Appendix A: Study Area Plan

Appendix B: NEMS Household Survey Results

Appendix C: Statistical Tables

Appendix D: Town Centre Composition Plans

1 Executive Summary

- 1.1 This Study has been produced by Nexus Planning in support of Uttlesford District Council's emerging Local Plan. It examines the latest retail trends, and draws on empirical research in order to advise the Council on an appropriate policy basis for the plan period to 2040.
- 1.2 The Study incorporates a series of health-checks across the District's four main centres of Saffron Walden, Great Dunmow, Stansted Mountfitchet and Thaxted. It also incorporates the findings of a household telephone survey of 1,002 households. The survey findings enable a detailed assessment of current shopping patterns, as well as a qualitative assessment of the strengths and weaknesses of each centre.
- 1.3 The Study concludes that, broadly speaking, the centres of the District are in reasonably good health. It also shows that the District has retained a broadly similar percentage of its own residents spending since the last surveys were carried out in 2016. This means that there is little evidence of any increase in 'leakage' to destinations elsewhere. What is evident though, is that there has been some switching away from town centre destinations in the District, to out-of-centre destinations in the District, particularly in Saffron Walden.
- 1.4 The Study concludes that there is quantitative capacity for new convenience goods floorspace in the District. This is largely as a result of the over-trade of existing foodstores. The Study concludes that the Council may wish to consider a further foodstore in Great Dunmow to meet this identified capacity. Importantly though, any proposals should follow the sequential test and notwithstanding the capacity identified, applicants would need to provide justification for the impact of the proposals on existing centres in line with both local and national guidance.
- 1.5 The Study finds very limited capacity for comparison goods floorspace, and only then, towards the end of the Plan period.
- 1.6 Drawing on the findings of the Study, a series of recommendations are provided for meeting growth, preparing development management policy, and monitoring retail health.

2 Introduction

Instruction

- 2.1 Nexus Planning (Nexus), alongside NEMS Market Research (NEMS), were commissioned by Uttlesford District Council in July 2021 to produce a Retail Capacity Study for the District. The Council are currently preparing the Local Plan for the plan period up to 2040. As such, this 2021 Study will form part of the evidence base upon which the emerging Local Plan will be based.
- 2.2 The approach adopted by Nexus and the project team has been refined to reflect the latest Government guidance provided in the National Planning Policy Framework (NPPF) (July 2021), Planning Practice Guidance (PPG), and the Use Classes Order (2020 amendments).
- 2.3 Accordingly, a fundamental objective of the Study is to produce a NPPF and NPPG compliant Study, which provides the Council with an up-to-date objective assessment of retail needs and provision, the health of Saffron Walden, Great Dunmow, Stansted Mountfitchet and Thaxted, and a consideration of possible strategic policy responses to any prevalent or emerging issues in those centres.

Scope of Works

- 2.4 The tender specification identifies the following key elements to be completed as part of the Study:
 - Updated assessment of the latest retail trends and the impacts of these;
 - A review of the latest government policy on retail and other town centre uses, as well as previous relevant studies;
 - Retail capacity assessment, including:
 - Undertaking primary research in the form of a consumer survey (household telephone survey);
 - Consideration of shopping patterns and market share analysis, (including how these may have changed since the 2018 Retail Study);
 - Assessment of the retail performance of the District's centres in the context of the wider sub-region and the influence of competing centres; and

- A consideration of food and beverage spending.
- Health check assessments, in line with the requirements of the PPG, including an assessment
 of the following:
 - Ground floor town centre composition surveys;
 - Strengths, weaknesses, opportunities and threats for retaining and encouraging footfall and commercial sustainability;
 - The town centre offer, including the range of multiple retailers, independent retailers,
 services, facilities and attractions compared to its competitors;
 - The physical appearance, public realm, image and environment;
 - The ease of access (including car parking) and legibility by different transport modes and by people of different ages and abilities;
 - o The levels of customer service and the overall customer experience/expectations; and
 - The barriers that would need to be addressed in order to facilitate improved economic conditions.
- Policy recommendations, including the following:
 - Provision of advice on options to meet floorspace requirements and accommodating growth;
 - o Provision of advice on existing retail policies; and
 - o Provision of advice on future retail monitoring.
- 2.5 The project team has worked with officers of the Council and reported the initial findings during the Study process, and in this report we set out the assessment and key findings as a consolidated report.
- 2.6 Neighbouring authorities have been consulted under the Duty to Co-operate in the early stages of this Study.
- 2.7 In working through the scope of works, the project team have been mindful of the impact of the Covid-19. While the Study was undertaken and drafted subsequent to any major lockdown or restrictions, the reality is that the impacts of the pandemic are still materialising. References to

temporary closures of various retail facilities may have changed following publication, particularly as Government legislation responds to the constantly evolving picture presented by the pandemic.

Remainder of Report

- 2.8 In addressing the above scope of works, this report is comprised of the following chapters:
 - **Chapter 3** provides an assessment of the latest retail and other town centre uses trends and the impacts of these;
 - **Chapter 4** sets the policy context for the study, including providing a review of the latest government policy on retail and other town centre uses and town centres;
 - Chapter 5 provides a summary of the retail capacity projections for the District;
 - **Chapter 6** sets out a health check assessment of each of the main centres within the District; and
 - Chapter 7 sets out our policy recommendations.

3 Retail Trends

Introduction

- 3.1 In order to provide a context for this Study and help identify the sectors that are more likely to be the subject of additional development proposals, we provide an overview of current retail trends below. In reading the review, it should be noted that the retail sector is dynamic and, whilst online shopping has impacted on the retail sector, new retailers and new formats continue to evolve to meet shoppers' needs.
- 3.2 The commentary should therefore be taken as a 'snapshot' in respect of current market conditions; it will be necessary to judge future development proposals for main town centre uses with reference to the prevailing conditions at the time of a proposal's determination. This is particularly the case given the current commercial circumstances arising from the Covid-19 pandemic, and the impact of the lockdown measures on our high streets and operators (both local and nationally). We reflect on this in more detail below.

The Current State of the UK Economy

- 3.3 The UK economy has experienced a significant shock over the past 18 months as a result of the Covid19 pandemic and subsequent restrictions on movement and behaviour which have sought to mitigate
 its impact. This uncertain background has caused business investment and expenditure to decline.
 Household spending fell by over 20% quarter-on-quarter in the second quarter of 2020 following the
 imposition of national lockdown measures. This is the largest quarterly contraction on record. Retail
 sales volumes also suffered double-digit falls in April 2020 as all but essential stores closed during
 the height of the lockdown.
- 3.4 However, as a result of the gradual reopening of businesses over summer 2020, the economy returned to growth, with this gathering momentum as a greater number of sectors reopened, including hospitality and leisure services followed by the full reopening of schools. A more pronounced resurgence in the number of case of Covid-19 resulted in the Government reinstating a nationwide lockdown in early 2021.

- 3.5 In October 2020, Experian published its Retail Planner Briefing Note 18 ('ERPBN18'), which provides comprehensive and up-to-date information on retail developments and short, medium and long term forecasts for retail planning decisions.
- 3.6 ERPBN18 sets out Experian's best estimate of the retail sector and future changes in expenditure at the time of its publication. Experian anticipates that the post-Covid-19 recovery will be subdued over the coming months and that the economy will not recover to pre-Covid levels until at least 2022. In this regard, Experian consider that due to the unprecedented nature of the global pandemic, there is great uncertainty over the scale and duration of the outbreak and the resulting economic consequences. An orderly transition and adjustment to a new trading relationship resulting from Brexit is also assumed, and any uncertainty arising from this is likely to further weigh on the economy.
- 3.7 Although the medium term outlook for GDP will be shaped by the course of the pandemic, the long term outlook for GDP remains unchanged, with growth expected to remain below historic averages due to slower population rises and productivity.
- 3.8 The overall retail sales are projected to be volatile in the near term, but growth is less impacted over the medium and longer terms. The outlook for special forms of trading (i.e. internet sales, mail order) has been revised upwards. The prospects for retail floorspace has been revised down in line with weaker projections for spending and stronger projections for internet sales.
- 3.9 In terms of inflation, Office for National Statistics data¹ indicates that the rate of inflation (as measured by the consumer price index) increased from 0.5% at June 2016 to a high of 3.1% at November 2017, before reducing to 0.6% at December 2020. The rate of inflation in 2021 has then increased back up to 2.4% in June 2021. Retail has been an industry under significant stress, as many retailers find themselves squeezed between rising costs and the increasing volume of sales over the internet. This has of course, been pressurised further with the impact of the Covid-19 pandemic.
- 3.10 There will still be the need and demand for physical stores, despite the increase in shopping online. This is particularly the case for convenience sales in light of the fact that the online shopping orders are still, in the majority, being picked from shelves in physical stores. In terms of comparison shopping, there will also still be the requirement for physical stores as shoppers enjoy the experience of viewing items in person, but this shopping experience will need to evolve and diversify, and seek to engage shoppers at a level which has not been explored before.

¹ ONS 'Consumer price inflation tables' dataset, May 2021

- 3.11 In terms of the grocery market, the ONS² reports that the food and non-alcoholic beverage inflation rate as of May 2021 was -1.3% when compared to 12 months previous, with the inflation rate on alcoholic beverages and tobacco was 1.7% when compared to 12 months previous.
- 3.12 The long-term impacts of this period are yet to be determined, and as such it is almost impossible to predict with any meaningful certainty what effects short-term business closures and significantly reduced levels of activity will have.
- 3.13 However, as may be expected, ONS³ has reported that retailers which predominantly rely on customers visiting their stores recorded a big drop after they were ordered to close their doors. Dispensing chemists sold consistently more since the pandemic began than they did before, with their sales increasing strongly in March 2020, and continued to grow in June even after restrictions were eased and other non-essential stores were allowed to reopen. Non-specialised foodstores, which include supermarkets, also traded consistently above their pre-pandemic levels. However, for furniture retailers, customers returned in the summer with trade returning to pre-pandemic levels and growing further, boosted by people still spending more time at home than they used to.
- 3.14 In terms of online retailing, ONS has reported "...online sales reaching higher than usual levels over the course of the pandemic". Although these levels dropped off after shops reopened in June, the proportion of online retailing began to increase in October and continued to do so into November following the reintroduction of lockdown measures. However, with the gradual reopening of the economy in Spring/Summer 2021, ONS has reported a decrease in the overall proportion of retail spending online.

Available Expenditure and the Impact of the Internet

3.15 Experian forecasts fairly turbulent growth in per capita convenience and comparison goods expenditure over the short term. In this regard, Experian forecasts that per capita expenditure growth in the convenience goods sector will increase substantially to 8.4% at 2020 (from -0.9% at 2019), with this growth largely attributed to consumers spending more on such goods as a result of lockdown measures. However, Experian forecasts a 6.2% decrease in per capita expenditure growth in 2021, with very limited forecast growth thereafter.

² ONS 'Detailed Figures by Division' dataset, May 2021

³ ONS analysis titled 'The impact of the coronavirus so far: the industries that struggled or recovered', published on www.ons.gov.uk on 9 December 2020

goods

3.16 As Figure 1 indicates, forecast increases in comparison goods spending are more optimistic following a substantial decrease of 8.5% in 2020, but it is evident that per capita comparison goods expenditure increases going forward will be below the level apparent at the turn of the millennium. Experian identifies that per capita comparison goods expenditure growth dropped from 5.4% at 2017 to 3.4% at 2018, and forecasts that it will remain between 2.9% to 3.0% per annum in the medium to long term. The exception to this is the decrease noted above in 2020, which is largely a result of lockdown measures closing all but essential stores, and an anticipated growth of 6.5% in per capita expenditure in 2021 under the expectation that lockdown measures will be gradually eased and expenditure will pick up (as has occurred).

Figure 1. Experian's Identified and Forecast Convenience and Comparison Goods Per Capita Expenditure Growth

Volume 2023-2028-**Growth Per** 2016 2017 2018 2019 2020 2021 2022 27 40 Head (%) Convenience 3.3 1.9 1.0 -0.9 8.4 -6.2 0.2 0.0 0.1 goods Comparison 4.8 5.4 3.4 4.3 -8.5 6.5 3.8 3.0 2.9

Source: Figure 1a and Figure 1b of Experian Retail Planner Briefing Note 18

- 3.17 Whilst the above figures relate to a level of growth which is significantly below that which has historically been available to retailers, the situation for high street stores is exacerbated through the increasing amount of expenditure which is committed through special forms of trading⁴ and, in particular, online.
- 3.18 In this regard, Appendix 3 of ERPBN18 indicates that special forms of trading accounted for just under 27% of total retail sales at 2020 as a consequence of Covid-19 and subsequent to very strong growth in online retailing over the past decade. Although the growth in special forms of trading is anticipated to drop back slightly in 2021, Experian believes that special forms of trading will account for almost 30% of retail sales by 2026, increasing to around 32% by 2031.
- 3.19 The below Figure 2 sets out Experian's identified and forecast level of special forms of trading as a proportion of overall convenience and comparison goods expenditure. Experian estimates that special forms of trading will account for over a third of comparison goods expenditure and over a fifth of convenience goods expenditure at 2031.

⁴ Including internet sales, mail order, stalls and markets, door-to-door and telephone sales

Figure 2. Experian's Identified and Forecast Market Share of Non-Retail Sales for Convenience and Comparison Goods Sectors

Volume Growth Per Head (%)	2016	2017	2018	2019	2020	2021	2026	2031
Convenience goods	10.0	11.6	12.8	14.1	21.1	18.1	21.2	22.8
Comparison goods	18.5	20.8	22.4	23.4	30.6	29.1	33.7	36.2

Source: Figure 5 of Experian Retail Planner Briefing Note 18

3.20 The ongoing popularity of internet shopping continues to have clear implications in respect of the viability of some 'bricks and mortar' retailers. However, it is important to note that changes in how people shop also bring about some opportunities for retailers trading from the high street. In particular, many stores sell online but fulfil orders from regular stores rather than warehouses⁵, with purchases therefore helping to sustain tangible retail floorspace. As a consequence, Experian also provides an 'adjusted' estimate of special forms of trading, which relates to expenditure which is not available to actual stores.

Convenience Goods

- 3.21 Recent socio-economic conditions have led to significant shifts in convenience goods retailing, which have resulted in the 'big four' supermarket operators' market share being cut. Mintel⁶ finds that the decline of the food superstore is well established and that this can be attributed to two issues.
- 3.22 Firstly, people are undertaking food shopping in different ways. More people are living in town and city centres and more people are having difficulties financing the purchase of their own home. Mintel indicates that such people are more likely to undertake food shopping on an 'as needs' basis and are more likely to eat out or use takeaways. As such, they are less likely to have need to undertake a 'main food shop'.
- 3.23 Secondly, the current uncertainty in the economy has made hard discounters (namely Aldi and Lidl) a more attractive proposition, and are particularly thriving given that shoppers are currently having to be 'money savvy'. Discounters have also made efforts to try to compete more directly with the 'big four' supermarket operators, with larger stores, greater ranges of goods, fresh foods and premium products becoming increasingly prevalent. It is clear that the likes of Aldi and Lidl are no longer

⁵ This is particularly the case with food shopping and speciality comparison goods purchases, where retailers often try to tap into a wider market through an online presence

⁶ 'UK Retail Rankings', Mintel, April 2018

- 'discount retailers' as they once were, and have better met a wider range of customers' needs through the increase in a supply of more premium products.
- 3.24 The move towards the middle ground has allowed discounters to secure market share from both superstores and smaller convenience stores. In addition, we note that discount retailers are often happy to trade alongside more upmarket convenience goods retailers (such as Marks & Spencer Foodhall) as, collectively, the two stores can meet many food shopping needs.
- 3.25 The shifts in the sector are illustrated with reference to changes in retailers' market share in recent years, as shown in Figure 3.

Figure 3. Market Share of convenience goods operators

Operator	December 2016	December 2017	December 2018	December 2019	December 2020
Tesco	28.4	28.1	27.8	27.4	27.3
Sainsbury's	16.5	16.5	16.1	16.0	15.9
Asda	15.3	15.3	15.2	14.8	14.3
Morrisons	10.8	10.8	10.6	10.3	10.4
Aldi	6.2	6.8	7.4	7.8	7.4
Со-ор	6.3	5.8	5.9	6.1	6.0
Lidl	4.6	5.0	5.3	5.9	6.1
Waitrose	5.1	5.2	5.0	5.0	5.0
Iceland	2.2	2.2	2.2	2.3	2.5
Symbols & Independent	1.8	1.7	1.5	1.6	1.7
Other Outlets	1.7	1.6	1.7	1.6	1.8
Ocado	1.1	1.1	1.2	1.3	1.6

Source: KANTAR Grocery Market Share. Figures shown are for the final reporting period in each calendar year

3.26 Over the past couple of years, the market has witnessed the closure of unprofitable foodstores, particularly operated by Tesco and Morrisons but a substantial investment plan from the likes of Aldi and Lidl over the coming years, which will likely further shift the grocery market in the short and medium term.

Comparison Goods

- 3.27 The comparison goods sector is currently being squeezed by a number of factors, the most substantial being the effects of Covid-19 and the efforts to contain it. Other factors include reduced expenditure growth, the ability of internet shopping to plug gaps in retailer representation, increases in the minimum wage, and business rates changes.
- 3.28 This 'perfect storm' has resulted in changes in the structure of retailing on the UK high street and a generally lesser reliance on comparison goods retail. To underscore this, the Centre for Retail

Research reported that 2020 was the worst year for the retail job losses in more than 25 years. Around 180,000 retail jobs were lost in total, with this figure representing a rise of almost a quarter on 2019⁷.

- 3.29 Whilst the sector is continually evolving and there are a number of ongoing success stories (including Primark, Zara, Jack Wills, Joules and Hotel Chocolat), recent headlines have focussed on failing retailers and store closures. High profile retailers that have struggled include Debenhams, which announced the closure of all 124 stores in December 2020⁸ and the Arcadia Group, which owned Topshop, Topman and Dorothy Perkins, which in February 2021 announced the closure of around 500 stores⁹. Furthermore, Intu Properties, one of Britain's biggest shopping centre owners, fell into administration in June 2020 after failing to secure an agreement with its creditors¹⁰.
- 3.30 Whilst the loss of the some of the above names will have significant repercussions for certain towns (particularly those that lose Debenhams, Marks & Spencer or House of Fraser from their high street in very quick succession), some well-known retailers have failed to 'move with the times' and update their offer, accommodation and online presence. This is partly a consequence of retailers struggling to reinvest in their business when margins are tight (or non-existent).
- 3.31 It will be interesting to see whether any permanent change in working from home may act to counterbalance the polarisation trend, given the prospect of fewer commuters in larger centres and greater numbers of people spending the working day in and around their home. The impact on larger centres may be to reduce footfall, particularly within the weak, and result in the shift in expenditure being directed to the smaller town, district and local centres. Whilst this will be a positive for the smaller centres, the city centre may suffer as a result.
- 3.32 Whilst structural changes have had a material impact on the vitality and viability of many UK high streets, there are some beneficiaries. In particular, household discount operators, such as B&M Bargains, Poundland and Wilko, have reoccupied a number of medium to large retail units. However, as evidenced by the failure of Poundworld, there are some indications that this market may be approaching capacity.
- 3.33 It remains to be seen what additional long-term impacts will eventuate from retail closures resulting from Covid-19 containment measures. However, prior to the implementation of lockdown measures,

⁹ Article headlined 'After Topshop owner Arcadia's demise, what now for UK clothes shopping?' The Guardian, 13 February 2021

¹⁰ Article headlined 'Shopping centre owner Intu collapses into administration', The Guardian, 26 June 2020

trading conditions for retailers were challenging and many retailers were struggling to meet costs, including rents, resulting in a higher proportion of retailers restructuring or entering administration. As has been seen throughout 2020 and 2021, the conditions have only become more challenging.

Leisure and Food & Drink

- 3.34 The greater availability of high street units appears to have helped stoke an entrepreneurial spirit in recent years, with a number of centres beginning to benefit from a greater focus on independent retailers and also modern markets, which are frequently focussed around food and drink operators.
- 3.35 More generally, the food and drink sector has also been buoyed in recent years by the success of mid-market national multiples, which expanded quickly across the UK. However, there are signs that the market is becoming saturated in some locations and a number of high profile operators have been in financial difficulty. Given the problems suffered by such operators, the market has become more cautious and mid-market operators are picking new sites carefully as a result. Instead, we have seen a number of independent operators flourish, both before and throughout the pandemic, and a desire of shoppers to choose local operators over the bigger, regional and national brands. This is particularly the case for the smaller centres in the authority area.
- 3.36 A further significant recent high street success story has been the resurgence of the town centre leisure sector, which has resulted in new cinemas being developed close to the shopping core and 'competitive socialising' concepts, which include bowling, crazy golf, table tennis, darts, axe-throwing and other seemingly niche pursuits.
- 3.37 Cinema openings have been on the up in recent years and 'boutique' cinema operators including Curzon, Everyman and The Light are able to operate from smaller sites in town centres (partly as a consequence of digital technology). Town centre cinema development has successfully underpinned wider mixed-use developments, as food and drink operators are typically keen to locate in close proximity to benefit from spin-off custom. New, innovative leisure operators have been particularly beneficial both in re-using existing difficult to let premises, and in driving the evening economy.
- 3.38 More generally, the gym market continues to perform well, with the Leisure Database Company identifying that there are now more than 7,000 gyms across the UK, with the fitness market having an estimated value of more than £5bn. The Leisure Database Company suggests that this is a 'golden age of fitness', with around one in every seven Britons having a gym membership. Budget gyms are

currently particularly popular, with operators such as Pure Gym, the Gym Group and easyGym utilising a format that is based on low costs and high volume.

3.39 There is a concern that the implications of the pandemic will be particularly felt on the leisure sector, with some facilities not being allowed to reopen until July 2021. The full impact on the leisure sector as a whole will really evolve throughout the remainder of 2021 and into 2022, and it is clear that the industry is not 'in the clear' yet.

The Uttlesford Context

- 3.40 Reports in May 2021 suggested that Uttlesford's shops and centres had experienced a 29% reduction in footfall when contrast to like-for-like assessment pre-pandemic¹¹. There have been some high profile closures, including the likes of Laura Ashley, Carphone Warehouse and Prezzo in Saffron Walden and TSB Bank in Great Dunmow.
- 3.41 However, the retail sector, and those who oversee it, have been resilient. There has been great success in launching a 'Click it Local' scheme, which provides a platform for local independent businesses to trade online and have their goods delivered to people's homes. As we will go on to examine in Section 5, this is likely to have contributed to lower vacancy levels than those experienced in many other parts of the country. The largely independent nature of trading (especially outside of Saffron Walden) is likely to have contributed to resilience over the pandemic.
- 3.42 The District is also largely free of local out-of-centre competition (again, outside of Saffron Walden), which assists its town centres in meeting the day-to-day demands of its residents. However, as we will go on to examine under our market share assessment in Section 4, this does not preclude significant numbers of residents from travelling further afield, especially for their comparison goods shopping.

¹¹ Google Mobility Report, May 2021

4 National and Local Policy Context

Introduction

- 4.1 Prior to discussing the floorspace capacity and vitality and viability of the centres within Uttlesford District, it is important to set out the prevailing national planning policy context for retail in the UK, as well as setting the scene for the Uttlesford District Development Plan.
- 4.2 The following chapter of this Study sets out the recent updates to the planning policy context, including updates to the National Planning Policy Framework (2021), hereafter, referred to as the NPPF; the National Planning Practice Guidance (NPPG), as well as the recent changes to the Town and Country Planning (Use Classes) Order and Town and Country Planning (General Permitted Development Order).

National Planning Policy Framework

- 4.3 The NPPF was initially adopted on 27 March 2012, and the Government published the updated version on 24 July 2018, which was further revised in July 2021.
- 4.4 The NPPF remains pro-growth with a 'presumption in favour of sustainable development'. It effectively instructs decision makers to support development unless there are clear negative environmental, social and/or economic impacts. The NPPF provides the national guidance against which all planning applications should be considered.
- 4.5 At paragraph 8, the NPPF asserts that the planning system must help build a strong, responsive and competitive economy. This overarching economic objective is supported by Chapter 6, which emphasises that significant weight must be given to supporting economic growth and productivity, and that local business needs and wider opportunities for development must be taken into account.
- 4.6 Chapter 7 of the NPPF seeks to ensure the ongoing vitality of town centres. In particular, within this chapter, Paragraphs 86 to 91 promote and support new development and investment within the defined boundaries of town centres, recognising that town centres are the heart of communities. Where town centres are in decline, the NPPF directs local planning authorities to plan positively for their future to encourage economic activity. The NPPF recognises the need for local authorities to promote the vitality and viability of their towns and cities through the promotion of competition and growth management.

- 4.7 Specifically, Paragraph 87 requires local planning authorities (LPAs) to enforce a sequential approach when assessing planning applications for main town centre uses located outside of existing centres or not in accordance with an up-to-date Local Plan. To do this, local authorities should require applications for main town centre uses to be located in town centres, then in edge of centre locations and only if suitable sites are not available should out-of-centre sites be considered. When reviewing edge of centre and out-of-centre proposals, they should give preference to accessible locations well connected to the town centre.
- 4.8 Paragraph 90 specifies that LPAs should require an impact assessment for retail and leisure development outside of town centres that are not in accordance with an up-to-date Local Plan and if the development is over a proportionate, locally set threshold. Where there is no locally defined threshold, the default threshold will be 2,500 sq m. The impact assessment should assess:
 - the impact of the proposal on existing, committed and planned public and private investment in a centre or centres in the catchment area of the proposal, and
 - the impact of the proposal on town centre vitality and viability, including local consumer choice and trade in the town centre and wider area, up to five years from the time the application is made.
- 4.9 In summary, the NPPF endorses a 'town centre first' approach to all retail activity (including leisure). It stipulates that where retail and leisure proposals cannot be accommodated within, or, adjacent to the town centre, applicants have to demonstrate, through the dual application of the impact test and the sequential test, which the development will not affect negatively upon the vitality and viability of town centres.

National Planning Policy Guidance

- 4.10 The NPPG for 'Town Centres and Retail' (last updated 18 September 2020) sets out further practical details of the Government's aspirations on town centres. The NPPG:
 - Encourages a wide range of complementary uses in town centres, such as residential, employment, entertainment/leisure, healthcare and education uses, as well as temporary activities such as 'pop ups'.
 - Recognises the potential for evening and night-time activities to increase economic activity,
 employment and diversification and to develop the 'unique brand' of a town centre.

- Promotes stakeholder engagement and involvement in shaping town centres, including the
 activities of Business Improvement Districts (BIDs), Local Economic Partnerships (LEPs),
 landowners and private sector businesses.
- Recommends Town Centre Strategies which are realistic based on the likely role and function
 of the centre, and which identify an appropriate mix of uses, the likely scale of need, and
 opportunities for improvement, including to the historic and natural environment.
- 4.11 In July 2019, additional indicators were added to the NPPG's list for planning for town centres and high streets, including balance between independent and multiple stores, barriers to new businesses opening and existing businesses expanding, and opening hours and extent to which there is an evening and night time economy offer.

The Town and Country Planning (Use Classes) & (General Permitted Development) Orders

- 4.12 In recent years, the Government has focussed considerable effort on trying to promote town centres through Permitted Development Rights. In addition to traditional 'rights' to switch between Use Classes within Use Class A in accordance with the General Permitted Development Order 2015 (GPDO), more recent rights have been granted in order to help diversify town centres and in order to reflect changing economic pressures. These include, subject to Prior Approval, the ability to convert a large number of uses to residential. Uses can include shops, financial and professional services, amusement arcades and casinos. There is also the commonly utilised ability to change office premises to residential.
- 4.13 To support new ventures and pop-ups and avoid buildings being left empty, a separate permitted development right allows a range of uses (such as offices, shops, financial and professional services, restaurants and cafes, hot food takeaways, assembly and leisure uses) to convert temporarily to another use (such as office, shop, financial and professional service, restaurant) for a single continuous period of up to three years. This right allows start-ups to test a new business model, and then to seek planning permission for the permanent change of use on that or another site. The same right now allows for the temporary change of use to specified community uses (health centre, art gallery, museum, public library, public hall or exhibition hall) to provide a greater mix of uses on the high street and increase footfall, and bring community uses closer to communities.

- 4.14 These permitted development rights are an important component in the re-shaping of a number of town centres throughout the UK. Symptomatic of this, the Government announced in June 2020 plans to introduce a new use class for 'commercial, service and business' in town centres. This proposal would simplify the process of switching between such uses in town centres. Consequently, The Town and Country Planning (Use Classes) Order 1987 was amended on 22 July 2020, and came into force in England on 1 September 2020 as the Town and Country Planning (Use Classes) (Amendment) (England) Regulations 2020. The amendments to the Use Classes Order included revoking Parts A and D and introducing three new use classes (Class E, F1 and F2).
- 4.15 These amendments mean that uses previously falling into Use Class A1, A2 and A3 (such as shops, and restaurants), Use Class B1 (including offices), and specific uses within Use Classes D1 and D2 (such as gyms, doctors' surgeries and nurseries) are now combined within a single Use Class (Class E: 'Commercial, Business and Service').
- 4.16 Additional Use Classes F1: 'Learning and non-residential institutions' and F2: 'Local community' have also been created, amalgamating a number of previous Use Classes. In particular, new Use Class F1 covers any use (not including residential) for the provision of education, display of works of art, museum, public library, public reading room, public hall, exhibition hall, for or in connection with public worship or religious instruction or as a law court. New Use Class F2 covers a shop selling mostly essential goods, including food, no larger than 280 sq m and where there is no other such facility within 1,000m radius of the shop's location; a hall or meeting place for the local community; an area or place for outdoor sport or recreation, not involving motorised vehicles or firearms; and an indoor or outdoor swimming pool or skating rink.
- 4.17 In practice, because changes within a single Use Class would not constitute development, this means a number of new changes of use can be carried out without the need for planning permission, notwithstanding any amendments to frontages and signage. Most notably, within Class E, a large shop can now freely change to a gym, an office, a restaurant, a nursery and any combination thereof.
- 4.18 The amendments also took a number of uses (such as pubs and bars, takeaways, music venues and cinemas) out of the Use Class Order, categorising them as 'Sui Generis' uses. Each of these uses now need planning permission for any changes to their use, providing further protection to valued local facilities (such as pubs) and further controls for town centres against potentially unwanted uses (such as takeaways).

- 4.19 In March 2021, an update was made to the GPDO setting out the Permitted Development Rights associated with Class E. Class MA allows for the change of use of these Class E properties to residential from August 2021 (extending a right that had previously been restricted to office uses using Class O). This permitted development right is subject to maximum size requirements, the property having been in use as Class E for 2 years and vacant for 3 months, as well as an application to the Council for 'Prior Approval' for limited consideration of impacts related to transport, contamination, flood risk, noise, the provision of natural light, and the potential effect of providing residential accommodation within an industrial area. Further limitations apply in Conservation Areas and for nurseries, as well as in areas covered by 'Article 4 directions' where the rights do not apply.
- 4.20 Article 4 directions are issued under article 4 of the GPDO, and allow for Councils to withdraw permitted development rights from defined areas. However, after notifying the Secretary of State of their intention to make an Article 4 directions, the Secretary of State can intervene and modify or cancel an Article 4 if the direction is not considered to be justified.
- 4.21 In July 2021, paragraph 53 the NPPF was updated setting out updated limitations for the use of Article 4 directions:

The use of Article 4 directions to remove national permitted development rights should:

- where they relate to change from non-residential use to residential use, be limited to situations where an Article 4 direction is necessary to avoid wholly unacceptable adverse impacts (this could include the loss of the essential core of a primary shopping area which would seriously undermine its vitality and viability, but would be very unlikely to extend to the whole of a town centre)
- in other cases, be limited to situations where an Article 4 direction is necessary to protect local amenity or the well-being of the area (this could include the use of Article 4 directions to require planning permission for the demolition of local facilities)
- in all cases, be based on robust evidence, and apply to the smallest geographical area possible.
- 4.22 It should be noted that any existing Article 4 directions that currently restrict office-to-residential changes under the old GPDO Class O will still 'bite' until July 2022, so Councils have the opportunity to propose new article 4 directions.

Uttlesford District Council Development Plan

- 4.23 The Uttlesford Local Plan was adopted in 2005. Since its adoption, there have been a series of side documents which update the Local Plan, including updated advice on Conservation Areas and Parking Standards, but there have been no material updates to retail policies. The Local Plan is read in conjunction with the supporting Proposals Maps.
- 4.24 A replacement plan was submitted for examination but subsequently withdrawn in May 2020, in light of the Examiners comments on the soundness of the Plan.
- 4.25 The Council are therefore currently preparing a new Local Plan, and this Study will form part of the evidence base for that plan. A 'call for sites and strategic land availability assessment' was launched earlier in 2021 and this forms the first stage of making the new Plan.

Uttlesford District Local Plan (2005)

- 4.26 The adopted Local Plan pre-dates the National Planning Policy Framework. Its retail policies are therefore largely outdated and will need a thorough overhaul under the Plan Review. We consider this matter in more detail in Section 6.
- 4.27 Those policies of the 2005 Plan which are most relevant to retail matters include:
 - Policy RS1 Access to Retailing and Services which sought to make properties accessible to all, in order to ensure social inclusion;
 - Policy RS2 Town and Local Centres which permitted the development of town centre uses in
 the centres of Saffron Walden, Great Dunmow, Stansted Mountfitchet and Thaxted, provided
 those developments do not harm the role of the centres, their historic character, other
 commercial activity, the supply of homes, or prejudice the use of upper floors for living or
 business accommodation; and
 - Policy RS3 Retention of Retail and other Services in Rural Areas which sought to resist the loss of community facilities in rural locations.

Neighbourhood Plans

4.28 Uttlesford District has four 'made' Neighbourhood Plans, which are as follows:

- Felsted adopted 2020;
- Great Dunmow adopted 2016;
- Newport and Quendon & Rickling adopted 2021; and
- Thaxted adopted 2019.
- 4.29 This Study is primarily concerned with the four centres of Saffron Walden, Great Dunmow, Stansted Mountfitchet and Thaxted. We therefore examine the Great Dunmow and Thaxted Neighbourhood Plans below.

Great Dunmow Neighbourhood Plan

- 4.30 The Great Dunmow Neighbourhood Plan considers general strategy as well as detailed policies for 'the High Street and Town Centre'. The Plan specifically notes that whilst the town centre forms the "backbone of the town", the fact that most of its car parks carry car parking charges "is seen by local residents and High Street businesses as very damaging to efforts to support the Town Centre".
- 4.31 The detailed 'positions' and policies of the Plans seek to achieve the following:
 - HSTC-A High Street Retail Character to ensure the High Street is a genuine market town
 with a supporting range of independent shops and services.
 - HCTC1 Uses and Variety 35% of the frontage must remain in Class A1 use. Only up to 5% of the primary shopping frontage and 10% of the secondary shopping frontage shall he dedicated to Class A5 (hot food takeaway) use. The conversion of ground floor units to residential in the High Street will not be permitted.
 - HCTC-B Accessibility Good access by a range of modes of transport will be encouraged, as well as the maintenance and signposting of all routes.
 - HCTC2 Coach Park Development proposals which support the Coach Park site will be
 encouraged provided they offer easy and safe access to the Town Centre and are not
 detrimental to the environmental character of the area.
 - HSTC-D Market the market is an important part of the shopping experience and will be supported in every way possible.

 HCTC-E – Town Centre Development – development and improvement in general will be actively promoted. The Neighbourhood Plan will be reviewed and updated as strategies develop.

Thaxted Neighbourhood Plan

- 4.32 The Thaxted Neighbourhood Plan considers a series of town centre focussed policies, which are accented towards protecting the Town Centre Conservation Area, as follows:
 - Policy TX HC3 Shop Fronts should contribute to the character and appearance of the Conservation Area.
 - Policy TX HC4 Protection of Retail Uses Supports the diversification and enhancement of shops, services and community facilities, where they preserve or enhance the Conservation Area.
- 4.33 The Plan includes a "Map of the Commercial Centre" (MAP 4) which designates the boundary of the Commercial Centre, as well as Primary and Secondary Frontage.

Local Plan Evidence Base

4.34 This Retail Capacity Study will supersede the relevant existing evidence base documents for Uttlesford District, including the Uttlesford Retail Study (2016) and Retail Study Update (2018), prepared by Savills.

Uttlesford Retail Study Update 2018

- 4.35 The Retail Study Update was underpinned by a household telephone survey of 1,000 samples and was carried out by NEMS Market Research in March/April 2016. The survey covered 6 Zones. Savills then extrapolated market share findings from those surveys to calculate the capacity for convenience and comparison goods through to 2033.
- 4.36 The findings of the Uttlesford Retail Study Update 2018 can be summarised as follows:
 - Convenience Goods There was very little leakage of expenditure outside of the District identified and Uttlesford is relatively well served in terms of main food shopping facilities.
 However, by the end of the horizon considered (2033), capacity might exist for large foodstore in Great Dunmow, as well as a small to medium sized foodstore in Saffron Walden. Preference in both cases would be for a sites in, or on the edge of, the town centres.
 - Comparison Goods Capacity exists by 2033 to support a further c4,500 sq m net of new floorspace in Saffron Walden, ideally to be located in the Town Centre. No capacity exists for additional comparison goods floorspace in any of the other centres through to 2033.

5 Capacity Assessment

Introduction

- 5.1 This section defines the Study Area and describes the Household Survey undertaken to inform this study. It summarises the key findings on internet shopping patterns, and delves into the survey-derived market share analysis for convenience and comparison goods spending at 'bricks and mortar' locations.
- 5.2 We also set out the results of our quantitative capacity assessment for new retail (comparison and convenience goods) floorspace in Uttlesford District, covering the period from 2021 to 2040. This section also considers the future capacity for food and beverage floorspace over the same timeframe.

Household Telephone Survey & Study Area

- 5.3 Household Surveys are recognised across the retail industry, and within planning policy guidance, as an excellent means of understanding where people within a specified area carry out their retail and leisure expenditure. We have therefore commissioned a new Household Telephone Survey and utilise the results to inform our quantitative analysis of the turnover of specific retailers, towns and other destinations, as well as its qualitative findings on attitudes and perceptions of different centres.
- 5.4 It is important to identify a Study Area that covers the key area of interest. It is usually the area within which you would expect the resident population of the District to carry out the majority of its retail spending.
- 5.5 This Study Area is shown on the plan in Figure 5 below, and at **Appendix A**. The Study Area is defined by postal sector geography in order to allow analysis by sub-areas (or 'Zones'), and to allow NEMS to obtain accurate samples.
- In this instance, we have utilised the same Study Area as the Uttlesford Retail Study 2016 (as updated in 2018). This enables us to directly compare and contrast the results gained in 2016 with those found in 2021. Savills adopted a naming convention of Zones 1a, 1b, 2a, 2b, 3 and 4 in their Study. Zones 1a, 2a and 3 were those which broadly comprised the Uttlesford District Area. The only difference between the Savills study, and our own Study in this respect, is that we have simplified the naming conventions, so that our Zones read 1-6, with Zones 1-3 broadly comprising the Uttlesford District area (see Figure 4).

Figure 4. Study Area Zonal Plan

- 5.7 Accordingly, the Study Area comprises 6 Zones and a total of 1,002 household surveys interviews took place across the 6 Zones. This is corroborated for its statistical accuracy, relative to population, by NEMS in their report in **Appendix B**. Figure 5 below sets out the postcode sectors which comprise each Zone.
- 5.8 The wording of the questions was also cognisant of the Covid-19 pandemic, as can be seen by the full questionnaire results in **Appendix B**. Respondents were asked where they 'usually' shop to avoid, as far as possible, the recording of any unusual travel patterns, and a number of additional questions were asked about how people changed their shopping and leisure patterns as a result of Covid-19.

5.9 A full description of the research methodology, sampling size, weightings and sample profiles is contained at the beginning of the NEMS report. NEMS quote their work as being within a 95% confidence range.

Figure 5. Study Area Postal Sectors

Zone	Postal Sectors	Household Survey Interviews
1 Uttlesford North	CB10 1, CB10 2, CB11 3, CB11 4	169
2 Uttlesford West	CM22 6, CM22 7, CM23 1, CM24 8	129
3 Uttlesford East	CM6 1, CM6 2, CM6 3, CM6 4	147
4 Western Fringe	SG8 7, SG8 8	101
5 Northern Fringe	CB21 4, CB21 6, CB22 3, CB22 4, CB9 0, CB9 7, CB9 8, CB9 9	277
6 Eastern Fringe	CM1 4, CM3 1, CM7 4, CM7 5, CM77 6	179
Study Area Total		1,002

Source: Appendix B

Study Area Population

5.10 The population for each zone in 2021, 2025, 2030 and 2035 is sourced from Experian MMG3 data (2020 report). Population figures for 2040 have been projected by Nexus Planning by using the Experian MMG3 (2020 report) population trends. We present the population projections on a Zone-by-Zone basis in Figure 6 below.

Figure 6. Population Projections

Zone	2021	2025	2030	2035	2040	Growth 2021-2040
Zone 1	35,214	36,537	37,927	39,064	40,103	13.9%
Zone 2	27,042	28,319	29,733	30,876	31,935	18.1%
Zone 3	30,692	32,004	33,381	34,486	35,518	15.7%
Zone 4	11,527	11,843	12,119	12,331	12,579	9.1%
Zone 5	57,269	58,256	59,230	60,212	61,273	7.0%
Zone 6	37,036	37,769	38,608	39,424	40,168	8.5%
Total Study Area	198,780	204,728	210,998	216,393	221,576	11.5%

Source: Table 1, Appendix C

Non-Store Retailing or Special Forms of Trading

5.11 Special forms of trading (SFT) are defined by Experian as sales via the internet, mail order, stalls and markets, vending machines, door-to-door and telephone sales, including online sales by supermarkets, department stores and catalogue companies.

Convenience Goods Online Shopping

- 5.12 The household survey asked residents of the Study Area where they normally undertake their main food and grocery shopping.
- 5.13 Across the Study Area, 14.8% of respondents <u>usually</u> shop online for their main food shop (Question 1 of the Household Survey). As set out in Section 2, the UK average for online convenience shopping in 2021 is 18.1%. As such, the take-up of online convenience shopping in the Study Area is lower than the UK average. The online trade across the Study Area is dominated by Tesco (53.2%), Ocado (24.4%), and Sainsbury's (17.1%), who together account for 94.7% of all online convenience goods spending.
- 5.14 The household survey also asked residents of the Study Area about how their online convenience shopping habits have been affected by Covid-19. Before the first lockdown, 31.0% of Study Area residents had shopped for groceries online at some point. During the lockdowns, this number increased to 46.4%. Since the lockdown has been lifted, the number using online services has decreased slightly to 40.0%, but remains significantly higher than before lockdowns. This suggests that Covid-19, and in particular the lockdowns, had resulted in a lasting habitual change in the Study Area, whereby a preference for online grocery shopping has increased.

Comparison Goods Online Shopping

5.15 The household survey asked where respondents usually shop for different types of comparison goods. The findings are presented in Figure 7 which shows the take-up for online shopping varying across the categories from 10.6% (DIY) to 68.3% (Media). On average, within the Study Area, 37.7% of respondents shop online for comparison goods, compared with a UK average of 29.1%.

Figure 7. Online Comparison Goods Spending in the Study Area, 2021

Source: NEMS Household Survey

- 5.16 The household survey also asked residents of the Study Area about how their online comparison-shopping habits have been affected by Covid-19. Before the first lockdown, 84.1% of Study Area residents shopped for comparison goods online. During the lockdowns, this number increased slightly to 85.5%. Since the lockdowns have been lifted, this figure has risen slightly again to 87.2%. Whilst the differences are marginal, and significantly less pronounced than the increase in convenience goods spending online, the base figures were already substantially higher with online comparison goods spend. The fact that online spend has increased since the lockdown was lifted is also notable, and confirms the general upwards trend in online comparison goods spend forecast by Experian (see Section 2).
- 5.17 Overall, when comparing pre-lockdown and post-lockdown frequency of online shopping, 15.9% of Study Area residents now shop online more often; 69.9% shop with the same frequency; and 6.2% shop online less often (8.0% were not able to give an answer). As would be expected, as the overall preference for online shopping has increased, the frequency of online shopping has also increased.

Retail Expenditure Forecasts

- 5.18 Having examined where online spending is focused, we now examine that proportion of spending which is carried out at 'bricks and mortar' stores.
- 5.19 Retail expenditure data has been sourced from our in-house Experian MicroMarketer G3 system. We obtain separate data for convenience and comparison goods, which in turn are broken down into multiple goods categories, as set out in our full statistical assessment in **Appendix C.**
- 5.20 The data takes account of the socio-economic characteristics of the local population to provide local consumer expenditure calculations. Experian is a robust source of population and expenditure data that is widely used for calculating retail capacity across the industry.
- 5.21 Expenditure data from Experian is provided per capita in 2019 prices, as is every subsequent monetary value. Using the growth rates presented in Table 6 of Experian Retail Planner Briefing Note 18 (October 2020), which are reproduced in Figure 8 below, the per capita expenditure is then projected forward to the base year (2021) and the relevant assessment years. Adjustments are made at every step to account for the growth in special forms of trading (SFT).
- 5.22 There are two elements that should be noted here:
 - Experian notes that long-term forecasts should be treated with caution, and that they should be subject to regular reviews given the wide range of factors that can influence the broader national economy. Experian produces annual updates to reflect this, and as we go on to discuss in our recommendations later in the report, we would advise that some of the expenditure data inputs (e.g. growth rates and base per capita spending figures) to this report be re-visited ahead of the Plan Examination in recognition of the exceptionally turbulent economic times surrounding both Covid-19 and Brexit, the full implications of which have yet to be realised at the time of writing.
 - Special forms of trading (SFT) are defined by Experian as sales via the internet, mail order, stalls and markets, vending machines, door-to-door and telephone sales, including online sales by supermarkets, department stores and catalogue companies. As we have mentioned previously. Experian Retail Planner Briefing Note 18 (October 2020) provides estimated year-on-year forecasts of internet and other SFT, which allows us to 'strip out' any expenditure that is, either now or in the future, diverted to SFT. This ensures that the increasing propensity to

shop by SFT is accounted for in our modelling. These increasing deductions for SFT have the effect of off-setting some of the growth in expenditure in the Study Area derived from population increases. Furthermore, many brands offer online sales, but source the goods from their own stores' shelves. This is often the case for food stores where employees will pick online orders from stores' shelves before, during or after opening hours. These orders are then delivered by dedicated vans from each store and as such, the online expenditure is attributed to tangible stores. Experian provides 'adjusted' figures to account for this.

Figure 8. 'Adjusted' Special Forms of Trading Market Share Forecasts

Year	Convenience growth rates (%)	Comparison growth rates (%)
2021	-5.3	8.1
2022	0.2	2.9
2023	-0.3	2.7
2024	-0.2	2.0
2025	-0.1	1.9
2026	-0.2	2.0
2027	-0.2	2.1
2028	-0.1	2.3
2029	-0.1	2.4
2030	-0.2	2.5
2031	-0.1	2.5
2032	0.0	2.5
2033	0.0	2.6
2034	0.0	2.6
2035	0.1	2.7
2036	0.0	2.7
2037	0.0	2.7
2038	0.1	2.8
2039	0.1	2.7
2040	0.0	2.7

Source: Figure 6, Experian Retail Planner Briefing Note 18, October 2020

5.23 The expenditure per capita figures are then multiplied by the population of each zone at each of the assessment years. Figure 9 below sets out the resultant outcome of the total 'brick and mortar' comparison and convenience expenditure in the Study Area at the base and assessment years.

Figure 9. Retail Expenditure Forecasts in the Study Area (£m)

Zone	2021	2025	2030	2035	2040	Growth 2021-2040
Convenience	451.2	462.9	473.4	485.5	498.2	10.4%
Comparison	647.6	733.0	845.1	984.7	1,153.3	78.1%

Convenience Goods Findings

Market Shares

- 5.24 Before considering the capacity for new convenience goods floorspace, we firstly examine the overall convenience goods spend by residents across the Study Area. Figure 10 specifically examines where Study Area residents are spending their money.
- 5.25 The results show that destinations in Uttlesford District account for 39.7% (£179.2m) of the spending of all Study Area residents in 2021 (£451.2 m per annum). The remaining 60.3% (£272.0m) of spending carried out by residents of the Study Area, takes place at destinations beyond Uttlesford District.

Figure 10. Convenience Goods Market Share by Destination

Destination	Total Market Share Convenience (%)	Total Market Share Convenience (£m at 2021)
Saffron Walden Town Centre	6.7%	£30.2m
Stansted Mountfitchet Local Centre	1.5%	£6.7m
Great Dunmow Town Centre	1.1%	£4.9m
Thaxted Local Centre	0.2%	£1.1m
Other Local Centres/Villages	2.7%	£12.2m
In-centre Sub-total	12.2%	£55.0m
Saffron Walden out-of-centre	16.0%	£72.0m
Great Dunmow out-of-centre	11.6%	£52.3m
Uttlesford District Total	39.7%	£179.2m
Haverhill	18.2%	£80.2m
Elsewhere in the Study Area	2.5%	£11.0m
Chelmsford	6.2%	£28.1m
Royston	5.8%	£26.1m
Harlow	1.1%	£5.1m
Cambridge	3.6%	£16.3m
Bishops Stortford	10.4%	£46.9m
Braintree	9.7%	£43.7m
Others outside the Study Area	2.8%	£12.7m
Total	100.0%	£451.2m

Source: Figure 6, Experian Retail Planner Briefing Note 18, October 2020

- 5.26 Uttlesford attracts 39.7% of all convenience goods spending in the Study Area (£179.2m). The majority of convenience goods spending in Uttlesford is carried out in out-of-centre locations in Saffron Walden and Great Dunmow (£124.3m).
- 5.27 Of the £179.2m per annum spent in Uttlesford, its town centres and villages account for £54.8m of spend. This equates to 30.6% of all spend carried out in the District.
- 5.28 The most popular destinations within the District are Tesco in Great Dunmow (£52.3m per annum), Tesco in Saffron Walden (£42.5m), Aldi in Saffron Walden (£29.2m) and Waitrose in Saffron Walden (£27.8m).
- 5.29 In terms of destinations outside the District, the highest collective attractors of convenience goods spend from residents of the Study Area are foodstores in Haverhill (£82.3m per annum), Bishops Stortford (£46.9m) and Braintree (£43.7m).
- 5.30 Importantly, we can also examine the destination of convenience goods spend within each Zone of Uttlesford District. This is a key indicator and shows the amount of Uttlesford District residents spend which is 'retained' within the District, and the amount which is 'leaked' elsewhere.
- 5.31 This District very closely aligns with Zones 1, 2 and 3 of the survey. Figure 11 examines the amount of convenience goods spending carried out inside Uttlesford District by residents of each Zone.
- 5.32 The results show that there are healthy levels of retention in both Zones 1 and 3 (Uttlesford North and Uttlesford East), with 93.0% and 82.5% retention respectively. There is though a different picture in Zone 2 (Uttlesford West), where only 25.0% of convenience goods spend is retained within the District. The results in Table 4 at Appendix C highlight that 66.3% of all convenience goods spend by residents of Zone 2 is carried out in Bishops Stortford.
- 5.33 Overall, the District retains 70.3% of the convenience goods spend of its residents (£150.4m out of £214.1m per annum).

Figure 11. Convenience Goods Market Share by Destination

Source: Appendix C, Table 3

5.34 Turning to individual retail destinations, where national company averages are available for benchmarking purposes, we are able to compare local turnover to the turnover of an average store of that size in order to identify where facilities may be trading over or below expectations. This is summarised at Figure 12, including assumptions for the inflow of trade.

Figure 12. Convenience Goods Turnover Benchmarking

Destination	Benchmark Turnover (£m)	Survey Turnover inc. inflow (£m)	Trading Position against Benchmark (£m)	Trading Position against Benchmark (%)
Saffron Walden Town Centre	£31.2m	£31.7m	£0.5m	1.7%
Great Dunmow Town Centre	£8.3m	£4.9m	-£3.4m	-41.6%
Stansted Mountfitchet LC	£8.8m	£6.7m	-£2.1m	-23.9%
Thaxted Local Centre	£1.1m	£1.1m	£0.0m	0.0%
Other Local Centres/Villages	£10.8m	£12.0m	£1.2m	10.9%
Saffron Walden Out-of-centre	£43.1m	£72.0m	£28.9m	67.1%
Great Dunmow Out-of-centre	£28.5m	£52.3m	£23.8m	83.5%
Uttlesford District	£131.8m	£180.7m	£48.9m	36.0%

Source: Table 5, Appendix C

- 5.35 The results show that the convenience floorspace in Uttlesford District is performing well when considered cumulatively. Facilities in the District are trading at an average of 36.0% above benchmark. This is driven by the very strong performance of the out-of-centre Aldi store in Saffron Walden, and the Tesco stores in Great Dunmow and Saffron Walden. These three stores are trading at 146.3%, 83.5% and 37.3% above company average trading levels respectively.
- 5.36 Of the Town Centres, Saffron Walden is performing at around benchmark, whilst the smaller stores in Great Dunmow and Stansted Mountfitchet appear to be trading at below average levels. The lack of national multiple retailers in Thaxted means that it is not possible to prepare a meaningful benchmark exercise.
- 5.37 We summarise below the performance of individual stores in Uttlesford, with Figure 13 setting out the 'Top 3' best and worst performing stores.

Figure 13. Best and Worst Performance Benchmarking

Destination	Benchmark Turnover (£m)	Survey Turnover inc. inflow (£m)	Trading Position against Benchmark (£m)	Trading Position against Benchmark (%)			
Best Performing							
Aldi, Saffron Walden	£11.9m	£29.2m	£17.4m	146.3%			
Tesco, Great Dunmow	£28.5m	£52.3m	£23.8m	83.5%			
Tesco, Saffron Walden	£31.0m	£42.5m	£11.6m	37.3%			
Worst Performing							
Co-op, Great Dunmow	£7.4m	£4.0m	-£3.4m	-45.7%			
Co-op, Stansted Mountfitchet	£4.5m	£2.7m	-£1.8m	-39.4%			
Nisa, Saffron Walden	£1.7m	£1.4m	-£0.3m	-19.3%

Local Market Share Trends – Convenience Goods

- 5.38 Figure 14 sets out a comparison of 2021 market share data against the findings of the 2018 Uttlesford Retail Study Update (informed by 2016 survey data). This data consider the spending of residents in Zones 1-3 only, which broadly comprises the area of Uttlesford District.
- 5.39 Overall, we identify a relatively consistent position over the past 5 years (2016-2021). There has been a very slight increase in the 'retention' of Uttlesford residents' convenience goods spend, from 70.1% in 2016 to 70.2% in 2021. This has been driven by an increase in market share to out-of-centre foodstores, which now have a 49.1% market share, compared to 43.9% in 2016.

- 5.40 By contrast, there has though been a reduction on the market share of Uttlesford residents' convenience goods spending in its town and villages centres (21.1% of trade, down from 26.1% in 2016).
- 5.41 The overall picture is therefore mixed. Whilst the District has retained an equivalent proportion of its own residents' spend as a whole, that spend is increasingly being carried out in out-of-centre locations, to the likely detriment of town centre locations.

Figure 14. Convenience Goods Market Share from Uttlesford Residents (2016-2021)

Source: Appendix C & Uttlesford Retail Study 2018 (Appendix 7, Table 6)

- 5.42 Building on this, Figure 15 examines the market shares attracted to individual centres in 2021, against the comparative assessment in 2016. The results show that there has been a reduction in convenience goods market share over this period in Saffron Walden, Great Dunmow and Thaxted Town Centres. In contrast, there has been an increase in convenience goods market share in Stansted Mountfitchet Town Centre.
- 5.43 Looking at the larger foodstores which underpin Saffron Walden Town Centre and Great Dunmow Town Centre, it is notable that the Waitrose in Saffron Walden has experienced a decrease in market

share from 7.4% of Study Area spend in 2016, to 6.2% in 2021, whilst the Co-op store in Great Dunmow has experienced a fall from 1.5% of Study Area spend in 2016, to 0.9% in 2021.

- 5.44 This in quite sharp contrast to the performance of out-of-centre competitors over the same period. The Tesco and Aldi stores in Saffron Walden have seen their market shares increase from 6.3% and 5.2% in 2016, to 9.4% and 6.5% respectively by 2021. There is therefore evidence to suggest a transfer of market share from in-centre to out-of-centre stores in the Saffron Walden area.
- 5.45 There is a slightly different picture in Great Dunmow, where the Tesco store has held its market share (11.7% in 2016, and 11.6% in 2021). Set against the falling market share of the Town Centre, this suggests that there has been an overall increase in the amount of spend which is being 'leaked' from the local area to destinations elsewhere. We consider this point further in our recommendations in Section 6.

Figure 15. Convenience Goods Market Share from the Study Area by Destination (2016-2021)

Source: Appendix C & Uttlesford Retail Study 2018, Appendix 7, Table 6

Convenience Goods Capacity

5.46 One of the key aims of this Study is to provide recommendations on the capacity for new retail floorspace over the plan period to 2040. The use of long-term projections should be treated with

caution and reviewed regularly in order to test the accuracy of the forecasts against emerging datasets. External national and international factors can influence the wider performance of the economy, which can have trickle down effects on local shopping patterns. As discussed in Section 2, one such example has been the economic implications of the United Kingdom leaving the European Union and the social distancing and lockdown measures necessitated current Covid-19 pandemic.

- 5.47 Importantly, we also note that any quantitative retail capacity that we may identify across the Study Area does not necessarily equate to justification for new retail floorspace in itself (especially in out-of-centre locations), and any such development would be required to be assessed in line with NPPF policy in terms of impacts on the vitality and viability of town centres, the potential to prejudice emerging town centre developments, and the 'town centre first' sequential approach to site selection. Equally, the converse also applies and a lack of identified capacity should not specifically rule out retail developments, where other material factors support such development.
- 5.48 Detailed quantitative retail capacity tables are enclosed at **Appendix C**.
- 5.49 Retail capacity modelling follows a consistent, robust methodology which incorporates a number of datasets and informed assumptions which we describe further below, but broadly speaking:

Available Expenditure (£m) - Turnover of existing & proposed (£m) = Surplus or Deficit (£m)

- 5.50 Experian MMG3 census software is used to provide localised expenditure per capita per annum for various forms of retail spending. These figures are then projected forwards based on population growth, changes in expenditure over time and Special Forms of Trading (SFT) such as internet shopping.
- 5.51 The turnover of existing retailers across the Study Area is calculated based on average sales densities, or turnover, per square metre. Various retail planning sources provide average (or benchmark) sales densities for all national multiple retailers.
- 5.52 The surplus or deficit equates to the difference between the available retail expenditure across the Study Area and the turnover of existing facilities within the Study Area. If the total turnover is greater than the available expenditure, then the model would identify an oversupply of existing retail floorspace, whilst a surplus of expenditure would suggest capacity for additional retail floorspace.
- 5.53 Once the surplus or deficit of expenditure is calculated, it is then presented in floorspace figures (using average sales density assumptions) in order to demonstrate the findings within a 'real world' context. Often surplus figures are presented under a number of different scenarios representing

various retailers. For example, discount retailers (such as Aldi and Lidl amongst others) continue to operate at a lower sales density than the 'big 4' (Sainsbury's, Tesco, Asda, and Morrisons). Given the same available 'pot of expenditure', a higher sales density would result in a lower floorspace capacity than a lower sales density, which would result in a higher floorspace capacity.

- 5.54 Turning now to our detailed findings for Uttlesford, as detailed in Figure 10 above, the household survey results show that facilities within the District have a 39.7% convenience goods market share of all spending carried out by residents of this Study Area.
- 5.55 In keeping with standard retail study methodology, when assessing the capacity for new convenience retail floorspace we adopt a constant market share in line with findings of the latest household survey (i.e. that stores within the District will continue to draw 39.7% of all convenience goods spending from the Study Area). We consider maintaining a constant market share a sensible basis for analysis given the relative lack of planned developments across the Study Area. In coming to this view, we have analysed the level of commitments identified through correspondence with Council officers of both Uttlesford and neighbouring authorities
- 5.56 Based on a constant market share, we then allow for growth in retail expenditure over the period to 2040, as well as utilising data provided within the latest Experian Retail Planner Briefing Note 18, in order to take account of forecast growth in retail efficiencies (for example, through the adoption of new technologies and more efficient use of available floorspace). Floorspace efficiencies are estimated to have a greater impact on comparison retailers than convenience retailers over the plan period as the rise of food discounting and disruptions to logistics continue to subdue projected efficiencies in turnover of existing convenience retail floorspace.
- 5.57 We go on to make a number of statistical assumptions through the quantitative capacity exercise in order to account for the following variables. These are contained at Table 5 of **Appendix C** and can be summarised as:
 - Utilising a 'goods based' approach, we strip out expenditure for non-food comparison goods such as clothing, household goods, CDs, DVDs and other media that are now commonly sold at major foodstores so that only the convenience goods floorspace is being considered (i.e. on a like-for-like basis with available convenience expenditure). These deductions are made in line with floorspace figures sourced from publicly available databases or, where data is not available, Nexus' professional judgement based on site visits.

- We also make assumptions as to the gross to net convenience goods sales floorspace of each store, again utilising online planning records where available, national rates databases or Nexus' professional judgement.
- Finally, we consider whether foodstores are likely to attract any additional 'inflow' from outside of the Study Area. In this instance, we have included an assumption that town centre foodstores in Saffron Walden will experience a 5% inflow from beyond the Study Area in recognition of the Town Centre's wider draw of custom and tourist trade. All other Uttlesford centres are assumed to draw their convenience goods custom from within the Study Area.
- 5.58 We then go on to calculate the anticipated turnover of all major convenience goods operators based on the published company sales data, referred to as 'benchmark' turnover. 'Benchmark' turnover is calculated from national average 'sales densities' (turnover per square metre). By comparing the turnover estimates derived from the findings of the household survey (total available expenditure distributed on the basis of each destinations market share) to the benchmark turnovers, we are able to establish where stores are trading above (overtrading) or below (under-trading) company averages.
- 5.59 Based on the household survey, we identify in Tables 3-5 of **Appendix C** that Uttlesford's convenience retailers within the Study Area turnover an estimated £179.2m of Study Area residents spend at 2021.
- 5.60 Accounting for inflow in terms of convenience spending (£1.5m), this equates to an initial surplus of £48.9m against benchmark performance (see Table 5, **Appendix C**).
- 5.61 Figure 16 below sets out the resultant surplus convenience goods expenditure at each assessment date. This increases from £48.9m in 2021, to £56.7m by 2030, and to £62.7m by 2040 (see Table 6a).

Figure 16. Gross Convenience Goods Surplus Expenditure in Uttlesford

Year	Benchmark Turnover (£m)	Survey Turnover (£m)	Inflow (£m)	Surplus Expenditure (£m)
2021	131.8	179.2	1.5	48.9
2025	132.8	183.8	1.5	52.5
2030	132.8	188.0	1.6	56.7
2035	132.8	192.8	1.6	61.6
2040	136.8	197.8	1.7	62.7

Source: Table 6a, Appendix C

- 5.62 We then go on to consider committed and extant permissions for new convenience retail floorspace. This includes any developments that have not been built, are currently under construction, or have opened or would not have been operating at the time of the household survey. We do not take into account proposed allocations for retail floorspace, but consider development proposals for which a formal planning application has either been submitted or approved. A complete list of the commitments considered in our capacity assessment is provided at Table 6c of the statistical tables presented at **Appendix C**.
- 5.63 In total, these committed developments equate to a net convenience floorspace of 583 sq m and an estimated turnover of £4.7m.
- 5.64 Taking account of committed turnover, we identify a negative residual expenditure of £44.2m at 2021, rising to £52.0m by 2030 and £58.0m by 2040. A significant proportion of this residual expenditure is made up over-performance against benchmark in the District in the earlier years of the assessment, though over time, population and expenditure growth become more of a factor.
- 5.65 Using average sales densities to calculate a minimum floorspace scenario (a large supermarket operator) and a maximum floorspace scenario (a combination of discount foodstores operators), we go on to calculate the net additional convenience goods capacity for Uttlesford District.

Figure 17. Net quantitative 'capacity' for new convenience goods facilities in Uttlesford

Year	Surplus Expenditure (£m)	Commitments (£m)	Residual Expenditure (£m)	Minimum Floorspace Capacity (sq m net)	Maximum Floorspace Capacity (sq m net)
2021	48.9	4.7	44.2	3,900	5,700
2025	52.5	4.7	47.8	4,200	6,100
2030	56.7	4.7	52.0	4,500	6,600
2035	61.6	4.7	56.9	4,900	7,200
2040	62.7	4.7	58.0	5,000	7,300

Source: Table 6d, Appendix C

5.66 This quantitative capacity is calculated to grow from a positive capacity of between 3,900 and 5,700 sq m in 2021, to between 4,500 and 6,600 sq m by 2030. In purely quantitative terms, this capacity is sufficient to support the provision of extensive new convenience retail floorspace over the plan period.

5.67 However, as we have previously identified, there is evidence of reducing market shares in the District's Town Centres, and so there are important qualitative considerations before allocating and/or permitting new foodstore floorspace. We examine the opportunities for growth in more detail in Section 6.

Comparison Goods Findings

Market Shares

- 5.68 Turning to consider comparison goods, we examine market shares across the range of categories defined by Experian. These eight categories cover all ranges of bulky and non-bulky items. The full results of our market shares analysis are set out in Tables 9-26 of **Appendix C**.
- To begin with, we look at the overall comparison goods spend by residents across the Study Area. The results show that destinations in Uttlesford District account for 13.3% (£85.8m) of the spending of all Study Area residents in 2021 (£647.6m per annum). The remaining 86.7% (£561.8m) of spending carried out by residents of the Study Area is spent at destinations beyond Uttlesford District.
- 5.70 Figure 18 specifically examines where residents of the Study Area are carrying out their comparison goods spending. The results show that, in contrast to the convenience goods findings, town centre locations are the most popular destination in Uttlesford (accounting for 10.5% of the 13.3% market share). Within that grouping, Saffron Walden (8.9% market share) is, by some margin, the most popular comparison goods destination within Uttlesford District. Out-of-centre facilities in Saffron Walden account for a 2.0% market share, with Great Dunmow Town Centre the third most popular destination (1.2%).
- 5.71 Outside the District, a number of higher-order centres attract large proportions of comparison goods spend. Cambridge leads the way (26.4%), followed by Chelmsford (17.5%) and Braintree (9.1%).

Figure 18. Comparison Goods Market Share from the Study Area, by Destination

Destination	Total Market Share Comparison (%)	Total Market Share Comparison (£m at 2021)
Saffron Walden Town Centre	8.9%	£57.6m
Stansted Mountfitchet Local Centre	0.3%	£1.7m
Great Dunmow Town Centre	1.2%	£7.7m
Thaxted Local Centre	0.1%	£0.6m
Other Local Centres/Villages	0.1%	£0.7m
In-centre Sub-total	10.5%	£68.3m
Saffron Walden out-of-centre	2.0%	£13.2m
Stansted Mountfitchet Out-of-centre	0.1%	£0.7m
Great Dunmow out-of-centre	0.6%	£3.6m
Uttlesford District Total	13.3%	£85.8m
Haverhill	9.4%	£60.9m
Elsewhere in the Study Area	0.5%	£3.6m
Chelmsford	17.5%	£113.1m
Royston	2.4%	£15.3m
Harlow	5.6%	£36.1m
Cambridge	26.4%	£170.7m
Bishops Stortford	6.3%	£40.9m
Braintree	9.1%	£58.9m
Bury St Edmunds	2.4%	£15.8m
Others outside the Study Area	7.2%	£46.5m
Total	100.0%	£647.6m

Source: Tables 25 & 26, Appendix C

5.72 As with our previous assessment of convenience goods, we are also able to examine the degree of comparison goods spend within each Zone. Figure 19 examines the amount of comparison goods spending carried out inside Uttlesford District by residents of the District itself.

Figure 19. Comparison Goods Market Share by Destination (Uttlesford Residents)

Source: Tables 25 & 26, Appendix C

- 5.73 The survey findings for comparison goods show that, whilst the majority of trade across all Zones is leaked outside of the District, residents of Zone 1 have a noticeably higher proportion of spending within Uttlesford District, than either of the other two Zones which comprise the District. This is reflective of proximity to Saffron Walden, which offers the District's only substantial comparison goods offer.
- 5.74 Overall, residents of the District carry out 23.1% of their comparison goods spending within the District itself, with 76.9% of spending carried out elsewhere. In terms of the latter, the survey evidence shows that residents in Zone 1 lean heavily towards Cambridge (39.1% of all spending), whilst residents in Zone 2 visit a mixture of locations including Bishops Stortford (31.3%) and Harlow (27.6%). Residents in Zone 3 gravitate towards Chelmsford, which accounts for 41.8% of all its residents' spending.
- 5.75 In Figure 20, we also analyse the market share of different types of comparison goods, considering which items are purchased from stores and centres inside Uttlesford District, and what the propensity is to travel further afield for certain items.

Figure 20. Comparison Goods Market Share by Goods Category (Uttlesford residents)

Source: Tables 25 & 26, Appendix C

5.76 The survey results show that there is a considerable variance between spending on different goods categories, as well as between different Zones. Looking firstly at the figures for the whole of the District, the amount of spend retained within the District varies from 70.3% of spending on chemist goods, to just 10.2% of spending on both clothing and footwear, as well as electrical goods.

5.77 Turning then to consider the differences between Zones, it is evident that residents of Zone 1 (Uttlesford North) have a much higher propensity to shop for comparison goods within the District than residents of either Zones 2 or 3. This is due to the fact that Saffron Walden has the District's only substantial comparison goods offer.

Local Market Share Trends – Comparison Goods

5.78 In Figure 21 below, we examine the comparison goods spending of Uttlesford residents (Zones 1-3) within the District itself. Unfortunately, the 2018 Retail Study was not presented in such a way that makes it possible for us to compare and contrast the market share data between the two dates on a District-only basis (as we earlier did for convenience goods).

Figure 21. Comparison Goods Market Share from Uttlesford Residents (2021)

Source: Appendix C, Table 26

5.79 We are though able to compare and contrast the District's market share within the wider Study Area. In Figure 22 below, the results show that the District has increased its market share of comparison goods spend from 11.9% in 2016 to 13.3% in 2021. Both in-centre and out-of-centre facilities in Saffron Walden have experienced an increase in market share, as has Stansted Mountfitchet Town Centre. There has though been a reduction in comparison goods market share in Great Dunmow

Town Centre.

Figure 22. Comparison Goods Market Share by Destination (2016-2021)

Source: Appendix C & Uttlesford Retail Study 2018

5.80 In light of the above, our comparison goods market share analysis shows that the District has, overall, fared reasonably well over the period 2016-2021. The likelihood is that the District has retained its market share, despite sizable regional competitors, because of minimal internal competition from out-of-centre destinations within Uttlesford District. However, the findings clearly show that only Saffron Walden provides any significant comparison goods offer in its own right, and highlights the importance of convenience and service uses to support the District's other centres.

Comparison Goods Capacity

- 5.81 The methodology for calculating capacity for comparison goods floorspace differs from that used to model capacity for convenience goods floorspace. The principal reason for this is that there are no robust, industry standard benchmark sales densities for calculating the turnover of smaller independent retailers that typically make up the majority of the comparison provision of town centres (although it is noted that sales densities are published for national multiple comparison retailers). Moreover, the trading levels of comparison retailers can fluctuate significantly depending on a number of localised variables, most notably the location of the retailer relative to similar providers (as customers are more likely to link multiple comparison goods trips to retailers in close proximity to each other).
- 5.82 As such, we adopt a standard approach that comparison goods retailers across the Study Area are trading 'at equilibrium' at 2021, meaning that we adopt the survey derived turnover of each facility, and examine capacity by measuring the growth in available expenditure to 2040. For the purposes of our assessment, we have assumed that the District's attraction to Study Area residents will remain constant at 13.3% of all spending proportionate to population growth (Table 27a). Based on the limited scale of planned developments inside and nearby the District, we consider this a robust basis for analysis.
- 5.83 Figure 23 sets out the resultant gross comparison goods capacity forecasts over time. The early years forecast shows negative capacity. This is because Experian forecasts show that the near-term sales efficiency of existing retailers will actually grow faster than the forecast growth in spending, meaning that the limited expenditure generated by the growth in local population will be consumed by existing retailers, rather than being made available to support new floorspace. Only by 2035 does a positive surplus expenditure arise.

Figure 23. Gross Comparison Goods Surplus Expenditure in Uttlesford

Year	Benchmark Turnover (£m)	Survey Turnover (£m)	Inflow (£m)	Surplus Expenditure (£m)
2025	101.4	97.2	3.4	-0.9
2030	116.2	112.0	3.8	-0.3
2035	132.1	130.5	4.4	2.8
2040	150.5	152.9	5.0	7.4

Source: Table 27a, Appendix C

- 5.84 We then consider committed and extant planning permissions for new comparison retail floorspace across the Study Area that are likely to come forward over the plan period, again informed by our discussions with Council officers. This includes any developments that are currently under construction, or would not have been operating at the time of the household survey. In the same way as we viewed convenience goods, we do not take into account proposed allocations for retail floorspace that are not likely to come forward over the plan period.
- 5.85 In total, these committed developments are minor and equate to a net 260 sq m of comparison goods floorspace and an estimated turnover of £1.6m (see Table 26c at Appendix C). The commitments are then projected forwards and deducted from the surplus expenditure. Once accounted for, we are able to calculate the net comparison goods capacity.

Figure 24. Net quantitative 'capacity' for new comparison goods facilities in Uttlesford

Year	Surplus Expenditure (£m)	Commitments (£m)	Residual Expenditure (£m)	Minimum Floorspace Capacity (sq m net)	Maximum Floorspace Capacity (sq m net)
2025	-0.9	1.6	-2.4	-300	-500
2030	-0.3	1.8	-2.1	-300	-400
2035	2.8	2.0	0.8	100	100
2040	7.4	2.3	5.1	500	800

Source: Table 26d, Appendix C

5.86 Taking account of committed turnover, we identify an initial negative residual expenditure of -£2.4m at 2025, rising to -£2.1m at 2030, and £5.1m by 2040. Even at 2040 though, this equates to a very small floorspace equivalent of between 500-800 sq m net.

Food and Beverage Capacity

- 5.87 We have undertaken an assessment of the potential capacity for additional food and beverage floorspace across the District, utilising current market shares as identified through the household survey, population and spending growth rates and benchmarking against current levels of provision.
- 5.88 This exercise identifies the future spending available to support additional food and beverage floorspace (in the form of restaurants, pubs, bars, café etc.) over the plan period to 2040. This approach is not prescriptive, but instead provides an indication of the scope for future development to be supported, in addition to the findings of the assessments of the key centres.

- 5.89 Experian provides localised data on spending on restaurants and cafés per capita, which includes spending on alcoholic drinks (away from home) and take-away meals. This spending was shown to be £1,390 per annum for residents in the Study Area (2019 prices).
- 5.90 Taking into account the population growth, and anticipated leisure spending growth rates (Experian Retail Planner 18, Figure 1a¹²), we calculate in Figure 25 a total spend across the District (defined as Zones 1-3) of £129.2m at 2021, increasing to £153.1m by 2030, and to £179.3m by 2040.
- 5.91 This spending is then attributed to the restaurant, café and bar facilities across the District. Our experience of surveying similarly rural Districts elsewhere across the UK is that around 50% of all restaurant, pub, bar and café expenditure is retained within the District. We have applied this assumption.
- 5.92 Growing the 'benchmark' turnover of facilities from current levels on the basis of 1% per annum¹³ to account for growth through extensions and trading efficiencies over the plan period, we find the anticipated spending surplus (or deficit) as follows.

Figure 25. Restaurants, Pubs, Bars and Café Spending

Year	District Population		Total Spend (£m)	Retention Rate @ 50%	Growth in Spending (£m)	Benchmark Growth (£m)	Residual Spending (£m)
2021	92,948	£1,390	£129.2m	£64.6m	-	-	-
2025	96,860	£1,446	£140.0m	£70.0m	£5.4m	£2.6m	£2.8m
2030	101.041	£1,515	£153.1m	£76.6m	£12.0m	£5.8m	£6.2m
2035	104,426	£1,585	£165.5m	£82.8m	£18.2m	£9.0m	£9.2m
2040	107,556	£1,667	£179.3m	£89.7m	£25.1m	£12.3m	£12.8m

Source: Nexus analysis

¹² Note that this accounts for a substantial short-term decline in leisure spending as a result of the Covid pandemic

¹³ We are not aware of any published data for restaurant, pub, bar and café sales efficiency growth and so have assumed a figure of 1%.

Figure 26. Restaurants, Pubs, Bars and Café Capacity

Year	Residual Spending	Sales Density	Floorspace (sq m)
2025	£2.8m	£5,200	540
2030	£6.2m	£5,450	1,140
2035	£9.2m	£5,700	1,610
2040	£12.8m	£5,950	2,150

Source: Nexus analysis

- 5.93 We find a total food and beverage spending surplus across Uttlesford District of £6.2m by 2030, and £12.8m by 2040.
- 5.94 Adopting an average sales density of £5,000 per sq m at 2021 (again, projected to grow in line with a 1% sales efficiency) we calculate the typical restaurant, pub and café floorspace that could be supported by the identified surplus expenditure. This is shown as being up to 1,140 sq m by 2030, and 2,150 sq m by 2040. This should be treated only as a rough guide.
- 5.95 We are also highly cognisant of the fact that the recent pandemic will have resulted in the closure of a large amount of restaurant, bar and café floorspace across the District. Whilst our figures show that there is likely to be a substantial pent-up consumer demand for additional spending in this area, this does not mean that all of that demand should be met through new floorspace. The potential reoccupation of vacant floorspace should be accounted for in the first instance.

6 Town Centre Health Check Assessments

- 6.1 This section of the report sets out our health check assessment to assess the vitality and viability of Uttlesford's Centres including: Saffron Walden and Great Dunmow Town Centres and the Local Centres of Thaxted and Stanstead Mountfitchet.
- 6.2 The extent of our assessments of the centres have been determined by the extent of Experian Goad Plans (where available), in order to provide consistency and allow for comparison against national averages and the findings of the previous 2016 Study. Where Goad Plans are not available, the Council's base mapping has been used. Full sized composition plans are contained at **Appendix D**.

Methodology

- 6.3 This town centre assessment builds on the consultant teams' analysis of market trends as outlined in Chapter 2. We supplement this analysis with two sources of new empirical evidence; consultation and stakeholder engagement, and our town centre health checks. By combining the findings of our engagement with local groups, residents and businesses, and our on-the-ground observations, we are able to build a picture of the current health of the centres, based on performance against the range of health check indicators set out in the NPPF / PPG.
- 6.4 We describe our methodology for the health check exercise below, before going on to examine each of the Town and Local Centres in Uttlesford. We utilise the categorisations employed by Experian. These are mostly commonplace, but for the avoidance of doubt, 'Retail Services' include the likes of dry cleaners, health & beauty, opticians and travel agents, whilst 'Leisure Services' include bars, cafes, fast-food, nightclubs and cinemas.
- 6.5 Nexus carried out the town centre health check survey exercises in June and August 2021, which were completed after the resumption of trading for retail stores following the Covid-19 'lockdown' and the resumption of in-store trading from April 2021, and trading for the hospitality industry in May 2021.
- 6.6 Health checks are both a physical exercise in walking the town centres to understand their make-up, constraints, and opportunities, as well as an exercise in understanding the views of local stakeholders.
- 6.7 While the NPPF does not provide a precise list of criterions to be used to assess the health of a centre, the Government's 'Town Centres and Retail' National Planning Practice Guidance (NPPG) of March 2014,

updated in July 2019, offers a helpful set of indicators. The NPPG explains these indicators should be monitored on a regular basis in order to judge the health of a centre and its performance over time:

- **Diversity of Uses** | Data on the diversity of uses in Uttlesford's centres was collated during the health check completed by Nexus in August 2021. The collected data includes the number, type and quantum of floorspace provided in these locations.
- **Proportion of Vacant Street Level Property** | Vacant properties were also identified during the 2021 health check. The volume of vacant floorspace within a centre can provide an indication of how well the centre is performing. However, it is important to acknowledge that a degree of vacancy is inevitable and indeed desirable. Some churn is expected in the market as units alter and change, as new businesses come in, and others leave. In this context, vacant units can be found in even the strongest of town centres. Equally, a low vacancy rate does not necessarily mean a centre is performing well; as the quality and performance of the occupied units may be relatively poor.
- Commercial Yields on Non-Domestic Property | Whilst this can be an indicator of town centre performance over time, data on commercial yields for Uttlesford's centres is not publically available at this time, as it is now only produced by ONS for major cities. Commercial rents provide a suitable alternative indication of the relative attractiveness of the area.
- **Customers' Views and Behaviour** | Information on customers' views is based on the results of the household survey data. Importantly, and as described at Chapter 4, the household survey undertaken by NEMS represents a demographically accurate sample of the population.
- Retailer Representation and Intentions to Change Representation | Information on the current strength of centres and retailer representation have been derived from Experian Goad Category Reports and other published sources.
- Commercial Rents | An examination of average prime rents to facilitate an understanding of shopping rents and investment yields.
- Pedestrian Flows | General footfall and pedestrian flows were observed by Nexus during site visits to
 the Centres. Nexus was able to obtain a comprehensive understanding of pedestrian flows through
 observation at varying times.
- Accessibility | Consideration of access to and around each centre was informed by the Nexus site
 visits. This was in addition to stakeholder engagement, and a desktop review of data pertaining to
 access to public transport and parking facilities. The accessibility of a centre is determined by the ease

and convenience of access by a variety of transport means including pedestrians, cyclists and disabled people.

- Perceptions of Safety and Occurrence of Crime | General perceptions of safety were gathered by
 Nexus during the site visits and supplemented by a review of existing data.
- **State of Town Centre Environmental Quality** | Consideration of the quality of the buildings and public realm in each of the centres was informed by Nexus' site visits to the centres.
- Balance between independent and multiple stores | Consideration of the balance of retailer representation was informed by Nexus' site visits to the centres, as well as Goad mapping.
- **Barriers to Entry** | Consideration of the extent to which there is evidence of barriers to new businesses opening and existing businesses expanding. Attention was given to the length of unit vacancies as per Goad Reports, as well as the size of units available to let, and insights provided through engagement with relevant stakeholders operating businesses within the centres.
- Opening Hours / Availability / Evening Economy | General understanding of the night time economy was informed by Nexus' site visits to the centres, stakeholder engagement, and a desktop review of various local businesses' opening hours.

Saffron Walden Town Centre

Description

- 6.8 Saffron Walden is the primary retail and leisure destination in the District, providing a range of services and amenities that are not widely available within the smaller settlements. The centre is located 12 miles north of Bishops Stortford.
- 6.9 Due the historic nature of this centre, the layout is informal and interesting, with several narrow side streets which add to its character. The main shopping streets are located on High Street, King Street, Hill Street and around Market Place, which acts as a focal point of the centre. The centre is entirely within a Conservation Area. Saffron Walden is classed as a 'Town Centre' within the Uttlesford Local Plan (2005).

The Corner Cupboard, King Street

View across Market Square

Public Realm, Hill Street

View along Market Row

Overall Composition

6.10 Saffron Walden is the largest centre in the District comprising of 221 units. The centre has a good mix of uses largely comprising independent retailers with a number of national multiples including Boots, Superdrug, Monsoon and Phase Eight, primarily located in King Street. Waitrose is the largest convenience store located to the south of the centre. Figure 27 provides an overview of Saffron Walden's composition at the time of the site visits in August 2021, compared to the UK averages (2021). It also contrasts the findings to the last health checks carried out for the Council in 2010.

Figure 28. Saffron Walden Town Centre - composition comparison chart (%)

6.11 Figure 29 maps the range of uses in the Town Centre. A larger version is contained at **Appendix D**.

Figure 29. Saffron Walden Composition Map

Key = Yellow (convenience), Orange (comparison), Red (retail services), Light blue (leisure services), Purple (financial and business services), Dark blue (vacant).

Convenience

- 6.12 The proportion of convenience goods units (7.2%) has remained consistent since 2010, and is marginally below the UK average of 8.3%. The centre also has a lower proportion of convenience floorspace (10.8%) compared to the UK average of 15.3%.
- 6.13 Qualitatively, the centre has a wide range of convenience units including butchers, bakers, and health food shops. The majority of these units are independent stores. The centre also features a Waitrose store (2,501 sq m net) to the south of the town centre. The town has two out-of-centre foodstores; a Tesco on Radwinter Road (3,196 sq m net) to the south east of the town, and an Aldi store (1,218 sq m net) on Thaxted Road to the south of the town.

Comparison

- 6.14 Comparison units account for the largest proportion of stores within Saffron Walden Town Centre, with 77 units (34.8%), which exceeds the UK average of 29.1%. This suggests that the centre is still performing well in terms of comparison goods offer, and this is borne out by the survey results highlighted in Section 4. Notwithstanding, in keeping with many town centres across the UK, Saffron Walden has seen a significant decrease in the number of comparison goods retailers since 2010, when they accounted for 54.1% of units in the centre.
- 6.15 The centre comprises largely independent stores with some national comparison retailers located primarily on King Street., including Boots, Superdrug, New Look, Phase Eight and Clintons.
- 6.16 The centre features a wide selection of different comparison units, including fashion, jewellers and homeware and charity shops, which would all be expected in the largest town centre in the District.

Services

- 6.17 The service sector (retail, leisure, financial and business services) has increased in presence since the 2010 health checks. Overall, services now account for 43.8% of units within the centre, compared to 32.0% in 2010.
- 6.18 Retail services account for 14.9% of the units in Saffron Walden, slightly below the UK average of 16.2%.

 Of the retail services provided in Saffron Walden Town Centre, it is notable that nearly two-thirds provide 'health and beauty' services.
- 6.19 The centre features a lower proportion of leisure units (16.7%) compared to the UK average of 24.7%. The leisure services currently present in the centre include a range of cafes, along with several public houses, two hotels, restaurants and takeaway units. Notably, Saffron Walden does not currently offer any increasingly popular 'experience-based' leisure activities such as indoor golf or escape rooms.
- 6.20 Financial and business services account for 12.2% of the centre's units and 12.9% of the floorspace. These figures are above the UK averages of 8.7% and 7.3% respectively. The centre's offer includes a wide range of banking options, as well as a number of estate agents.

Vacancies

- 6.21 At the time of the site visits in August 2021, there were 32 vacant units (14.5%), a higher proportion than the UK average (12.0%). However, it should be noted that there was evidence of several units being under alteration.
- 6.22 This figure has risen significantly since the health check undertaken in 2010 when 6.7% of units were observed to be vacant. The vacancies are spread throughout the centre, suggesting that there are no particular areas of concern.

Pedestrian Flows

6.23 During the site visits high pedestrian flows were observed throughout the centre, with no particularly quiet areas observed. The historic street pattern and highly walkable nature of the centre contributes to this. King Street and Hill Street were noted as having the greatest pedestrian flows.

Accessibility

- 6.24 There are a number of car parks available in Saffron Walden, all of which are located on the outskirts of the centre. These include:
 - Fairycroft Road (incl. Waitrose) 294 spaces
 - The Common 109 spaces
 - Rose and Crown

 36 spaces
 - Swan Meadow 394 spaces
- 6.25 All car parks are charged at £1.20 for a maximum of 3 hours. Further parking was also witnessed on Market Place at the time of the Nexus site visit. Car parks appeared to be well utilised.
- 6.26 High levels of traffic were noted along High Street, particularly at the Junction with King Street, although no congestion was noted at the time of the Nexus visit.
- 6.27 There is no train station in Saffron Walden. The closest station is 2 miles away at Audley End with a number of bus services connecting it to the centre.

- 6.28 A number of bus services link Saffron Walden to locations elsewhere in the sub-region, including Cambridge, Haverhill and Stansted Airport, as well as many other local towns.
- 6.29 Parts of the centre are pedestrianised. However, narrow pavements make navigating the centre by foot difficult in some places. Measures were noted on Hill Street to widen the pedestrian area using cones.
- 6.30 The results of the household survey found that 82.5% of respondents travelled to the town centre using private vehicles, whilst 13.9% had walked to the centre. 1.5% of respondents used the bus.

Perception of Safety

6.31 The centre was relatively busy at the time of the site visits, providing significant natural surveillance across the centre. The perception of crime in Saffron Walden is low. This is corroborated by data from crimerate.co.uk which notes that the incidence of crime in Saffron Walden was 63% lower than the Essex average in 2020.

Opening Hours

6.32 Saffron Walden benefits from a number of public houses and restaurants throughout the centre which ensures that an evening economy is in operation within this centre. With the exception of some convenience units, such as Waitrose, the remainder of the centre operates traditional opening hours.

Environmental Quality

- 6.33 Saffron Walden is a pleasant centre which appears to be well maintained and no litter evident at the time of the visits. A number of planters with attractive floral displays were witnessed throughout the centre along with heritage signage.
- 6.34 Attractive shopfronts and buildings were noted throughout the visit, in particular the Cross Keys Hotel, the Library in Market Place and the Corner Cupboard. Shop frontages throughout the centre were of good quality. However, a more consistent approach to shop frontages would be beneficial throughout the centre.
- 6.35 The street furniture was largely uncluttered and the pavements in relatively good condition, albeit very narrow in places as would be expected in a centre of its historic nature. Measures were noted on Hill Street to widen the pedestrian area using cones, though a more permanent solution should be sought to widen these areas.

Barriers to Entry

- 6.36 The majority of the centre is designated as a Conservation Area (designated 1968) and includes a number of listed buildings. Whilst this is undoubtedly a positive in terms of visitor attraction, it could also potentially act as a barrier to entry for new businesses as any alterations will have to demonstrate the preservation of the Conservation Area.
- 6.37 There are a number of vacant units in the Town Centre (32 no.). These are not concentrated in any particular area, which is a positive. However, it is notable that a number of vacant units were previously occupied by national multiple retailers. This could be considered a barrier to entry to other national multiples who may be concerned with the viability of the centre.

Customer Views & Behaviour

- 6.38 When asked what they most liked about Saffron Walden Town Centre, the most common responses from the NEMS household survey (Q29) were 'choice and range of shops' (35.0%), the 'environmental quality of the centre' (19.9%) and 'the market' (6.1%).
- 6.39 The top three responses as to what would encourage respondents to visit the centre more often (Q30) were, 'improved choice and range of shops' (15.2%), 'more parking' (11.7%) and 'cheaper parking' (9.0%).

Summary

- 6.40 In summary, our health-check of Saffron Walden Town Centre indicates that:
 - The provision of convenience goods units is slightly below the UK average, whilst the provision of comparison goods units is well above the UK average.
 - The centre is increasingly accented towards independent retail.
 - There has been a notable increase in service provision in the town centre. Services account for 43.8% of units within the centre, compared to 32.0% in 2010. Financial services and health and beauty services are especially prominent.
 - The centre has a higher number of vacant units (14.5%) compared to the UK average (12.0%). There are though no areas of concentrated vacancies, and there was evidence of a number of units being refurbished at the time of our surveys.

• In terms of improvements, improved visitor signposting to the car parks would be beneficial, and whilst measures were noted on Hill Street to widen the pedestrian area using cones, a more permanent solution should be sought. A shopfront strategy could be implemented to assist in bringing all shopfronts up to the high standards set in general.

Great Dunmow Town Centre

Description

- 6.41 Great Dunmow is an historic market town located equidistant between Braintree and Bishops Stortford. The retail provision in the centre is primarily located along High Street and Stortford Road.
- 6.42 Great Dunmow is classed as a 'Town Centre' within the Uttlesford Local Plan (Adopted 2005).

View north from War Memorial on High Street

Attractive shopfronts, High Street

View along High Street

Overall Composition

6.43 Figure 30 provides an overview of Great Dunmow's composition at the time of the site visits in August 2021, compared to the UK averages (2021), as well as a comparison to previous centre surveys carried out in 2010.

Figure 31. Great Dunmow Composition Map

Key = Yellow (convenience), Orange (comparison), Red (retail services), Light blue (leisure services), Purple (financial and business services), Dark blue (vacant).

6.44 Great Dunmow comprises 96 units, and is the second largest centre in the District. The centre predominately comprises independent retailers with a limited number of national multiples including Boots, as well as William Hill and Coral in terms of betting shops, and Barclays and Nationwide for financial services. Services account for almost two-thirds of the units in the centre.

Units (%) 2021 UK Avg. (%) 2021

Figure 32. Great Dunmow - Centre Composition Comparison Chart

Convenience

6.45 The provision of convenience goods units in Great Dunmow is in line with the UK average of 8.3%. The main offer is a Co-Operative foodstore, located behind the high street (725 sq m net). The convenience offer also includes a One Stop along with other smaller, independent convenience units including 2 butchers and 2 delicatessens.

Comparison

6.46 The centre has seen a significant decrease in the number of comparison units since 2010, at which point, there were 34 units (35.4%). In 2021 comparison units accounted for 24 units (25.0%), which is now lower than the UK average of 29.1%.

6.47 The majority of the comparison units are independent retailers offering a range of goods. The comparison offer comprises a mix of charity shops, sports goods, chemists, carpet and flooring shop, as well as antiques and gift shops. However, the centre lacks in fashion and footwear stores.

Services

- 6.48 Services account for 62.5% of units within Great Dunmow, which significantly exceeds the UK average of 49.6%. The services provision for the centre has increased since the previous health-check, when they accounted for 51.0% of units in the centre.
- Retail services make up 24% (23) of the units, higher than the UK average of 16.2%. A majority of the retail services are made up of the 'health and beauty sector', which account for 60.8% of the retail services.
- 6.50 Leisure services account for 24.0% of the centre, which is comparable with the UK average of 24.7%. The leisure services within the centre comprise cafes, fast food and takeaways, as well as restaurants, public houses and hotels.
- 6.51 The centre has a higher percentage of financial and business services (13.5%) compared to the UK average of 8.7%. The financial and business services include a number of estate agents, as well as financial advisors and banks.

Vacancies

6.52 The number of vacant units within the centre has increased marginally since 2010. However, the vacancy rate in the centre remains low at only 5.3%. This is significantly lower than the UK average of 12.0% and is positive in terms of the vitality and viability of this centre. The few vacancies there are, are spread throughout the centre, and as a result, there are no particular areas of concern in Great Dunmow.

Pedestrian Flows

6.53 The highest areas of pedestrian flow were witnessed along High Street, primarily between New Street and Market Place.

Accessibility

- 6.54 Great Dunmow Town Centre does not benefit from a dedicated train station; the nearest station being in Stansted Mountfitchet.
- 6.55 There are a number of car parks in Great Dunmow, all of which charge for parking. On-street parking is limited throughout the centre.
 - Angel Lane 31 spaces (maximum stay 3 hours for £1.20)
 - Chequers Lane 64 Spaces (maximum stay 3 hours for £1.20)
 - New Street 11 Spaces (maximum stay 3 hours for £1.20)
 - White Street 172 spaces (up to £3.50 for 9 hours, with monthly, quarterly, bi-annually or annual rates are also available).
- 6.56 The centre also benefits from several bus services, connecting local residents to a number of locations including Saffron Walden, Braintree, Chelmsford and Stanstead Airport. In addition to these services, the 315 service offers a more localised service to the immediate surrounding villages.
- 6.57 Continuous traffic was noted on High Street at the time of the Nexus site visits, although no congestion was witnessed. Car parks appeared to be well utilised, with the availability of more parking stated as something that would encourage more visits to the centre in the household survey (see below).
- 6.58 The results of the household survey showed that a 79.0% of people questioned travelled to the centre by private vehicle as either the driver or passenger. A significant number of people stated that they walked into the town centre (19.1%). Less than 1% of people though accessed the centre using public transport.

Perception of Safety

- 6.59 The centre was relatively busy at the time of the site visits, providing significant natural surveillance across the centre. The perception of crime in Great Dunmow was low when the site visits were carried out. A small amount of graffiti was witnessed on High Street.
- 6.60 This is verified by crimerate.co.uk who recorded that the prevalence of crime in Great Dunmow in 2020 was 33% below the Essex average.

Opening Hours

6.61 The evening economy comprises several restaurants, hotels and drinking establishments. A number of takeaways are also located in the centre. The supermarkets in the centre are open beyond conventional opening hours of 9am - 5pm, with Co-Op and One Stop open until 10pm.

Environmental Quality

- 6.62 Great Dunmow is an attractive centre and has a large number buildings of notable quality, including the Old Town Hall, Square 1 restaurant and the Saracens Head Hotel, which enhance the character of the area and result in a pleasant visitor experience. A large number of the shop frontages are of good quality.
- 6.63 Heritage wayfinding signage was noted at the time of the visit. However, the centre was lacking green relief in parts and improvements within the centre could include planting/hang baskets and inclusion of seating where the pavement width allows, in particular, the area by the War Memorial, which could act as more of a focal point for the centre. Pavements, although largely free from litter at the time of visits, were noted to be in need of improvement.

Barriers to Entry

- 6.64 The centre offers a number of car parks, but lacks on street parking for short stay visits. This was raised as a significant barrier to entry in the Great Dunmow Neighbourhood Plan (see Section 2).
- 6.65 Whilst the low vacancy rate in the town centre is good news, it may also mean that a lack of available space (by unit size) could be seen as a barrier to entry. Planning applications seeking amalgamations or sub-divisions to reflect market demand should be considered carefully on their merits.
- 6.66 Similar to Saffron Walden, the centre in its entirety is designated as a conservation area (designated 2007) and includes a number of listed buildings. Whilst this helps protect its attractive nature, this could potentially represent a barrier to entry for new businesses as any alterations will have to demonstrate a lack of harm to the historic environment.

Customer Views & Behaviour

6.67 When asked what they most liked about Great Dunmow Town Centre, the most common responses from the NEMS household survey were 'choice and range of shops' (30.2%), 'environmental quality of the centre' (11.4%), and 'friendly atmosphere' (4.8%).

6.68 The top three responses to what would encourage respondents to visit the centre more often asked during the household survey were 'improved choice and range of shops' (31.5%), 'more parking' (12.2%) and 'improved non-food shops in the town centre' (11.3%).

Key Issues

- 6.69 In summary, our health-check of Great Dunmow Town Centre indicates that:
 - The composition of the Town Centre is broadly in line with UK averages.
 - There are a very low number of vacant units (5.3%). This is a feature of health, but can also mean that it is difficult for new entrants to find an appropriate unit. The Council should listen to market signals on whether amalgamations or sub-divisions are appropriate.
 - The centre would benefit from public realm improvements, including a general 'greening' of the centre, and perhaps creating a focal area by the War Memorial.
 - The lack of availability of fee car parking is clearly an issue for traders and local residents, and is a feature of the made Neighbourhood Plan. If the town centre started to exhibit features of decline, then no doubt the focus would sharpen on this issue.
 - Great Dunmow is an attractive, characterful centre with a pleasant shopping environment.

Stansted Mountfitchet Local Centre

Description

- 6.70 Stansted Mountfitchet is located to the west of the District and is under 10 miles from Saffron Walden. The centre provides a range of services and is predominantly surrounded by residential dwellings. The majority of the units can be found in two locations; between the east end of Chapel Hill and the south western side of Grove Hill and also along the B1383 between Chapel Hill and Clarence Road.
- 6.71 Stansted Mountfitchet is classed as a 'Local Centre' within the Uttlesford Local Plan (Adopted 2005).

View of Kings Arms Public House from Mountfitchet Castle Street

Key = Yellow (convenience), Orange (comparison), Red (retail services), Light blue (leisure services), Purple (financial and business services), Dark blue (vacant).

Figure 35. Stansted Mountfitchet (Cambridge Road) Composition Map

Key = Yellow (convenience), Orange (comparison), Red (retail services), Light blue (leisure services), Purple (financial and business services), Dark blue (vacant).

6.73 Stansted Mountfitchet is a Local Centre comprising 51 units split between two locations as identified above. The first location is anchored by the junction linking Chapel Hill and Grove Hill, which features The Kings Arms public house and mixed use convenience store, pharmacy and estate agent with a large car park to the rear. This is also positioned within close proximity to the train station. The second location is relatively linear in structure with a range of unit types positioned along the main road.

Figure 36. Centre Composition Comparison Chart

Convenience

- 6.74 There are 6 convenience units within Stansted Mountfitchet, making up 11.8% of all units, which is slightly higher than the UK average of 8.3%. The number of convenience units within the centre has dropped by two units (6.8%) since 2010.
- 6.75 The centre features a small Co-op supermarket by the car park to the north east of the train station, as well as a Tesco Express on Cambridge Road. The centre also features an independent bakery, butchers, petrol station, and greengrocers.

Comparison

- 6.76 There are 6 comparison units within the centre, which make up 11.8% of all units, lower than the UK average of 29.1%. The number of comparison units within the centre has fallen from 25.6% in 2010 to 11.8% in 2021. As such, Stansted Mountfitchet now has a lower percentage of units compared to the UK averages.
- 6.77 The comparison units comprise largely independent retailers and with the range of shops, including: florists, printing shop and design shop.

Services

- 6.78 Overall, services equate to 74.5% of units within Stansted Mountfitchet. This has increased by 23.3% since the 2010 survey. There are 14 retail units (27.5%), 20 leisure services (39.2%) and 4 financial and business services (7.8%) within the centre.
- 6.79 There are numerous health and beauty units within the centre and a number of barber shops. Stansted Mountfitchet has a greater proportion of retail services (27.5%), compared to the UK average (16.2%).
- 6.80 The centre also has a higher proportion of leisure services (39.2%) compared to the UK average (24.7%). The leisure offer includes the Kings Arms public house, a social club, bars and restaurants as well as a large number of takeaways. For a centre of its size, the centre has an extensive service offer, which is no doubt linked to commuter custom to/from the mainline train station.
- 6.81 Financial and business services equate to 7.8% of the centre, which is slightly lower than the UK average (8.7%).

Vacancies

6.82 Stansted Mountfitchet has seen a reduction in vacant units (2.0%), compared to the previous 2010 survey (4.7%). The proportion of vacant units in the centre is significantly below the UK average of 12%.

Pedestrian Flows

6.83 During the Nexus site visits, it was observed that that both parts of the centre were quiet during daytime hours. The Tesco Express on Cambridge Road attracted the highest footfall.

Accessibility

- 6.84 Stansted Mountfitchet has a train station just outside the first town centre boundary near the Kings Arms public house. The train line connects Stansted Mountfitchet to London Liverpool Street and numerous other locations. It is also located approximately 5 miles from Stansted Airport.
- 6.85 Parking is available in the centre at the locations below. There are also on street parking spots throughout the centre, although there are extensive 'resident permit' zones. At the time of the visit sufficient parking was observed to be available.
 - Lower Street 163 spaces (maximum stay 3 hours for £1.20)
 - Crafton Green 36 spaces (maximum stay 3 hours for £1.20)
 - Station car park 68 spaces (£5 for 2 hours)
- 6.86 A regular bus service links the centre to the train station and the nearby airport.
- 6.87 At the time of the visits, traffic was not considered to be heavy and there was no significant congestion.
- 6.88 The results of the household survey showed that only half of respondents travel to the centre by private vehicle (50.6%), whilst 47.6% had last walked to the centre. Public transport is seldom used.

Opening Hours

6.89 The centre has numerous public houses, bars and brasseries and a social club as well as restaurants catering for a number of cuisines. With the exception of the two small supermarkets, the remainder of the town maintains relatively traditional opening hours.

Environmental Quality

- 6.90 Stansted Mountfitchet (Lower Street) is an attractive centre; with many attractive buildings throughout including the Stanstead Mountfitchet Social Club, the Kings Arms Public House and a number of dwellings.

 This area of the centre is within a Conversation Area.
- 6.91 In comparison, the environmental quality of the Cambridge Road portion of the centre does not benefit from the same historic character.
- 6.92 There was a noticeable lack of trees or green infrastructure throughout the centre as it is mainly comprised of rows of terraced units. However, some hanging baskets attached to attractive heritage lampposts along Lower Street were noted. Improved signage in both centres would also enhance the character of the area.
- 6.93 Pavements were found to be litter free at the time of the visit. However, the overall quality of the paving would benefit from improvement.
- 6.94 The height and size of storefront fascia boards was relatively consistent throughout the centre, and condition of the shopfronts relatively good.

Barriers to Entry

- 6.95 The lack of clear development sites and available premises may be factors that may reduce the potential for new traders to enter the centre.
- 6.96 It is evident that the centre is also heavily reliant on its train station, which serves the extensive service economy. It will be important to monitor the health of the centre now that working patterns have changed following the pandemic in order to ascertain whether there has been any significant impact on trade.

Customer Views & Behaviour

- 6.97 When asked what they most liked about Stansted Mountfitchet Local Centre, the most common responses from the NEMS household survey were 'choice and range of shops' (24.0%), and 'environmental quality of the centre' (8.7%), and 'friendly atmosphere' (8.3%).
- 6.98 The top three responses to what would encourage respondents to visit the centre more often asked during the household survey stated 'improved choice and range of shops' (12.7%), 'improved food shops in the town centre' (10.2%), and 'cheaper parking (7.7%).

Summary

- 6.99 In summary, our health-check of Stansted Mountfitchet Local Centre indicates that:
 - The centre has two small foodstores, but is very accented towards the provision of services which account for 74.5% of all units within Stansted Mountfitchet.
 - Stansted Mountfitchet has seen a reduction in vacant units just 2.0% which is an indicator of very good health. However, the centre is likely to be reliant on commuters utilising the train station, and this should be carefully monitored in light of changed working patters following the pandemic.
 - Environmental improvements could be made to the centre, including opportunities for greenery and pavement improvements.

Thaxted Local Centre

Description

- 6.100 Thaxted is located to the east of the District and is approximately seven miles from Saffron Walden. The centre provides a range of services and is surrounded by predominantly residential dwellings. The majority of the units are located along Town Street and Watling Street. The focal point of the centre is the Guildhall (pictured below).
- 6.101 Thaxted is classed as a 'Local Centre' within the Uttlesford Local Plan (Adopted 2005).

View towards Thaxted Guildhall along Town Street

Gift shop, Town Street

Attractive shop fronts, Town Street

View south east along Town Street

Overall Composition

6.102 Figure 37 provides an overview of Thaxted's composition at the time of the site visits in August 2021, compared to the UK averages (2021). Thaxted was not subject to health-check as part of previous Retail Studies and so there is no comparable composition data form earlier years.

Figure 37. Thaxted Local Centre Composition

		UK Average Jun-21			
Categories	Units 2021	Units 2021	Units 2021		
	(#)	(%)	(%)		
Convenience	3	13.6	8.3		
Comparison	5	22.7	29.1		
Retail Services	6	27.3	16.2		
Leisure Services	6	27.3	24.7		
Fin. / Bus. Services	0	0.0	8.7		
Vacant	2	9.1	12.0		
Total	22	100	100		

Source: Nexus Planning 2021

Figure 38. Thaxted Composition Map

Key = Yellow (convenience), Orange (comparison), Red (retail services), Light blue (leisure services), Purple (financial and business services), Dark blue (vacant).

Figure 39. Centre Composition Comparison Chart

Convenience

- 6.103 There are 3 convenience units within Thaxted, making up 13.6% of all units. This is higher than the UK average of 8.3%.
- 6.104 The centre features a Nisa Local, a butchers and a tobacconist.

Comparison

- 6.105 There are 5 comparison units within the centre, which make up 22.7% of all units. As such, Thaxted has a lower percentage of units compared to the UK average of 29.1%.
- 6.106 The comparison units comprise largely independent retailers. Considering its modest size, it contains a good range of shops, including hardware stores, a pharmacy, charity shop and household goods shop.

Services

6.107 Overall, services equate to 54.6% of units within Thaxted. There are 6 retail units (27.3%) and 6 leisure service units (27.3%) within the centre. There are no financial or business service units within the centre.

Vacancies

6.108 Thaxted has a total of 2 vacant units, equating to 9.1% of the total units in the centre. The proportion of vacant units in the centre is below the UK average of 12%.

Pedestrian Flows

6.109 During the Nexus site visits, it was observed that there was a steady flow of footfall along Town Street.

However, this tailed off towards the north of Town Street where the pavements became narrower.

Accessibility

- 6.110 Thaxted does not have a train station.
- 6.111 There is a short stay car park located to the rear of Town Street. There is also space for some on street parking along Town Street and Watling Street.
- 6.112 A regular bus service passes through the town, linking it with nearby towns and centres.
- 6.113 At the time of the visit, no heavy traffic was noted.
- 6.114 The results of the household survey showed that 71.1% of people usually travel to the centre by private vehicle, while 23.7% had walked to the centre. A further 5.2% travelled to the centre by bus.

Opening Hours

6.115 The centre has a public house which operates longer hours. However, the remainder of the Local Centre maintains traditional daytime opening hours.

Environmental Quality

- 6.116 Thaxted is a small and attractive centre. However, there was a noticeable lack of trees or green infrastructure throughout the centre. There is some greenspace adjacent to the St Johns Baptist Church at the top of Town Street, however this is positioned on the edge of the centre.
- 6.117 Pavements were found to be in relatively good condition, although narrowed near the top of Town Street.
- 6.118 The height and size of storefront fascia boards was relatively consistent throughout the centre, and the shopfronts were well kept or restored to their historical state.

Barriers to Entry

6.119 The centre in its entirety is designated as a Conservation Area (designated 1968) and includes a number of listed buildings. As a result, whilst the quality of the environment in Thaxted features heavily in its overall attraction, this could potentially represent a barrier to entry for new businesses as any alterations will have to demonstrate a lack of harm to the historic environment.

Customer Views & Behaviour

- 6.120 When asked what they most liked about Thaxted Local Centre, the most common responses from the NEMS household survey were 'environmental quality of the centre' (33.0%), 'choice of leisure facilities' (12.1%), and 'choice and range of shops' (3.6%).
- 6.121 There were very few dislikes mentioned in Thaxted. The top three responses to what would encourage respondents to visit the centre more often asked during the household survey stated 'more parking' (6.0%), 'improved leisure facilities' (3.6%) and 'better environment' (3.5%).

Summary

6.122 In summary, our health-check of Thaxted Local Centre indicates that the centre caters very well for its local catchment area. The range of goods offered is limited, but the household survey indicates that there is little discontent with any aspects of the centre.

7 Policy Recommendations

- 7.1 In this section of the report, and based on our findings in the preceding sections, we provide commentary on the following:
 - A summary of what floorspace capacity might exist in terms of meeting Uttlesford's convenience goods, comparison goods and food/beverage goods requirements to 2040;
 - Drawing on a range of qualitative factors evidenced by this Study, how that capacity might translate into a strategy for accommodating growth;
 - A review of existing retail policies and how those might require updating in the next iteration
 of the Plan; and
 - Recommendations in terms of the **future monitoring** of retail matters across the District.

Identified Retail and Food/Beverage Capacity

7.2 Section 4 of this Study described the empirical survey work undertaken and summarised the market share findings in terms of where residents of the Study Area (Zones 1-6) and the District (Zones 1-3) carry out their convenience and comparison goods shopping. Applying those market shares to census-based population and expenditure estimates for the Study Area geography, capacities for additional convenience, comparison and food/beverage floorspace over the Plan period to 2040 were estimated. These are summarised in Figure 40.

Figure 40. Uttlesford District – Floorspace Capacity Projections to 2040 (Sq m net)

Year	Convenience Goods	Comparison Goods	Food/Beverage
2025	4,200 – 6,100	-300500	540
2030	4,500 – 6,600	-300400	1,140
2035	4,900 – 7,200	100	1,610
2040	5,000 – 7,300	500 - 800	2,150

Strategy for Accommodating Growth

- 7.3 At the outset, given current economic uncertainties and, more relevantly, pressures on the retail sector, we would stress the need to treat long-term forecasts with caution. As highlighted within the PPG ¹⁴: "Given the uncertainty in forecasting long-term retail trends and consumer behaviour, this assessment may need to focus on a limited period (such as the next five years) but will also need to take the lifetime of the plan into account and be regularly reviewed." (our emphasis)
- 7.4 Additionally, capacity does not equate to need. Need is more than just a quantitative measure; it should also involve qualitative considerations around issues such any residents' dissatisfaction with the current level of provision, and the potential impacts of realising capacities on the ground from our health check work. Fundamentally, capacity modelling should not be seen as an absolute; it is a quide to a Plan-led approach.
- 7.5 Any consideration of allocations for new retail floorspace should take into account an assessment of the performance and vitality and viability of a centre in order to ensure that any identified capacity meets both a quantitative and qualitative need, and does not harm existing businesses.
- 7.6 Taking each of the above factors into account, we consider that the District might benefit from a further main foodstore. The capacity analysis indicates that, even taking the advisory approach of looking to the short-term, there is capacity for between 4,200 6,100 sq m of net convenience floorspace over the period to 2025. This capacity is largely generated by the over-trade of existing out-of-centre foodstores within the District itself.
- 7.7 In terms of where a new foodstore might be located, we consider it unlikely that there will be market demand (nor likely a suitable site) for a large foodstore in either Stansted Mountfitchet or Thaxted. Saffron Walden is well provided for in terms of the combined offer of Waitrose in the Town Centre and Tesco and Aldi outside of the Town Centre.
- 7.8 The most obvious location is therefore Great Dunmow. The town relies heavily on the out-of-centre Tesco, which trades extremely well. The Town Centre has though shown evidence of decline in terms of both convenience and comparison goods market share (see Figures 15 and 22) and, even if qualitative improvements were made to the small Co-op store in its Town Centre, this would be unlikely to address the capacity we have identified.

¹⁴ (Town Centres and Retail) Planning Practice Guidance, Paragraph: 004, Reference ID: 2b-004-20190722

- 7.9 We therefore recommend that the Council seeks to identify a suitable site in, or on the edge of, Great Dunmow Town Centre for the provision of a foodstore in order to address the needs of the resident population over the period to 2025 and beyond. Discussions may also be advisory with the Co-op over whether they want to expand their presence.
- 7.10 Any remaining convenience goods floorspace capacity should be used to bolster existing or proposed stores within existing centres in the retail hierarchy, as well as the planned locations of residential and employment allocations in the development strategy in the emerging Local Plan.
- 7.11 Turning to comparison goods, it is evident that macro-economic conditions in general, and retail trends towards online shopping, have re-shaped the viability of the sector. As a result, our forecasts show negative floorspace capacity up to 2030. On this basis, we do not recommend that the Council seeks to allocate any floorspace for additional comparison goods over the short-medium term, and instead formulates a policy base on which to preserve and enhance existing floorspace in its town centres.
- 7.12 The food/beverage sector has been hard-hit by the pandemic and there have been a number of vacancies created as national multiple chains have been forced to close. Our observation is that Uttlesford has not seen the brunt of this, as much of its food-beverage offer is independent. Notwithstanding, our expectation is that there will be a quantum of vacant floorspace in this sector which can be used to accommodate new start-ups. This should be examined by any applicant seeking new floorspace outside of town centres before the Council seeks to approve any such space outside of town centres. Taking this into account, the relatively small quantum of floorspace capacity we have identified (1,140 sq m by 2030) does not, in our view, warrant any specific allocations in the emerging Plan.

Retail Policy Recommendations

- 7.13 As summarised in Section 3, the current Local Plan (2005) pre-dates the NPPF and its retail policies will need a thorough overhaul under the emerging Local Plan.
- 7.14 Based on the findings of our report, we would recommend that emerging policies consider each of the following:
 - Retail Hierarchy Paragraph 86 of the NPPF invites local authorities to define a network and hierarchy of town centres in order to promote their long-term vitality and viability. There is no

retail hierarchy set out in the 2005 Plan and so it will be necessary to set out a hierarchy for the District in the emerging Plan. This should be evidence-based and should contain a description of the anticipated role and function of each tier of the hierarchy. It is clear from the withdrawn Regulation 19 Plan in 2019 that detailed thought has already been given to a retail hierarchy under draft Policy RET1, which would have seen the creation of a three-tier hierarchy featuring Saffron Walden and Great Dunmow as 'Town Centres', Stansted Mountfitchet and Thaxted as 'Local Centres' and a number of 'proposed local centres' elsewhere. The empirical findings of this Study, and in particular the relative market shares attracted to each destination, should be utilised to support that suggested hierarchy.

Retail Impact Assessment – The sequential test forms part of the NPPF and we would suggest that any future town centre policies reflect the requirements of the NPPF on the sequential test; namely that it should only apply to applications which are neither in an existing centre nor in accordance with an up-to-date plan; and to reflect the fact that it is not applied to applications for small scale rural offices or other small scale rural development.

In accordance with the NPPF, retail, office and leisure developments greater than 2,500 sq m proposed in edge-of-centre and out-of-centre locations will be subject to the assessment of the impact criteria set out by Paragraph 90.

Where appropriate, Local Authorities are entitled to identify local thresholds in accordance with the following considerations identified within the PPG ('Town centres and retail', Paragraph 15):

- scale of proposals relative to town centres;
- the existing viability and vitality of town centres;
- cumulative effects of recent developments;
- o whether local town centres are vulnerable;
- o likely effects of development on any town centre strategy; and
- o impact on any other planned investment.

Given the smaller size of Uttlesford's town centres, and the large quantum of independent retailers, we consider it likely that the Council may wish to consider implementing an impact threshold at below the NPPF standard of 2,500 sq m. In doing so, the Council would need an

appropriate evidence base. The findings of this Study should be used in this regard and the Council may wish to consider a specific exercise in re-examining a suitable threshold. To this end, we note that emerging Policy RET2 under the withdrawn Regulation 19 Plan in 2019 had a suggested threshold of 1,000 sq m. This looks sensible in our estimation, though this threshold should be re-tested for its soundness under a re-consideration of the Plan policies. Such an assessment would incorporate the market share and health-check findings of this Study, alongside any other economic or market considerations at that point in time, and consider whether the 1,000 sq m threshold remained appropriate.

We would stress that whilst a locally set threshold would require the submission of an impact assessment for all edge-of-centre and out-of-centre developments exceeding the recommended thresholds, national guidance dictates that the impact test should be undertaken in a proportionate and locally appropriate way, commensurate to the scale of development proposed.

The level of detail would typically be agreed with Council officers during the pre-application process in order to avoid overly onerous requirements that may otherwise restrict and delay development opportunities from coming forward.

• Town Centre Boundaries – In order to enact the sequential and impact test set out in the NPPF, it is necessary to appropriately define Town Centre boundaries. A boundary is defined for Thaxted in its Neighbourhood Plan, as set out at Section 2. The Council had also defined Town Centre boundaries for its Town Centres and Local Centres under the withdrawn Regulation 19 Plan. This Study can be utilised to examine the composition of each centre (see Section 5, and also Appendix D) in order to establish whether any adjustments should be made to the previously proposed boundaries.

It may also be appropriate to define Primary and Secondary Shopping Frontages. The context for these definitions has changed since the introduction of Class E, as previously such definitions were used to categorise the range of former 'A-class' uses which were permissible or otherwise. This was the approach being take under Policy RET3 of the withdrawn Regulation 19 Plan. We explore below further thoughts on how Primary and Secondary Frontages may still be relevant to consideration of uses/sub-division/amalgamation.

• Class E and 'meanwhile' uses – As highlighted in Section 2, flexible working practices and new formats should be encouraged through planning policies supporting the amalgamation or subdivision of existing town centre units and workspace (where such development results in little loss of net floorspace, but results in a better standard of retail or office accommodation etc.) to encourage investment. Where developments within the town centre are to be carried forward, we would suggest a flexible approach to the provision (or re-provision) of retail floorspace, reflecting the fact that changes of use across Class E are no longer defined as development.

Nonetheless, Class E of the Use Class Order introduces a situation that will enable retail uses to occupy non-retail Class E premises in out of centre locations, circumventing any relevant 'town centre first' policies. As such, and where there is a risk that an alternative use within Class E (such as retail) would impact on the health of surrounding centres, the Council should attach conditions to the grant of planning permission in <u>out of centre</u> locations to restrict the use to that applied for.

The Council may also wish to identify aspects of this Study that would form part of an evidence base for any Article 4 directions for future Permitted Development Rights that would result in the loss of Class E floorspace, particularly in the town centres.

We would also suggest that the Council considers the suitability of adopting a policy that would assist in enabling the re-occupation of longstanding vacant units in the centres that may no longer be fit-for-purpose as retail units, and would benefit from change of use to an alternative town centre use that would support the overall vitality and viability of the centre (including those outside of Class E, such as pubs, bars cinemas and music venues). Such a policy could require evidence of a continuous period of vacancy and marketing (in our experience, an 18-month period is often required) demonstrating that the unit does not have a realistic prospect of being occupied in its current use and would benefit from occupation as an alternative main town centre or residential use. This would have the added benefit of consolidating the retail provision where it is most in demand, ensuring that the town centre remains competitive.

Policy support should also be provided for 'meanwhile' uses to temporarily occupy vacant units by occupiers seeking to test new business concepts, pop-up stores and event spaces where they support the vitality and viability of the town centre. Other complimentary initiatives that could benefit from policy support could include the construction of click and collect 'hubs' or lockers,

and the use of outdoor space for public events (as recently consulted on as a Permitted Development right¹⁵).

It would be important that any policies aimed at re-occupying vacant units, alongside encouraging meanwhile units, worked appropriately in tandem. Our anticipation would be that meanwhile uses (presumably secured by Planning Condition) would not constitute a use which would re-start the clock on the 18 month vacancy period, in order to ensure that property owners were nor discouraged from exploring such uses.

Monitoring Retail Health

- 7.15 Nexus carried out town centre health checks across Uttlesford in June and August 2021. These exercises were completed following the resumption of trading retail stores following successive 'lockdowns' across 2020 and 2021 and social distancing measures associated with the Covid-19 pandemic.
- 7.16 Notwithstanding our up-to-date empirical evidence, the global and UK economy is undergoing a significant change at the time of writing, on the back of the Covid-19 pandemic, and the impact of Brexit, which is not yet fully known. Due to the changing circumstances affecting both retail and leisure markets during the course of 2020 and 2021, we recommend that the Council seeks to monitor the overall situation regarding its retail centres carefully. Specifically, we have noted that the heavily accented service-economy of Stansted Mountfitchet may be vulnerable to changes in commuter working patterns, and that the centre should therefore be carefully monitored.
- 7.17 The Council may seek to put in place a further 'light touch' review of the health of its centres, and the prevailing economic data available, to support the emerging Local Plan ahead of an Examination in Public.

¹⁵ Government launches public consultation to make outdoor measures for high streets permanent, September 2021

Glossary of Terms

Bulky goods: Goods of a large physical nature (for example DIY, furniture, carpets) that

sometimes require large areas for storage or display.

Source: Planning Portal

Capacity: Forecast resident spending within the catchment area, with which to

support existing and additional retail floorspace.

Source: Planning Portal

Comparison Goods: Retail items not bought on a frequent basis, for example televisions and

white goods (fridges, dishwashers etc.)

Source: Planning Portal

Convenience Goods: Everyday essential items, such as food.

Source: Planning Portal

Edge-of-Centre: For retail purposes, a location that is well connected to, and up to 300

metres from, the primary shopping area. For all other main town centre uses, a location within 300 metres of a town centre boundary. For office development, this includes locations outside the town centre but within 500 metres of a public transport interchange. In determining whether a site falls within the definition of edge of centre, account should be taken of

local circumstances.

Source: NPPF

Expenditure per Capita: The amount of money spent on retail goods per person in each Zone across

the Study Area.

Expenditure: Average annual expenditure levels for various forms of goods, multiplied

by the population within the defined Study Area.

Experian Goad: Experian Goad is a retail property intelligence system that helps retail

developers, property investors, planning professionals, and commercial agents to identify profitable locations for retail property development and investment projects. It offers comprehensive retail location plans and easy to use reports covering over 3,000 shopping areas in the UK and Ireland.

Experian (MMG3): A population, expenditure and socio-demographic dataset that utilises the

2011 Census release, projected forward by using growth rates derived from Office for National Statistics projections and current age and gender

estimates.

Financial & Business Services: An Experian Goad category comprising the likes of banks, building

societies, employment agencies, legal services, estate agents and business

services.

Source: Experian Goad

Floorplate: Defined as the physical rentable area over a single floor; sometimes called

the footprint.

Goad Plans: A plan showing a bird's eye view of a retail centre including the exact

location of all retail outlets and vacant premises, fascia name, retail category, and floor space. Key location factors such as pedestrian zones, road crossings, bus stops and car parks are also featured, allowing you to instantly assess the site quality of existing or prospective store locations.

Source: Experian

Independent Retailers: Retailers with less than ten outlets/ stores.

Source: Experian

Leisure Services: An Experian Goad category for town centre leisure units which includes

bars, cafes, cinemas, nightclubs, takeaways, hotels, public houses and restaurants. For clarity, it does not include facilities for leisure pursuits e.g.

sports centres, swimming pools or health & fitness clubs.

Source: Experian Goad

Main Town Centre Uses: Retail development (including warehouse clubs and factory outlet centres);

leisure, entertainment and more intensive sport and recreation uses (including cinemas, restaurants, drive-through restaurants, bars and pubs, nightclubs, casinos, health and fitness centres, indoor bowling centres and bingo halls); offices; and arts, culture and tourism development (including theatres, museums, galleries and concert halls, hotels and conference

facilities).

Source: NPPF

Market Share: The proportion of residents that visit a particular retail destination, derived

from household survey results.

National Multiple: Defined as retailers with ten or more outlets/ stores.

Source: Experian

Prime Unit: 'Prime' is a widely used term within real estate investment circles to

describe building and location quality. There are no universally agreed definition, however, and no consistency in the distinctions applied to prime

or non-prime property.

Source: Colliers

Primary shopping area: Defined area where retail development is concentrated.

Source: NPPF

Retail Floorspace: Total floor area of the property that is associated with all retail uses in

square metres. May be expressed as a net figure (the sales area) or in gross

(including storage, preparation and staff areas).

Source: Planning Portal

Retail Impact: The potential effects of proposed retail development upon existing shops.

Source: Planning Portal

Retail Services: An Experian Goad category comprising the likes of dry cleaners, health &

beauty, opticians, photo processing, post offices and travel agents.

Source: Experian Goad

Sequential Approach: A planning principle that seeks to identify, allocate or develop certain types

or locations of land before others. For example, brownfield housing sites before greenfield sites, or town centre retail sites before out-of-centre

sites.

Source: Planning Portal

Sales Density: Turnover, per square metre. Various retail planning sources such as

GlobalData UK Food & Grocery Company Briefing Reports and Mintel Retail Rankings provide average (or 'benchmark') sales densities for

national multiple convenience retailers.

Special Forms of Trading: Special forms of trading (SFT) are defined as sales via the internet, mail

order, stalls and markets, vending machines, door-to-door and telephone sales, including online sales by supermarkets, department stores and

catalogue companies.

Source: Experian

Study Area: The geographical area where the household survey is carried out, based on

postal sectors that make up the 6 Zones that cover Uttlesford District and

its surrounding hinterland.

Trade draw: The proportion of trade that a development is likely to receive from

customers within and outside its catchment area. It is likely that trade draw will relate to a certain geographic area (i.e. the distance people are likely to travel) and for a particular market segment (e.g. convenience retail). The best way of assessing trade draw where new development is proposed is to look at existing proxies of that type of development in other areas.

Source: PPG Paragraph: 018 Reference ID: 2b-018-20190722

Turnover: Amount of sales per unit area of retail floorspace

Source: Planning Portal

Town Centre: Area defined on the local authority's proposal map, including the primary

shopping area and areas predominantly occupied by main town centre uses within or adjacent to the primary shopping area. References to town centres or centres apply to city centres, town centres, district centres and local centres but exclude small parades of shops of purely neighbourhood significance. Unless they are identified as centres in Local Plans, existing out-of-centre developments, comprising or including main town centre

uses, do not constitute town centres.

Introduction

1.1 Research Background & Objectives

To conduct a survey amongst residents in and around the Uttlesford District Council area to assess shopping habits for main food and grocery, top-up food, non-food shopping and leisure activities.

1.2 Research Methodology

A total of 1002 interviews were conducted between Friday 6th and Wednesday 25th August 2021. Interviews were conducted using NEMS in-house CATI (Computer Assisted Telephone Interviewing) Unit and Face to Face interviewing to ensure the sample is as representative as possible. Respondents were contacted during the day and in the evening. All respondents were the main shopper in the household, determined using a preliminary filter question.

1.3 Sampling

1.3.1 Survey Area

The survey area was segmented into 6 zones defined by postcode sector. The zone details were:

Zone	Postcode Sectors	Number of Interviews
1	CB10 1, CB10 2, CB11 3, CB11 4	169
2	CM22 6, CM22 7, CM23 1, CM24 8	129
3	CM6 1, CM6 2, CM6 3, CM6 4	147
4	SG8 7, SG8 8	101

1.3.2 Telephone Numbers

The landline numbers are generated through a process known as Random Digit Dialling (RDD), whereby we start with known 'seed' numbers and then generate all possible number combinations around these. Known business numbers are removed and the remaining numbers are randomly sorted to give each number the same and equal chance of being selected.

The benefit of using RDD numbers (as opposed to those generated from pre-existing lists such as telephone directories and Electoral Register entries) is that ex-directory numbers are also included in the survey sample. In practice, this means that the sample provided is in no way preselected, and that consumers who had opted-out of providing their telephone contact details to directory operators had the opportunity to take part in the research, thereby removing potential bias in the sample.

Mobile numbers were also included in the survey sample to further increase the inclusivity of the survey, given the increase in the number of mobile-only households amongst certain demographic groups (especially younger people and lower income households). These numbers are generated from a variety of commercial sources, where permission has been given to use such contact information for research and marketing purposes.

We don't screen against the TPS (Telephone Preference Service) database, again because the demographic profile of TPS registered numbers is slightly different to the rest of the population. In addition, there is no legal requirement to screen against TPS registered numbers; market research is not classified as unsolicited sales and marketing.

1.3.3 Time of Interviewing

Approximately two-thirds of all calls are made outside normal working hours.

1.3.4 Sample Profile

It should be noted that as per the survey's requirements, the profile of respondents is that of the main shopper / person responsible for most of the food shopping in the household. As such it will always differ from the demographic profile of all adults within the survey area. With any survey among the main shopper / person responsible for most of the food shopping in the household the profile is typically biased more towards females and older people. The age of the main shopper / person responsible for most of the food shopping in the household is becoming older due to the financial constraints on young people setting up home.

A number of measures are put in place to ensure the sample is representative of the profile of the person responsible for most of the food / shopping in the household.

First of all, interviewing is normally spread over a relatively long period of time, certainly longer than the theoretical minimum time it would take. This allows us time to call back people who weren't in when we made the first phone call. If we only interview people who are at home the first time we call, we over-represent people who stay at home the most; these people tend to be older / less economically active.

We also control the age profile of respondents; this is a two-stage process. First of all, we look at the age profile of the survey area according to the latest Census figures. Using a by-product from additional data we collect from a weekly telephone survey of a representative sample of all adults across the country we know the age profile of the main shopper in any given area. This information is from data based on in excess of 100,000 interviews and is regularly updated and is therefore probably the most accurate and up to date information of its kind.

Stratified random sampling helps ensure that the sample is as representative as possible. While the system dials the next randomly selected number for interviewers, all calls are made by interviewers; no automated call handling systems are used.

1.3.5 Monitoring of Calls

At least 5% of telephone interviews are randomly and remotely monitored by Team Leaders to ensure the interviewing is conducted to the requisite standard. Both the dialogue and on-screen entries are monitored and evaluated. Interviewers are offered re-training should these standards not be met.

1.4 Weightings

To correct the small differences between the sample profile and population profile, the data was weighted. The population is of the main shopper in the household. Weightings have been applied to age bands based on an estimated age profile of main shoppers (see section 1.3.3 for details). The weighted totals differ occasionally from the adjusted population due to rounding error. Details of the age weightings are given in the table below:

Age	Main Shopper Profile (%)	Interviews Achieved	Age Weightings				
18-34	19.04%	101	1.8889				
35-44	18.12%	119	1.5253				
45-54	19.40%	169	1.1500				
55-64	19.37%	194	1.0005				
65+	24.07%	419	0.5757				
Total		1002					

Further weightings were then applied to the zone date, to adjust zone samples to be representative by population. Details of those weightings are given in the table below:

Zone	Population *	Interviews Achieved	Interviews Achieved (Weighted by Age)	Zone Weightings
1	34,516	169	177	0.9118
2	26,319	129	135	1.0887
3	29,997	147	154	1.0009
4	11,375	101	58	0.7367
5	56,660	277	290	1.0534
6	36,593	179	188	1.0688
Total	195,460	1002	1002

1.5 Statistical Accuracy

As with any data collection where a sample is being drawn to represent a population, there is potentially a difference between the response from the sample and the true situation in the population as a whole. Many steps have been taken to help minimise this difference (e.g. random sample selection, questionnaire construction etc) but there is always potentially a difference between the sample and population – this is known as the standard error.

The standard error can be estimated using statistical calculations based on the sample size, the population size and the level of response measured (as you would expect you can potentially get a larger error in a 50% response than say a 10% response simply because of the magnitude of the numbers).

To help understand the significance of this error, it is normally expressed as a confidence interval for the results. Clearly to have 100% accuracy of the results would require you to sample the entire population. The usual confidence interval used is 95% - this means that you can be confident that in 19 out of 20 instances the actual population behaviour will be within the confidence interval range.

For example, if 50% of a sample of 1002 answers "Yes" to a question, we can be 95% sure that between 47.9% and 53.1% of the population holds the same opinion (i.e., +/- 3.1%). The following is a guide showing confidence intervals attached to various sample sizes from the study:

%ge Response	95% confidence interval
10%	±1.9%
20%	±2.5%
30%	±2.8%
40%	±3.0%
50%	±3.1%

1.6 Data Tables

Tables are presented in question order with the question number analysed shown at the top of the table. Those questions where the respondent is prompted with a list of possible answers are indicated in the question text with a suffix of [PR].

The sample size for each question and corresponding column criteria is shown at the base of each table. A description of the criteria determining to whom the question applies is shown in italics directly below the question text; if there is no such text evident then the question base is the full study sample. If the tabulated data is weighted (indicated in the header of the tabulations), in addition to the sample base, the weighted base is also shown at the bottom of each table.

Unless indicated otherwise in the footer of the tabulations, all percentages are calculated down the column. Arithmetic rounding to whole numbers may mean that columns of percentages do not sum to exactly 100%. Zero per cent denotes a percentage of less than 0.05%.

Percentages are calculated on the number of respondents and not the number of responses. This means that where more than one answer can be given to a question the sum of percentages may exceed 100%. All such multi-response questions are indicated in the tabulated by a suffix of [MR] on the question text.

Where appropriate to the question, means are shown at the bottom of response tables. These are calculated in one of two ways: if the data is captured to a coded response a weighted mean is calculated and the code weightings are shown as a prefix above the question text; if actual specific values were captured from respondents these individual numbers are used to calculate the mean.

Mean score [£]:

Q14 Thinking more generally, how much does your household spend on average on 'top up' food and grocery shopping in a week? Once again, top up grocery shopping includes 'basket shops' in foodstores, purchases from speciality retailers such as bakers, butchers and greengrocers, and snacks bought from shops.

Yes at Q11

Uttlesford Dictrict Council - Retail Canacity Study

Good morning / afternoon / evening, I am from NEMS market research, an independent market research company, and we are conducting a short survey in your area on behalf of Uttlesford District Council about shopping habits. Do you have time to answer some questions please? It will take about 5-6 minutes.

QA Are you the person responsible for the main food shopping in your household?

Yes

IF 'YES' - CONTINUE INTERVIEW.

IF 'NO' - ASK, COULD I SPEAK TO THE PERSON WHO IS RESPONSIBLE FOR MOST OF THE FOOD SHOPPING, IF NOT AVAILABLE THANK AND CLOSE INTERVIEW

Preface for the Convenience questions

READ OUT: In order to determine typical shopping patterns; on the following questions please EXCLUDE any unusual or

At which store do you usually undertake your main food and grocery shopping? DO NOT READ OUT. ONE ANSWER ONLY. Q01

CLOSE IF 'DON'T DO' OR 'DON'T KNOW' #Convenie Convenience List

ASKED TO THOSE WHO SAID "INTERNET / DELIVERY" AT Q01

Which retailer do you purchase your main food internet / home delivery shopping from? Q02

DO NOT READ OUT. ONE ANSWER ONLY.

- Asda
- Iceland
- 3 Sainsbury's
- Tesco
- Morrisons
- 6 7
- Ocado Other (PLEASE WRITE IN)
- 8 (Don't know / varies)

Q03 What is the main reason you choose (STORE MENTIONED AT Q01) for your main food and grocery shopping?

DO NOT READ OUT, ONE ANSWER ONLY

- Accessibility by public transport
- Car parking prices
 Car parking provision 2
- Choice of food goods available
- Choice of shops nearby selling non-food goods
- 5 6 7 Choice of shops selling food goods
- Cleanliness
- 8 9 Delivery service Easy to get to by car
- Entertainment / events Good internal layout
- A B
- Good service / friendly staff
- Habit / always use it / preference for retailer
- D E Internet shopping is convenient
- Lower prices
- Loyalty card / points scheme Near to home G H
- Near to work
- Nice shopping environment K
- Only one in the area / no other choice
- Provision of leisure facilities nearby
- L M Provision of services nearby, such as banks and other financial services Public information, signposts and public facilities
- Quality of food goods available
- Quality of shops selling food goods Safety (during the day)
- Safety (during the evening / night time)
- NOPQRST Staff discount / work there
- Value for money
 Other (PLEASE WRITE IN)
- U V (Don't know / no reason in particular)

What, if anything, is the one thing you most dislike about (STORE MENTIONED AT Q01) ? 004 DO NOT READ OUT. ONE ANSWER ONLY Change layout too often Expensive parking 3 Difficult to get to Expensive Lack of cycle parking Difficult to park / lack of parking Lack of public transport 6 Limited range of goods 9 No petrol station Poor internal layout Poor quality Preference for retailer Staff rude / unhelpful C D E F Too busy Too far away G Too small Other (PLEASE WRITE IN) (Don't know) (Nothing) How often do you normally do your main food shopping at (STORE MENTIONED AT Q01?) Q05 DO NOT READ OUT. ONE ANSWER ONLY. Q07 X Y Amount of time taken to nearest whole minute (PLEASE WRITE IN) (Don't know / can't remember) (Refused) Q08 How much on average does your household normally spend on main food and grocery shopping in a week? DO NOT PROMPT. ONE ANSWER ONLY. To the nearest £: (PLEASE WRITE IN) (Don't know / varies) 7 (Refused) NOT ASKED TO THOSE WHO SAID "INTERNET / DELIVERY" AT Q01 When you go main food shopping is your trip linked with any other activity? DO NOT PROMPT. ONE ANSWER ONLY. IF RESPONDENT STATES MORE THAN ONE ANSWER - TAKE THEIR FIRST Q09 ANSWER Yes - NON-FOOD shopping GO TO Q10 GO TO Q10 GO TO Q10 GO TO Q11 Yes – other FOOD shopping Yes – visiting services such as banks and other financial institutions 4 Yes - leisure activity 5 Yes - travelling to/from work **GO TO Q11** 6 Yes – travelling to/from school/college/university GO TO Q11 Yes - getting petrol GO TO Q11 GO TO Q11 GO TO Q11 8 Yes - visiting café / pub / restaurant Yes – visiting family/friends Yes - visiting health service such as doctor, dentist, hospital GO TO Q11 В Yes – visiting other service such as laundrette, hairdresser, recycling Yes – other activity (PLEASE WRITE IN) **GO TO Q11** GO TO Q11 D (No activity) GO TO Q11 (Don't know / varies) **GO TO Q11**

ASK THOSE WHO SAID YES TO: "NON-FOOD", "OTHER FOOD" OR "SERVICES" AT Q9 OTHERS GO TO Q11

Q10 Where do you do this linked trip?

DO NOT PROMPT. ONE ANSWER ONLY. IF IN STORE IN A SUPERMARKET WRITE IN NAME OF SUPERMARKET AND

#Compari Comparison List

Do you make 'top up' shopping trips in between your main food shopping trip? Top up grocery shopping includes 'basket shops' in foodstores, purchases from speciality retailers such as bakers, butchers and greengrocers, and snacks bought from shops.
DO NOT READ OUT. ONE ANSWER ONLY.

GO TO Q12 GO TO LOCK1 No

ASKED TO THOSE WHO DO TOP UP SHOPPING AT Q11

Where ddo you usually undertake your 'top up' shopping? DO NOT READ OUT. ONE ANSWER ONLY.

#Convenie Convenience List

ASKED TO THOSE WHO DO TOP UP SHOPPING AT Q11

How often do you make 'top up' shopping trips to (STORE MENTIONED AT Q12)? DO NOT READ OUT. ONE ANSWER ONLY. Q13

- At least two times a week 2
- At least once a week
- At least once a fortnight 5 At least once a month
- At least every two months
- Less often
- 8 Have only visited once
- (Don't know / varies)

ASKED TO THOSE WHO DO TOP UP SHOPPING AT Q11

Q14 Thinking more generally, how much does your household spend on average on 'top up' food and grocery shopping in a week? Once again, top up grocery shopping includes 'basket shops' in foodstores, purchases from speciality retailers such as bakers, butchers and green grocers, and snacks bought from shops. DO NOT READ OUT. ONE ANSWER ON LY.

- To the nearest £: (PLEASE WRITE IN)
- (Don't know / varies)
- Z (Refused)

New questions to see how internet shopping has changed and may change post Covid

BEFORE the Covid lockdown how often were you shopping online for groceries?

DO NOT PROMPT. ONE ANSWER ONLY

Daily

LOCK1

- 4-6 days a week
- 2-3 days a week One day a week 3
- Every two weeks
- Every three weeks Monthly
- 6 7 8
- Once every two months
- 9 Three-four times a year
- Twice a year Once a year В
- Less often
- C D Never
- (Don't know)
- (Varies)

LOCK2 DURING the Covid lockdown how often did you shop online for groceries? DO NOT PROMPT. ONE ANSWER ONLY.

- Daily
- 2 4-6 days a week 2-3 days a week
- One day a week
- 4 5 Every two weeks
- Every three weeks 6 7 Monthly
- 8 Once every two months
- Three-four times a year
- Twice a vear
- A B Once a year С Less often
- Never
- D E (Don't know) F

Using the data from LOCK2 compared to LOCK1 we will be able to create the question below:

Online grocery shopping DURING lockdown compared to BEFORE lockdown: QA

- More
- Same
- Less
- (Don't know /varies)

LOCK3 NOW THAT the lockdown is lifted, how often do you think you will be shopping online for groceries?

DO NOT PROMPT. ONE ANSWER ONLY

- Daily
- 4-6 days a week
- 3 2-3 days a week One day a week
- Every two weeks
- Every three weeks
- 6 7 Monthly
- Once every two months
- 9 Three-four times a year
- Twice a year
- Once a year Less often
- C D Never
- E F (Don't know)
- (Varies)

Using the data from LOCK3 compared to LOCK2 we will be able to create the question below:

QB Online grocery shopping AFTER lockdown compared to DURING lockdown:

- More
- Same
- Less
- (Don't know /varies)

Using the data from LOCK3 compared to LOCK1 we will be able to create the question below:

QC Online grocery shopping AFTER lockdown compared to BEFORE lockdown:

- More
- Same
- 3 Less
- (Don't know /varies)

Preface for Comparison questions

READ OUT: We now have a few questions about where you go for non-food shopping. In answering these questions, the location may be a town centre, a retail park, a free-standing store, or it could be facilities such as the internet, TV shopping or catalogue. Again, please EXCLUDE any unusual or special shopping trips you may have made due to the current COVID 19 situation

Q15

Where do you usually buy clothing or footwear goods?
DO NOT PROMPT. ONE ANSWER ONLY. IF IN STORE IN A SUPERMARKET WRITE IN NAME OF SUPERMARKET AND TOWN.

#Compari Comparison List

Q16

Where do you usually buy books, CDs, DVDs?
DO NOT PROMPT. ONE ANSWER ONLY. IF IN STORE IN A SUPERMARKET WRITE IN NAME OF SUPERMARKET AND TOWN.

#Compari Comparison List

Q17 Where do you usually buy small household goods such as home furnishings, jewellery, glass and china items?

DO NOT PROMPT. ONE ANSWER ONLY. IF IN STORE IN A SUPERMARKET WRITE IN NAME OF SUPERMARKET AND TOWN

#Compari Comparison List

Where do you normally buy goods such as toys, games, bicycles and recreational goods? Q18

DO NOT PROMPT. ONE ANSWER ONLY. IF IN STORE IN A SUPERMARKET WRITE IN NAME OF SUPERMARKET AND TOWN

#Compari Comparison List

Where do you normally buy chemist goods (including health and beauty products)? Q19

DO NOT PROMPT. ONE ANSWER ONLY. IF IN STORE IN A SUPERMARKET WRITE IN NAME OF SUPERMARKET AND TOWN

#Compari Comparison List

Q20

Where do you normally electrical items, such as televisions, washing machines and computers?

DO NOT PROMPT. ONE ANSWER ONLY. IF IN STORE IN A SUPERMARKET WRITE IN NAME OF SUPERMARKET AND TOWN.

#Compari Comparison List

Where do you normally buy DIY or gardening goods? Q21

DO NOT PROMPT. ONE ANSWER ONLY. IF IN STORE IN A SUPERMARKET WRITE IN NAME OF SUPERMARKET AND TOWN

#Compari Comparison List

Where do you normally buy furniture, carpets and floor coverings?
DO NOT PROMPT. ONE ANSWER ONLY. IF IN STORE IN A SUPERMARKET WRITE IN NAME OF SUPERMARKET AND TOWN

New questions to see how internet shopping has changed and may change post Covid

READ OUT: Now continuing to think about non-food shopping online before, during and after the covid lockdown.

LOCK4 BEFORE the Covid lockdown how often were you doing non-food shopping online? DO NOT PROMPT. ONE ANSWER ONLY.

- Daily 1
- 4-6 days a week
- 3 2-3 days a week
- 4
- One day a week Every two weeks 5
- Every three weeks
- 6 7 8 Monthly
- Once every two months
- 9 Three-four times a year
- Twice a year
- A B Once a year
- C D Less often
- Never E (Don't know)
- (Varies)

LOCK5 DURING the Covid lockdown how often were you doing non-food shopping online? DO NOT PROMPT. ONE ANSWER ONLY.

- Daily
- 4-6 days a week 2
- 2-3 days a week
- 3 4 One day a week
- Every two weeks Every three weeks
- 5 6 7 Monthly
- 8 Once every two months
- Three-four times a year
- Twice a year В Once a vear
- Less often
- D Never
- (Don't know) Ε (Varies)
- Using the data from LOCK5 compared to LOCK4 we will be able to create the question below:

QD Non-food shopping online DURING lockdown compared to BEFORE lockdown:

- More
- Same
- Less
- (Don't know /varies)

LOCK6 NOW THAT the lockdown is lifted, how often do you think you will be doing non-food shopping online?

DO NOT PROMPT. ONE ANSWER ONLY.

- Daily
- 2 4-6 days a week 2-3 days a week
- One day a week
- Every two weeks Every three weeks
- 5 6 7 Monthly
- 8 9 Once every two months Three-four times a year
- Twice a year
- A B C Once a year Less often
- Never
- E F (Don't know)
- (Varies)

Using the data from LOCK6 compared to LOCK5 we will be able to create the question below:

QE Non-food shopping online AFTER lockdown compared to DURING lockdown:

- More 2
 - Same
- 3 Less
- (Don't know /varies)

Using the data from LOCK6 compared to LOCK4 we will be able to create the question below:

QF Non-food shopping online AFTER lockdown compared to BEFORE lockdown:

- Same
- Less
- (Don't know /varies)

Which of the following forms of shopping do you carry out? READ OUT. CAN BE MULTICODED Q23

- Internet
- Portable internet shopping (through mobile phone)
- TV Shopping
- (None of these)

GO TO 027

Q24 Which goods or services do you currently purchase via Internet or TV shopping? DO NOT READ OUT. CAN BE MULTICODED

- Baby items
- Banking / finance
- Books CDs, DVDs, Vinyl (physical products)
- Clothes / shoes
- Computer / printer accessories
- Console / PC games
 Cosmetics / health / beauty / chemist goods 8
- Craft / hobby items (including stationary)
- DIY / hardware goods Domestic electrical appliances (white goods) A B
- Downloadable content (e.g. music / movies / tv / games / apps)
- CDEFGH
- Food / groceries Furniture / soft furnishings / floor coverings / carpets
- Garden items
- Gifts
- Holiday and / or Travel / Event Tickets
- Insurance Jewellery
- Mobile phone accessories
- L M Musical instruments / accessories
- Pet food / products
- Small electrical items (e.g. kettles / toasters / hairdryers etc)
- N O P Small household goods
- Sports goods
- Toys TVs, Hi-Fi's, computers
- Q R S T Vehicle parts
- Vehicles Other (PLEASE WRITE IN)
- U V (Don't know)

Excluding what you've already mentioned - Which other goods or services are you likely to purchase in the future via Q25 Internet or TV shopping? DO NOT READ OUT. CAN BE MULTICODED

- Baby items
- 2 Banking / finance
- Books CDs, DVDs, Vinyl (physical products) 3 4
- Clothes / shoes
 Computer / printer accessories
- 6 7 Console / PC games
- 8 Cosmetics / health / beauty / chemist goods
- Craft / hobby items (including stationary) 9 A B C D DIY / hardware goods

- Other (PLEASE WRITE IN)
- (Don't know) (Nothing new / same goods as I currently am)

For your last Internet or TV order, how did you receive your goods? Q26A

DO NOT READ OUT. ONE ANSWER ONLY.

1	Collection at store	GO TO Q27
2	Home delivery	GO TO Q27
3	Delivery to place of work	GO TO Q27
4	Collection at click and collect hub	GO TO Q26B
5	Collection at other location	GO TO Q27
6	(Don't know / varies)	GO TO Q27

ASKED TO THOSE WHO SAID "COLLECTION AT CLICK AND COLLECT HUB" AT Q26A

Which click and collect hub did you collect your order from? DO NOT READ OUT. ONE ANSWER ONLY. Q26B

Full name and address of collection hub: (PLEASE WRITE IN)

Qualitative questions concening the town centres

READ OUT: I would now like to ask you some questions about your views on certain Town Centres as a place for shopping, leisure activities, and using other other town centre services. Again please state how you acted before the covid lockdown started.

Do you ever visit the following Centres? READ OUT. CAN BE MULTICODED. Q27

- Saffron Walden Great Dunmow 2
- 3 Stansted Mountfitchet
- 4 Thaxted
- 5 (Do not visit any of these centres)

GO TO Q31

Asked to those who mentioned more than one centre at Q27

Which of those centres do you visit most often? Q27A

READ OUT. ONE ANSWER ONLY.

- Saffron Walden Great Dunmow
- 3 4 Stansted Mountfitchet
- Thaxted

How often do you visit (CENTRE MENTIONED AT Q27A)? Q28A

DO NOT READ OUT. ONE ANSWER ONLY.

- Daily
- At least two times a week
- At least once a week
 At least once a fortnight 3
- At least once a month
- At least every two months
- 6 7 At least every 3 months
- At least every 6 months
- 8 Less often than once every 6 months Have only visited once
- Α
- В (Don't know / varies)

Q28B How do you usually travel to (CENTRE MENTIONED AT Q27A)?

DO NOT READ OUT. ONE ANSWER ONLY.

- Car / van (as driver)
- Car / van (as passenger)
- Bus (including the busway or guided bus), minibus or coach 3 4
- Motorcycle, scooter or moped
- 5 Walk
- 6 7 Taxi
- 8 Bicycle
- Mobility scooter / disability vehicle
- В Other (PLEASE WRITE IN)
- С (Don't know / varies)

What do you like most about (CENTRE MENTIONED AT Q27A)? DO NOT READ OUT. ONE ANSWER ONLY. Q29

- Choice and range of shops
- Strength of supermarket provision Choice of leisure facilities (restaurants, pubs etc) 3
 - Choice of services (hairdressers, banks etc)
- 5 Environmental quality of centre
- 6 Close to home Close to work
- 7 8 Easily accessible by public transport
- Convenient car parking

- Free car parking
 Other (PLEASE WRITE IN)
- B C (Nothing in particular)

Are there any measures that would encourage you to visit (CENTRE MENTIONED AT Q27A) more often? Q30 DO NOT PROMPT. CODE FIRST 3 MENTIONS 1st Mention | 2nd Mention | 3rd Mention GO TO Q33 GO TO Q33 Increased general choice and range of shops Improved food shops within the town centre 3 Discount foodstores within the town centre GO TO Q33 Improved non-food shops within the town centre Improved leisure facilities GO TO Q33 5 GO TO Q33 Improved quality of shops GO TO Q33 More parking GO TO Q33 8 GO TO Q33 Cheaper parking Improved street cleaning GO TO Q33 Increased public transport Cheaper public transport GO TO Q33 GO TO Q33 A B C D Better environment GO TO Q33 Better security GO TO Q33 E GO TO Q33 Longer opening hours Other (PLEASE WRITE IN) GO TO Q33 G H GO TO Q33 GO TO Q33 (Nothing / Nothing else) (Don't know) ASK THOSE WHO DON'T VISIT ANY TOWN CENTRE AT Q27 Why don't you visit any of these Town Centres? DO NOT READ OUT. CAN BE MULTICODED Q31 Lack of choice and range of non-food shops Lack of choice and range of food shops Choice of leisure facilities (cinema, gym, pubs etc) 3 Choice of services (hairdressers, banks etc) 5 6 Environmental quality of centre Too far away from home Too far away from work 8 Not accessible by public transport Inconveniently located car parking Expensive car parking В Traffic congestion Other (PLEASE WRITE IN) D (Nothing, no reason to visit) Ε (Don't know) ASK THOSE WHO DON'T VISIT ANY CENTRES AT Q27 Instead of these Town Centre's, which other larger centres do you usually visit? Q32 CAN BE MULTICODED. Cambridge Bury St Edmunds 3 4 Colchester Braintree Chelmsford 6 7 Harlow Hertford Stevenage Others (PLEASE WRITE IN) 9 Α (None) Q33 Which of these activities do you participate in? READ OUT. CAN BE MULTICODED ASK Q34 Restaurants 2 Pub / bars / nightclubs ASK Q35 (None of these) GO TO 036 ASKED TO THOSE WHO GO TO RESTAURANTS AT Q33 Which centre / facility did you last visit to go to a restaurant? DO NOT PROMPT. ONE ANSWER ONLY. Q34 #Social Social List ASKED TO THOSE WHO GO TO PUB, BARS OR NIGHTCLUBS AT Q33 Which centre / facility did you last visit to go to pubs, bars and nightclubs? DO NOT PROMPT. ONE ANSWER ONLY. Q35 #Social Social List Q36 Thank you very much for taking part, your answers have been very helpful. We have another similar survey coming up in the property of the prthe next month or so, would you be willing to participate again? DO NOT PROMPT. ONE ANSWER ONLY.

Yes No

Uttlesford District Sub-total				£131.8	£179.2	£180.7	£48.9

Notes:

a. Gross floorspace derived from Valuation Office Agency (VOA) records.

b. Proportion of net floorspace dedicated to convenience goods sales generally taken from company benchmark average (exceptions relate to small convenience stores, which we have assumed will be 95% convenience goods)

c. Sales densities derived from GlobalData Convenience and Comparison Goods Sales Densities of Major Grocers (2020) and Mintel Retail Rankings (2021)
d. It is assumed that all unnamed convenience stores and independent stores are 'trading at equilibrium' (i.e. their 'benchmark' turnover equates to that ientified by the survey)

e. Survey derived performance of stores calculated by adding together 'main' and 'top up' turnover as set out in Table 4

Nexus Planning

Table 6a: Estimated 'capacity' for new convenience goods facilities in Uttlesford District

Year	Benchmark Turnover (£m) ¹	Survey Turnover (£m) ²	Inflow (£m)	Surplus Expenditure (£m)
2021	131.8	179.2	1.5	48.9
2025	132.8	183.8	1.5	52.5
2030	132.8	188.0	1.6	56.7
2035	132.8	192.8	1.6	61.6
2040	136.8	197.8	1.7	62.7
Study Area Market Share (%)		39.7		

^{1.} Allows for increased turnover efficiency as set out in Table 4a Experian Retail Planner 18 (Oct 2020)

2019 Prices

Table 6b: Gross quantitative capacity for additional convenience goods floorspace in Uttlesford District

Year	Surplus Expenditure	Floorspace Capacity (sq m net)			
l ear	(£m)	Min ¹	Max ²		
2021	48.9	4,300	6,300		
2025	52.5	4,600	6,700		
2030	56.7	4,900	7,200		
2035	61.6	5,300	7,800		
2040	62.7	5,400	7,900		

a. Average sales density assumed to be £11,425 per sq m (at 2021), based on the average sales density of supermarket foodstore operators

c. Allows for increased turnover efficiency as set out in Table 4a Experian Retail Planner 18 (October 2020)

2019 Prices

Table 6c: Extant convenience goods commitments in Uttlesford District

Destination	Reference	Proposal	Net Convenience Floorspace (sq m)	Estimated Sales Density (£/sq m)	Estimated Convenience Turnover (£m)
Commercial Centre, Ashdon Road, Saffron Walden	UTT/17/3413/OP	Outline permission for the erection of up to 55 dwellings, A1, B1, B2 and or D2 floorspace.	279	8,000	2.2
The Barn Studio, Mill Road, Henham	UTT/20/2093/CLE	Change of use of funciton barn (D2) To use as a case, grocery store and offices.	304	8,000	2.4

Notes:

a. Sales density assumed to be £8,000 based on Nexus Planning judgement where the format or occupier has not been referenced within the application.

b. Assessed commitments limited to development proposals greater then 200 sq m

2019 Prices

Year	(£m)	(£m)	(£m)	Min ¹	Max ²
2021	48.9	4.7	44.2	3,900	5,700
2025	52.5	4.7	47.8	4,200	6,100
2030	56.7	4.7	52.0	4,500	6,600
2035	61.6	4.7	56.9	4,900	7,200
2040	62.7	4.7	58.0	5.000	7.300

^{1.} Average sales density assumed to be £11,605 per sq.m (rounded) based on the average sales density of the leading four supermarkets as identified by Verdict 2018

^{2.} Assumes constant market share claimed by Uttlesford District facilities at 39.7% from the Study Area

b. Average sales density assumed to be £7,825 per sq m (at 2021), based on the average sales density of Aldi, Lidl and other discount retail operators

^{2.} Average sales density assumed to be £9,137 per sq.m (rounded) based on the average sales density of discount operators as identified by Verdict 2018 3. Allows for increased turnover efficiency as set out in Table 4a Experian Retail Planner 18 (Ocotber 2020)

Uttlesford Retail Capacity Study

Nexus Planning

Table 27a: Estimated 'capacity' for new comparison goods facilities in Uttlesford

Year	Total Survey Turnover (£m)¹	Borough Turnover (£m)²	Inflow (£m)	Surplus Expenditure (£m)
2021	88.8	85.8	2.9	0.0
2025	101.4	97.2	3.4	-0.9
2030	116.2	112.0	3.8	-0.3
2035	132.1	130.5	4.4	2.8
2040	150.5	152.9	5.0	7.4
Study Area Market Share (%)		13.3		

^{1.} Allows for increased turnover efficiency as set out in Table 4b Experian Retail Planner 18 (Oct 2020)

2019 Prices

Table 27b: Gross quantitative capacity for additional comparison goods floorspace in Uttlesford

Vara	Surplus Expenditure	Floorspace Cap	acity (sq m net)
Year	(£m)	Min ¹	Max ²
2025	-0.9	-100	-200
2030	-0.3	0	-100
2035	2.8	300	400
2040	7.4	700	1.000

a. Average sales density assumed to be £7,000 per sq m, which Nexus Planning considers to be towards the higher end of what would be achieved in Uttlesford District

2019 Prices

Table 27c: Extant comparison goods commitments in Uttlesford

Destination	Reference	Proposal	Net Comparison Floorspace	Estimated Sales Density	Estimated Comparison Turnover	
			(sq m)	(£/sq m)	(£m)	
The Hangar, Freemans Farm, Wimbish	UTT/20/1667/FUL	Change of use to A1 retail	260	6,000	1.6	
Total						

Notos

a. Comparison floorspace is assumed to be 2/3 net sales area based on Nexus Planning judgement where the occupier has not been referenced within the application

b. Assessed commitments limited to development proposals greater then 200 sq $\mbox{\scriptsize m}$

2019 Prices

Table 27d: Net quantitative capacity for additional comparison goods floorspace in Uttlesford

Year	Surplus Expenditure	Commitments	Residual Expenditure	Floorspace Capacity (sq m net)	
	(£m)	(£m)	(£m)	Min ¹	Max ²
2025	-0.9	1.6	-2.4	-300	-500
2030	-0.3	1.8	-2.1	-300	-400
2035	2.8	2.0	0.8	100	100
2040	7.4	2.3	5.1	500	800

Notes

Notes:

a. Average sales density assumed to be £7,000 per sq m, which Nexus Planning considers to be towards the higher end of what would be achieved in Uttlesford District

b. Average sales density assumed to be £5,000 per sq m, which Nexus Planning considers to be towards the lower end of what would be achieved in Uttlesford District

c. Residual calculated by subtracting turnover of commitments (sourced from Table 27c) from surplus expenditure (sourced from Table 27a)

d. Allows for increased turnover efficiency as set out in Table 4b Experian Retail Planner 18 (October 2020) **2019 Prices**

^{2.} Assumes constant market share claimed by Uttlesford facilities at 13.3% from Study Area

b. Average sales density assumed to be £5,000 per sq m, which Nexus Planning considers to be towards the lower end of what would be achieved in Uttlesford District

c. Allows for increased turnover efficiency as set out in Table 4b Experian Retail Planner 18 (October 2020)
