obese in Uttlesford 2016/17 - 2017-18).

Reception			
year	Overweight	Overweight/ Obese	Underweight
16/17	71	108	6
17/18	82	112	10

Year 6			
year	Overweight	Overweight/ Obese	underweight
16/17	120	182	9
17/18	84	172	15

Page 28

Number of children (Reception & Year6) classified as overweight/obese in Uttlesford wards including the schools with the highest prevalence (data 2017-2018).

Excess weight in adults (aged 18+) - Uttlesford

Recent trend: -

Period		Count	Value	Lower CI	Upper CI	East of England	England
2015/16	●	-	57.2	52.4	62.3	61.7	61.3
2016/17	●	-	55.3	50.3	60.7	61.9	61.3

Source: Public Health England (based on Active Lives survey, Sport England)

Action to tackle Obesity

- Working with Active Essex and further partners to introduce new opportunities for people to be active in their communities via the Active Uttlesford Network – funded projects are listed on Uttlesford H&W Board's delivery plan and infographic.
- A local food partnership to focus on healthy eating and sustainability – scoping work underway. Currently focusing on resources to manage this project going forward.
- Shift to community led weight management opportunities – weekly weigh-ins offered at UDC offices, Uttlesford Community Hub, 1Life Leisure centres
- Encouraging Daily Mile in local schools
- Sport England Local delivery pilot opportunity

Cancer Deaths Under 75 years of age

Under 75 mortality rate: cancer - Uttlesford

Smoking prevalence in adults (aged 18+) - Uttlesford

Smoking prevalence: routine and manual occupations - Uttlesford

Cancer diagnosed at early stage - Uttlesford

Cancer Deaths Under 75 years of age

- Uttlesford does not have a problem compared to other areas but can none the less take action to improve health further. The action is heightening of the things we are doing~, addressing smoking, weight management, inactivity and alcohol consumption.
- Emphasis on including women and those in areas of deprivation in this prevention work. Alongside this continued public awareness of warning signs of early cancer and good primary and secondary care services are needed to maintain or improve cancer detection and management at an early stage.

Killed and Seriously Injured on The Roads

Recent trend: –

Period	Count	Value	Lower CI	Upper CI	East of England	England
2009 - 11	141	59.8	50.3	70.5	44.1	41.9
2010 - 12	150	62.5	52.9	73.3	42.2	40.5
2011 - 13	137	56.2	47.2	66.4	40.9	39.7
2012 - 14	126	50.8	42.3	60.5	40.5	39.3
2013 - 15	122	48.4	40.2	57.8	39.6	38.5
2014 - 16	141	55.2	46.5	65.1	42.3	39.7

Source: Department for Transport

Harlow	80	31.2

Source: Department for Transport

- Rate is statistically significantly greater than that of England.
- Uttlesford ranks third relative to all districts in Essex.
- In 2017, 5 people were killed compared to 0 the 2016 and 24 more people were seriously injured on roads.
- In 2017, 5 children were KSI, the same number for both 2015/16 combined.

- Denominator is local population
- Numerator is people in accidents in the area
- Trend has been down but not this year
- Rural areas and Motorway
- Speed watch
- Police enforcement
- Difficult

Excess winter deaths

Harlow	64	9.3
Brentwood	52	6.9
Rochford	48	6.3

Source: Office for National Statistics: Public Health England Annual Births and Mortality Extracts

Excess winter deaths has always been a concerning issue in Uttlesford. Deaths have always been higher than the national average. Recent years indicate an poor trend and a statistically similar index to Essex and national figures having been worse in between 2011-14. Uttlesford ranks in the top place of all districts in Essex EWD.

Age Profile
ONS Mid-year population estimates 2016

Action to Address Winter Warmth Issues

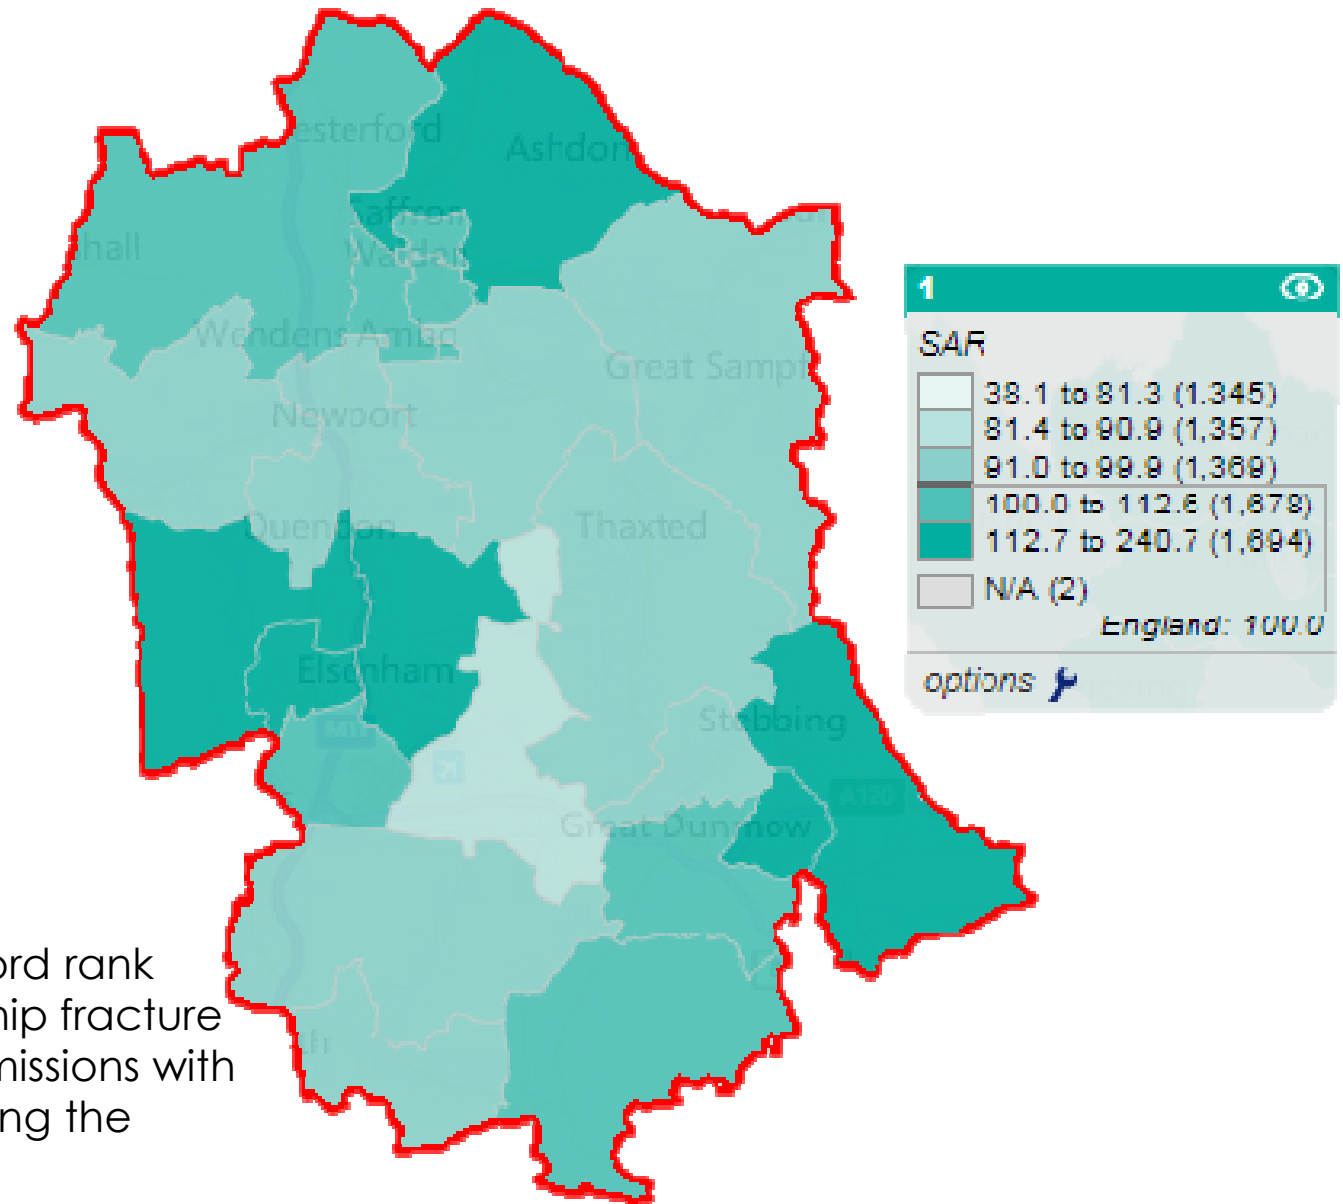

Uttlesford CAB:

- Winter warmth advice and support via CAB and UDC Environmental Health Team.
- 'Snow Patrol' project with young sixth form student at SWCHS – starting a social media campaign to encourage young people to help with clearing paths etc. when/if it snows.
- Targeted letter mail-out to c.300 homes in October using BRE data to houses flagged with fuel poverty/excess cold hazards. Hotline and home-visit offered to advise people on the support that might be available to them (project funded by WE CCG)
- All projects are reported back to Uttlesford H&W Board.

Hip fractures in older people (aged 65+) - Uttlesford

Emergency hospital admissions for hip fractures, persons aged 65+, standardised admission ratio, 2011/12-2015/16
Source: Hospital Episode Statistics (HES)

- .
- 13 of 22 wards in Uttlesford rank higher than England in hip fracture related emergency admissions with Felsted & Stebbing scoring the highest.

Action to Prevent Falls

- West Essex Falls Service – offer strength and balance at home and group sessions Thursday afternoons at SW Hospital, based on the Otago method.
- Seated chair exercises in sheltered schemes (delivered by sheltered housing officers) – 5 classes per week across the district's schemes.
- UDC Health Improvement Officer delivers a community seated exercise class within Thaxted every other Thursday. Looking into the potential to train a volunteer in the South of the district to deliver the same within other parts of the district.
- Exercise referral via 1Life including specialist classes.
- Promotion of volunteer-led walking for health schemes across Uttlesford (a Walking Guide provide information to the public). Also recently funded a walking activity for people with sensory loss, their families and carers.
- Handyman repairs service – hand rails etc. (via Environmental Health).
- CVSU Gardening project funded by Uttlesford H&W Board – reducing trip hazards in the garden.

Alcohol-specific hospital stays (under 18s) - Uttlesford

Alcohol Related Hospital Admissions (under 18s):

- We continue to push for the roll out of Risk Avert across schools which address risk taking behaviours including sensible and appropriate drinking and associated risks~ currently in
 - Joyce Frankland Academy, Newport
 - The Helena Romanes School and Sixth Form Centre
 - Forest Hall School
- We continue to commission an All Age substance misuse treatment and Recovery System
- We continue to fund the provision of Alcohol Liaison Nurse Service in all Essex Hospitals
- We continue to fund the provision of Alcohol A&E Liaison function in all Essex Hospitals
- We are currently preparing the re-procurement of the non-medical specialist Alcohol services across Essex

Drug Related Street Crime in Essex 2014/15 - 2017/18

Source: data.police.uk

Drug Related Crime

- Approximately 50% of the Uttlesford 'Drug offences' are within Stansted Airport (which you might have already presumed, given the high footfall and police presence), whereby many possession offences are usually discovered as people try to conceal small amounts of drugs for personal use departing or arriving on holiday during central search.
- 64% of all 'Drug offences' in Uttlesford are for possession of cannabis for personal use, similar to the average for Essex Police force area.
- Personal possession overall accounts for 89% of 'Drug offences' in Uttlesford, with powder cocaine being the most commonly discovered substance after cannabis.
- There are fewer than 10 opiate related 'Drug offences' within the police crime data for Uttlesford - that is not to say there is no opiate misuse and/or related offending in Uttlesford, just that this is not something that is well captured in this type of data.
- There has been an increase in recorded 'Drug offences' discovered by police at Stansted for consecutive years.
- But similarly, there has also been a rise in the number of passengers using the Airport, surpassing 27 million in the last 12-months

Drug Related Crime

- PH currently leading work with partners on the development and implementation of the Gangs, Violence and Vulnerability (GVV) Framework data project as part of the Essex Data Platform programme of work and will provide a tool that will enhance understanding of the local impact of gangs and exploitation on particular areas and vulnerable people in order to target enforcement and resources to tackle related issues.
- It will also provide a predictive capability to enable more targeted early intervention and prevention. The programme or work is nearing the point where a product will be available for localities to view and use.
- Public Health are working with The Office of the Police Fire and Crime Commissioner, Essex Police, Essex Community Rehabilitation Company, National Probation Service (Essex) and other key stakeholders to develop an approach to identifying and managing the most impactful offenders across Essex.
- Approach will seek to look at crime and associated social function issues which contribute to crime and disorder and develop a multi-agency approach to managing these offenders. Chelmsford Pilot managing the top 10 most difficult offenders where co-presenting issues have included substance misuse and homelessness has seen offending, homelessness and drug use reduce and overall quality of life improve for the identified individuals. The model will cover the whole of Essex

Drug Related Crime

- Public Health are leading the commissioning of an Integrated Health and Justice system of care and support for offenders and individuals at the edge of offending related crisis in Essex. This has seen:
 - Launch of the Offenders with Complex and Additional Needs Service operating across Essex (incl. inside HMP Chelmsford) and care managing individuals engaged with the criminal justice system into the appropriate healthcare and support
 - An Integrated Health and Justice Service (bringing together Street Triage, Police Custody Healthcare and Police Custody and Court based Liaison and Diversion Services into one service). This new integrated service aims to identify offenders and those at the edge of offending and where appropriate divert them into more effective interventions to prevent offending/re-offending.

Fraction of deaths attributable to air pollution, East of England districts (Uttlesford highlighted), 2016

Source: Public Health Outcomes

Air Pollution

- In the East of England as a whole 5.4% of deaths are attributable to human generated air pollution (Public Health Outcomes Framework, 2016 data). Uttlesford is a shade better at 5.2%
- In short air quality is a significant contributor to ill health in Uttlesford but a little less so than the East of England (and Essex) as a whole.
- The district council monitor pollutants throughout the district and generally air quality is good, however the centre of Saffron Walden is designated as an Air Quality Management Area largely due to traffic congestion in the narrow streets. An Action Plan has been developed to address exceedances of national objectives for nitrogen dioxide, including working with Essex Highways to improve junction capacity and ease the flow of traffic, measures to persuade people to travel by means other than single occupancy car trips, and increasing proportions of low emission vehicles in the town.
- Measures to improve air quality have to be balanced against the need for new development, and mitigation measures are sought to ensure there is no worsening of the air quality
- Expansion of Stansted Airport to its current permitted passenger throughput will add to traffic on major and local roads in the district, and the impact on air quality is a material consideration in the current planning application to expand the airport further

Children and Families

SEND in Uttlesford: profile and implications

Uttlesford Locality Board meeting- 5th November 2018 County Hall

Chris O'Nions –SEND Quadrant Manager- West Essex

Essex County Council

Objectives

For members to-

Have factual data on the current profile of SEND in Uttlesford.

Have comparison points in key areas of the profile to see trend data

Have awareness of the some of the key implications of this profile on places, transport and budget.

Current SEND Data compared to 2017

	2017	2018-up to 30/10/18	% difference +/-	Projection to 31/12/18
Number of EHCPs	342	383	+12	391 = +14
Number of EHCNA requests	72	68	-6	82 = + 14
Number of EHCNA requests declined	34	32	-6	38 = +12

Current profile of EHCPs by Category of Need

	ASC	SI	C&L	P	MSI	SEMH	SLCN	SpLD
N	111	18	91	23	3	61	62	14

- Key**
- ASC –Autistic Spectrum Condition
 - SI –Sensory Impairment
 - C&L –Cognition and Learning
 - P – Physical
 - MSI – Multi Sensory Impairment
 - SEMH – Social, Emotional and Mental Health
 - SLCN –Speech, Language and Communication
 - SpLD- Specific Literacy Difficulty (Dyslexia)

Most recent EHCP's with CoN

	ASC	SI	C&L	P	MSI	SEMH	SLCN	SpLD
N	10	8	3	1	1	13	4	1

Page 56

Taking the overall data we can see the following are key demand areas of SEND-

ASC =29% of overall EHCPs

C&L = 24% of overall EHCPs

SLCN and SEMH = 16% each of overall EHCPs

Nationally C&L is the highest category of need with ASC 2nd and SEMH 3rd

Percentage of students schooled in home district

Basildon	66.1%
Braintree	67.8%
Brentwood	66.5%
Castle Point	73.9%
Chelmsford	80.2%
Colchester	75.0%
Epping Forest	58.4%
Harlow	78.1%
Maldon	37.9%
Rochford	50.4%
Tendring	78.3%
Uttlesford	48.8%

Average distance to school (km)

Basildon	7.1
Braintree	11.3
Brentwood	8.1
Castle Point	6.6
Chelmsford	7.9
Colchester	10.4
Epping Forest	9.9
Harlow	7.8
Maldon	15.7
Rochford	7.1
Tendring	15.3
Uttlesford	18.0

Students in OOA provisions

- Currently there are 25 high costs students with EHCPs attending a provision, primarily in another authority. Often these are independent, non-maintained specialist provisions. Some of these I/NM provisions are within Essex.
- The total cost of these placements is £ 1, 975,731.00 per annum. This gives an average cost of £79,000.

	Dorset	Herts	Camb	Lincs	Essex	West Sussex	Surrey	Salop	Hamps	Rutland
N	1	6	4	2	5	1	2	1	2	1

Summary

- Numbers of EHCPs and requests for same are increasing at roughly 12-14%
- ASC is the most common CoN for those with an EHCP- 29%
- Second lowest percentage of students educated in their home district
- Students travel further to school than in any other part of Essex- 18km on average
- Essex spends nearly £2 million educating 25 students in specialist provision outwith their locality- predominantly in non-Essex provisions
- Developing an ASC hub for secondary aged students is being discussed.

5 November Locality Board – UDC Response to Presentation at 9th July Locality Board by David Hill on Economic Growth

How do we attract more of the high value business cluster around Cambridge southwards into Essex?

- Undertake promotional events such as the recent MIPIM conference in London promoting North Essex as a whole
- Undertake local marketing activities generally such as the forthcoming Business Breakfast focussing on digital innovation
- Continue to provide business rate relief – this was successful in helping to attract one research business to Chesterford Research Park from the Cambridge Science Park
- Promote Chesterford Research Park extensively including the availability of land at the park with outline planning permission
- Continue to network with relevant business groups in Cambridge for example through our membership of Cambridge CleanTech
- Continue to work closely with Invest Essex

What are the key sectors we should aim to support in Uttlesford, and what do they need?

- UDC Corporate Economic Development Strategy focusses on the following priorities:

Priority One – Key sectors include Visitor economy (including town centres), Rural economy and Life sciences, research and innovation sector

Priority Two – London Stansted Airport location

Priority Three – Proposed Garden Communities

Priority Four – Connectivity including Digital connectivity and Transport
- They need capacity for growth i.e. land, communications technology and access to skills. This is encompassed by the Local Plan allocations at Chesterford Research Park and Northside airport employment area as well as the garden communities.

How do we maximise the potential of the Innovation Corridor – eg linking economic opportunities in Uttlesford with Harlow?

- Continue our Duty to Cooperate activities in the Innovation Corridor running from London to Cambridge and Peterborough

- Develop a long term vision, facilitated by the LSCC, for “Middle Earth”, a place making agenda that looks across LEP boundaries
- Continue our support of the Digital Innovation Zone comprising public and private sector partners across Harlow, East Herts and Epping Forest
- Potential investment in the Northside strategic land allocation at Stansted Airport

Do we have a shared view of future economic governance across the sub-region – eg around LEPS?

- Recognition of the need for a steering group of senior members to develop a vision and plans

What are the best opportunities for us to collaborate around long-term commercial investments / strategic land acquisitions?

- Chesterford Research Park (30ha additional allocation), Northside at Stansted (50ha additional allocation)
- North Uttlesford GC, Easton Park GC and West of Braintree GC - opportunities for employment land allocations in the masterplanning
- Potential opportunity to attract a significant research institution to Chesterford Research Park

How do we best work together to facilitate well-planned housing growth and infrastructure?

- Consider the possibility closer joint working in the future
- A joint strategic plan in the future could address strategic issues along the corridor and form a powerful mechanism for securing infrastructure funding allocations.
